In my experience, it can be taught as a one-term full course at 4 hrs/w.

My thanks to all of my students, who have actively noted typos, inconsistencies of presentation, etc., and especially to Matthew Stolper, for his 7 pages (so far) of miscellaneous notes and corrections.

# LESSON 1

## OLD PERSIAN AND OLD IRANIAN.

**Old Persian** and **Avestan** are the two oldest known Iranian languages. They were both spoken several centuries B.C.E. Together they make up the the oldest stratum of the Iranian branch of the Indo-European language group. The Indic, or Indo-Aryan, branch is represented by Old Indic, known from the Rigveda and later literature in Sanskrit. The Indo-Iranian group, finally, is but one branch of the Indo-European language group, to which most European languages belong.

**Old Persian** was the language of a group of Iranians who in the Achaemenid period settled in the area of modern Fārs, which the Greek historians and geographers called Persis, an area under Elamite control with its capital at Anzan/Anšan. We do not know when or how the Old Persian-speaking tribes came from Central Asia to southwest Iran, where they are found in the historical period. The only clue is the mention of the Parsuwa in the area of Lake Van in the records of Ashurnasirpal (883-859 B.C.E.); in 835 B.C.E. Shalmaneser (858-824 B.C.E.) is said to have received tributes from 27 kings of Parsuwa.

The extant Old Persian texts all date from the 6th to the 4th century. They are written in a cuneiform script, probably invented under Darius for the purpose of recording his deeds. It was the first cuneiform script to be deciphered and provided the clue to the decipherment of all the other cuneiform scripts. The Old Persian language as we know it from the inscriptions (5th-4th cents.) was already about to change into Middle Persian, as we can see from the late inscriptions, in which “wrong” endings (from an Old Persian point of view) are common. It is therefore probable that Old Persian had already been spoken for a few centuries before this time, that is, throughout most of the first half of the first millennium B.C.

The late inscriptions probably record a post-Old Persian language in its own right, a “post-Old Persian” or “pre-Middle Persian,” the predecessor of Middle Persian as known from the 1st century B.C.E. on. Characterizing this language simply as “incorrect Old Persian” fails to acknowledge the natural evolution of language, as if modern English were simply incorrect Middle English, etc.

Middle Persian (or Pahlavi) is mainly known from the official inscriptions of the Sasanian period (ca. 240-621 C.E.) and the literature of the Zoroastrians. Old Persian and Middle Persian are the ancestors of New Persian (Fārsi).

In northwestern Iran, **Median** was spoken, which is known from numerous loanwords in Old Persian. We know nothing about its grammar, but it shares important phonological isoglosses with Avestan, rather than Old Persian. The Medes, too, are first mentioned in the Assyrian annals. Tiglath-Pileser III (744-727 B.C.E.) refers to the Mātai, Medes, as the “mighty Medes” or the “distant Medes.” At the battle of Halule on the Tigris in 691 Sennacherib (704-681) faced an army of troops from Elam, Parsuwa, Anzan, and others. In the Vassal Treaties of Esarhaddon (680-69 B.C.E.) and elsewhere “kings” of the Medes are mentioned.

Under the Median rule (ca. 700-522) Median must to some extent have been the official Iranian language in western Iran. No documents in Median have been preserved, however, and it is likely that the Old Persian cuneiform script was not invented till under Darius. If the Medes wrote in Median they must therefore have used another script. By the time Old Persian became the official Iranian language under the Achaemenids, numerous Median words had found their way into it. These are not restricted to technical terminology such as administration, but are from all parts of the lexicon. Sometimes both Median and Old Persian forms are found, which gave Old Persian a somewhat confusing and inconsistent look: “horse,” for instance, is both *asa* (OPers.) and *aspa* (Med.).<sup>1</sup>

The other known Old Iranian language is that of the *Avesta*, the Zoroastrian scriptures. The geographical names in the **Avestan** texts show that the Avestan language must have belonged to tribes settled in the area stretching from modern Sistan to the Aral Sea. There is no trace of south-Iranian geography in the extant Avestan texts. The westernmost place mentioned may be “Zoroastrian Rayā,” if that is to be identified with Ragā in Media of Darius’s Bisotun inscription and the town of Ray just south of modern Tehran, but that is wholly uncertain.

---

<sup>1</sup> Another explanation of the mixture of dialects in Old Persian could be that Old Persian had assimilated elements from Avestan, with which the Achaemenids were apparently familiar.

## LESSON 1

The language of the oldest Avestan texts (Old Avestan) is very close to that of the Old Indic Rigveda and as such is of a very archaic Indo-European type. The language of the later *Avesta* (Young or Late Avestan) texts is more similar to the language of the oldest Old Persian inscriptions than to Old Avestan. It is therefore not unlikely that Avestan was a language spoken in northeastern and eastern Iran from the second half of the 2nd millennium (Old Avestan) down to about the beginning of the Achaemenid period (Young Avestan).

### SCRIPT. ORIGIN.

Opinions vary about who invented and first used the Old Persian script: the Medes or Darius for his Bisotun inscription. There are two important pieces of evidence to be considered: 1. the dating of the inscriptions of Cyrus the Great (Cyrus II) at Pasargadae and 2. the meaning of §70 of the Bisotun inscription, in which Darius speaks about the inscription.

As for point 1, it has been conclusively shown that the Old Persian version of Cyrus's inscription does not date from his time, but is a later addition. There are therefore no inscriptions from before Darius I, since those attributed to Ariaramnes and Arsames are modern, less likely antique, forgeries.

As for point 2, the interpretation DB §70 hinges on the meaning of the expression *ima dipi-ciçam adam akunavam patişam ariyā utā pavastāy[ā] utā carmā gar[x x x x x x x]* "I made this form of inscription. And it [was?] Aryan and both on tablet(s) and on parchment." The expression *dipi-ciçam* "form of inscription"<sup>2</sup> is likely to refer to the new script, but other interpretations may be possible.

### SCRIPT. WRITING SYSTEM.

In the following description of the Old Persian script system, pointed brackets <> are used to indicate the "transliteration," that is the (English) value of the sign(s) in the syllabary. When we want to indicate the pronunciation of a word, we "transcribe" it, for instance, the transliteration <ba-ga-a> reproduces the spelling 𐎧𐎠𐎡𐎹, while the transcription *bagā* indicates the pronunciation of the word.

Old Persian is written in a cuneiform script, but with only a small number of signs compared to languages such as Sumerian and Akkadian. There are three vowel signs <a, i, u>, 33 consonant signs <CV>,<sup>3</sup> 8 so-called ideograms or logograms, that is, signs that stand for a whole word, and a sign that serves to mark the end of words (word separator). In addition there are signs for the numerals. The inventory of signs is referred to as the "syllabary."

The consonant signs are syllabic, that is, they note consonant + vowel <CV>. The "inherent" vowel of a single sign is *a*, *i*, or *u* <Ca, Ci, Cu>. The syllabary does not contain a complete set of <Ci> and <Cu> signs, however: there are only 4 <Ci> signs and 7 <Cu> signs. The <Ca> signs are therefore in a sense neutral (or "unmarked"), as they also have to serve for the missing <Ci> and <Cu> signs. In addition <Ca> signs are used where a consonant is followed by no vowel, that is, when followed by other consonants or when it is the last sound of a word (in final position). <Ca> signs are therefore often transliterated simply as <C>. In this manual <Ca> is used.

The vowel signs <a, i, u> are used initially (when the word begins with a vowel) and to write long vowels. The signs <i> and <u> are also used to write the vowels *i* and *u*, less commonly *ī* and *ū*. They are preceded by the <Ci> and <Cu> signs whenever these exist. Very rarely <Ci> and <Cu> are used alone to indicate consonant plus *i* or *u*.

## LESSON 1

### SCRIPT. TRANSCRIPTION.

In the transcription of Old Persian the choice of English letters to represent the sounds of Old Persian is of a standard international type.

The following two points should be noted:

When <Ci> and <Cu> are used alone to indicate consonant plus *i* or *u* the vowel is usually transliterated as superscript: *v<sup>i</sup>*, *g<sup>u</sup>*.

Certain sounds that are expected from the etymology (linguistic history) of the word are not written in the Old Persian script. In the grammar and vocabularies below these are indicated by superscript letters (*A<sup>h</sup>uramazdā<sup>h</sup>*, *ba<sup>n</sup>daka<sup>h</sup>*, *abara<sup>t</sup>*, *abara<sup>n</sup>*), but in the text examples they are omitted.

Examples:

Old Persian	Transliteration	Transcription (normalization)
𐎠𐎡𐎣	<ba-ga>	<i>baga</i>
𐎠𐎡𐎢𐎣	<ka-a-ra>	<i>kāra</i>

𐎠𐎡𐎢𐎣	<ba-da-ka>	<i>ba<sup>n</sup>daka (bandaka)</i>

### PHONOLOGY. PRONUNCIATION.

The simple vowels may be pronounced as in German or Spanish, rather than as in English:

- a* as in Germ. *Mann*, Span. *gato*, Eng. *must*
- i* as in Germ. *ist*, Span. *chico*, Eng. *beat* (but short)
- u* as in Germ. *und*, Span. *uno*, Eng. *put*
- ai* as in Germ. *Kaiser*, Span. *baile*, Eng. *lie*
- au* as in Germ. *Haus*, Span. *causa*, Eng. *how*

The long vowels *ā*, *ī*, *ū* are pronounced like the short ones, only longer.

The combination *ar* should probably be pronounced [ər] (as in English *courageous*, French *ferais*). Similarly, *ha* should be pronounced [hə], or possibly [hi].

The consonants *p*, *t*, *k*, may be pronounced either without aspiration as in the Romance languages (e.g., Spanish) or with aspiration as in the Germanic languages (English, German, etc.) or in Persian, as we do not know how they were pronounced in Old Persian.

Old Persian *s* is always pronounced [s] as in *sing*, never [z] as in *zero*, for which Old Persian uses *z*.

## LESSON 1

Special transcription letters include:

- c* as Eng. *ch* in *child* or Ital. *cento*.
- j* as Eng. *j* in *judge*.
- ç to be pronounced as *s*. We do not know the exact pronunciation of this letter. It may have been [sr]. Historically ç comes from older *θr*.
- θ* as Eng. *th* in *thing*.
- x* as Germ. *ch* in *auch* (not as in *ich*), Spanish Span. *j*, as in *bajo* [baxo] (not as in American Span. [baho]).
- š as Eng. *sh* in *shall*, *fish*.

### PHONOLOGY. STRESS.

We do not know the rules for Old Persian stress, but some rules may be formulated from comparison with other Iranian languages and Indic.

In words of two, three, or four syllables, the heavy syllable closest to the end of the word, not counting the last syllable, probably took the stress. Here “heavy syllable” = a syllable with a long vowel or a diphthong or a short vowel followed by more than one consonant (or an unwritten *n* or *h* + cons.) and “light syllable” = syllable with a short vowel followed by only one consonant:

*kāra*, *Vištāspa*, *āmātā*, *Auramazdāha*, *kāsakāina*  
*vazārka*, *Auramazdā*, *Ariyārāmna*  
*frābara*, *duvitāparanam*  
*mārtiya*, *vīspazanā*

We have no way of knowing whether words with a closed final syllable (= a final syllable with a final consonant) could be stressed on the last syllable, for instance, *Kurauš*: *Kúrauš* or *Kuráuš*, and *dahayauš*: *dáhayauš* or *daháyauš*.

In words with several short syllables the stress moved toward the beginning of the word: *bāga*, *nāvama*, but we do not know how far it was allowed to go and so, for instance, where the stress lay in *hamaranakara* and other words with four or more short syllables, e.g.: *ákunavam* or *akúnavam*, *hámaranakara* or *hamáranakàra* (à = secondary stress), *úšhamaranakara* or *ušhamáranakara*.

It is also possible, even probable, that new rules for stress developed in the Old Persian period, as Middle Persian forms show that in some word patterns the stress moved to the second-to-last syllable (penult, or last syllable if the final vowel had already been lost) also when it was light: *navāma* > *\*nowóm*<sup>4</sup> (the new stress may represent a generalization of the stress of the genitive-dative: *naváhayā*).

In cases where a short vowel developed, as in *xšāyaθiya*, which is from *\*xšāyaθya*, *Haxāmanišiya* < *\*Haxāmanišya*, or *θanuvaniya* < *\*θanvanya*, the position of the stress is a matter of conjecture. These words may have been stressed either *xšāyáθiya* < *\*xšāyáθya*, *Haxāmaníšiya* < *\*Haxāmaníšya*, and *θanuvániya*, or *xšāyaθiya*, *Haxámanišiya*, and *θánuvàniya*, according to the above rule (cf. Middle and New Persian *šāh* < *xšāyaθiya*?). We also do not know whether the stress shifted position in the genitive-dative forms such as *kārahaya* ~ *kārahaya* (< *\*kārahya*).

Note also the case of *marika*- < *\*mariyaka*- (cf. Av. *mairiia*-, OInd. *mārya*-, *maryaká*-). The probable development is *\*mariyaka* > *mārika* > *marika*, but it may also have been *\*mariyaka* > *marika*.

<sup>4</sup> An asterisk (\*) indicates that the word is not actually found, only reconstructed.

## LESSON 2

### SCRIPT. SPECIAL CONVENTIONS. 1.

#### <ha> = *hā*:

The sign <ha> was frequently used alone in positions where we (for historical reasons) would expect <ha-i>. Such a use of <ha> is indicated by transcribing it as *hā*. Most often this occurs in the combination <Ca-ha-ya> *-ahāya-* instead of <Ca-ha-i-ya> *-ahiya-* < \**-ahya-*. The spelling <Ca-ha-i-ya> *-ahiya-* is found in the inscriptions of Xerxes.

Examples of *hā* in other positions: *hāzānam* “the tongue,” *hāštataiy* “it stands.”

Examples of *hi*: *Hinduš* “India” (actually Sindh), *Hinduša-* “Indian.”

#### <u-> = *hū̃*:

Original initial *hu-* or *hū-* is written <u(v)-> *hū̃-* in Old Persian, see the vocabulary.

#### <ra> = *ar*:

The sign <ra> was also used to spell *r*, the Indo-Iranian so-called “vocalic *r*,” that is, an *r* used as a vowel (C̣C; similar to American pronunciation of *er* in *perhaps* [pɪhæps]). Such a use of *ra* is indicated here by writing *ar*, for instance *vazarka-*, cf. New Persian *bozorg*, with *ar* > *or*, as opposed to *martiya-*, Persian *mard*, with *ar* > *ar* (see lesson 8). Vocalic *r* is always preceded by a <Ca> sign, never <Ci> or <Cu>.

### NOUNS AND ADJECTIVES. THE NOMINAL SYSTEM.

Nouns (substantives) can be 1. proper names (e.g., *Dārayavaḥu-*, *Vištāspa-*) or 2. common nouns (appellatives, e.g., *xšāyaθiya-* “king,” *puça-* “son”). Many adjectives can be used as nouns as well, e.g., *Pārsa-* “a Persian, Persian” (e.g., army), or “Persia.”

There is no definite or indefinite article. Sometimes the numeral “one,” *ī*, *aiva-*, is used in the meaning of “a single” or “a certain (one).” See also lesson 12 on the “specifying” or “delimiting” function of relative clauses.

Nouns, adjectives, and pronouns can be of three genders (masculine = masc., feminine = fem., neuter = neut.). There are three numbers (singular, dual, plural) and six cases (nominative, vocative, accusative, genitive-dative, instrumental-ablative, locative).

Nouns and adjectives are classed in vocalic and consonantic declensions. Vowel-declension nouns have a vowel before the ending (*ā*, *ī*, *ū*, *ai*, *au*), while consonant-declension nouns have a consonant before the ending (most common: *n*, *r*, *h*, but also *p*, *t*, *nt*, *d*, *θ*).

The stem vowel *a* of the *a*-declensions is often referred to as the “thematic vowel” and the *a*-declensions as “thematic declensions” vs. “athematic” declensions. The same terminology is used for verbs.

### NOUNS. GENDER.

The gender of a noun can sometimes be deduced from its grammatical form. Thus, *a*-stems are either masculine or neuter, while almost all *ā*-stems are feminine. The *i*- and *u*-stems, as well as consonant stems can be either masculine, neuter, or feminine. The gender of each word should therefore be learned together with the word itself.

In the vocabularies masculine nouns of all declensions and feminine nouns of the *ā*-declension will be unmarked, while all other nouns will be marked as feminine (fem.) or neuter (neut.)

**NOUNS. THE NOMINATIVE SINGULAR. VOWEL STEMS.**

The texts in lessons 1-2 contain examples of the *a*-, *ā*-, *i*- and *u*-declensions. The *a*-declension contains masculine and neuter nouns. There are two *ā*-declensions, the common feminine *ā*-declension and the masculine *ā*-declension, which contains a few proper names, among them the name of the god *Ahuramazdā*-. The *i*- and *u*-declensions contain masculine, feminine, or neuter nouns. The nominative singular endings are:

<i>a</i> -declension		<i>ā</i> -declension		<i>i</i> -declension		<i>u</i> -declension		<i>dahayu-</i>
masc.	neut.	masc.	fem.	masc., fem.	neut.	masc.	neut.	
- <i>a<sup>h</sup></i>	- <i>am</i>	- <i>ā<sup>h</sup></i>	- <i>ā</i>	- <i>iš</i>	(-iy)	- <i>uš</i>	- <i>uv</i>	<i>dahayāuš</i>

Examples: *arīka<sup>h</sup>* “disloyal,” *rāstam* “straight,” *Ahuramazdā<sup>h</sup>*, *Aθurā*, *pastiš* “foot-soldier,” *Dārayava<sup>h</sup>uš* “Darius,” *paruv* “much.” There are no examples of the nom. of neut. *i*-stems in OPers.

The masc. *a*-, *ā*-, *i*-, and *u*-declensions originally (= in Indo-European) had the same ending in the nominative singular, namely *-s*, as in Greek *theós* “god,” *pístis* “faith” and *ikhthús* “fish,” Latin *dominus*, *civis*, *sinus*, but in the Indo-Iranian mother language *s* became *h* after *a* and *ā* but *š* after *i* or *u* according to the “ruki” rule, which states that *s* became *š* after *r*, *u*, *k* [Iran. *x*], *i*. The Indo-Iranian forms were therefore *-ah*, *-āh* and *-iš*, *-uš*. In Old Persian the final *-h* was lost.

Masculine *ā*-stems:

There are only three masculine *ā*-stems: *Ahuramazdā*-, *Xšayaaršā*- (or *Xšayāršā*-) “Xerxes,” and *Artaxšaça*- “Artaxerxes.” Of these three *Xšayaaršā*- was originally an *n*-stem, *Xšayaaršan*-, and *Artaxšaça*- an *a*-stem. The nom. *Aspacanā<sup>h</sup>* “Aspathines” is from an *h*-stem (*Aspacanah*-, see lesson 8).

Adjectives:

Most Old Persian adjectives are declined according to the *a*-declension in the masculine and neuter. Feminine forms of adjectives of the *a*-declension are usually declined according to the *ā*-declension (exceptionally according to the *ī*-declension).

There are a few *i*- and *u*-stem adjectives.

The fem. noun *dahayu-* is properly an *au*-stem.

Neuter:

Neuter nouns take no ending in the nominative and accusative singular, except in the *a*-declension, where the ending is *-am*.

Note the use of neuter adjectives as nouns: *hašiyam* “something true,” *duruxtam* “something spoken as a lie,” *rāstam* “something straight, what is right,” *paruv* “much,” or adverbs: *vasiy* “greatly, mightily.”

*dahayau-*:

The feminine *au*-stem *dahayau-* has the nom. sing. *dahayāuš*.

**SYNTAX. NOMINATIVE. 1.**

The nominative is used:

1. To name sth., e.g., the person in the picture the inscription accompanies, hence the name “nominative”:

*Aspacanā vaçabara* “(This is) Aspathines, the mace-bearer(?)” (DNd)

## LESSON 2

2. As the subject of a verb: intransitive (e.g., “I am, I go”), transitive (e.g., “I do”), or passive (e.g., “I am called”):

*adam xšāyaθiya amiy* “I am king.”

3. As the predicate noun or adjective of the verb “to be” and some other verbs (e.g., “to seem,” “to be called”). The verb “to be” in the present is frequently omitted (always, but not exclusively, in the 3rd sing. present). Clauses with a subject and predicate noun or adjective but without a verb are called “nominal clauses” or “noun clauses.”

*adam xšāyaθiya amiy* “I am king.”  
*Auramazdā бага vazarka* “Ahuramazdā (is) a great god.”

In sentences such as “pron. + noun. + adj.” it must be decided from the context whether the sentence should be interpreted as “pron. (is) noun. + adj.” or “pron. + noun. (is) adj.” Examples:

*iyam kāra Pārsa* “This (is) the Persian people/army” or “This people/army (is) Persian.”  
*iyam aspa vazarka* “This (is) a great horse” or “This horse (is) great.”  
*iyam kāsaka kapautaka* “This glass (is) blue” or “This (is) blue glass.”  
*iyam hainā hamīçiyā* “This army (is) rebellious” or “This (is) a rebellious army.”  
*ima dātam rāstam* “This law (is) right” or “This (is) the right law.”  
*ima hašiyam naiy duruxtam* “This (is) true, not false.”  
*paruv naibam* “Much good” or “much (is) good.”

Note: *paruv* is the acc.-nom. neut. sing. of *paru-*, a *u*-stem.

4. As an apposition to another nominative:

*adam Dārayavauš xšāyaθiya vazarka ... Haxāmanišiya Pārsa ... Ariya Ariya-ciça* “I (am) Darius, great king, an Achaemenid, a Persian, an Aryan, of Aryan stock.” (DNa 8-15)

*hamaranakara amiy ušhamaranakara* “as a fighter I am a good fighter” (DNb 34)

*asabāra uvasabāra amiy θanuvaniya uθanuvaniya amiy utā pastiš utā asabāra* “as a horseman I am a good horseman, as an archer I am a good archer both on foot and on horse” (DNb 41-45);

In the last two sentences *hamaranakara* and *asabāra* are appositions to *adam* “I,” implied in *amiy* “(I) am.”

5. In the “nominative naming phrase,” see lesson 6.

6. Transitive verbs that take two accusative objects take two nominatives when passive (see lesson 11).

### NOUNS. THE GENITIVE.

The genitive sing. of nouns of the *a*-declension ends in *-ahayā*, e.g., *Vištāspahayā* “Hystaspes’s,” *Aršāmahayā* “Arsames’s,” *ariyahayā* “the Aryan’s.” See some examples in lesson 1, exercises 1.

Instead of final *-ā* we find short *-a* (*-ahaya*) in a few words (see lesson 5). Note also *avahayarādiy* “on account of that, therefore.”

## LESSON 2

### VOCABULARY 2

Masc. *a*-stems and fem. *ā*-stems are not marked as such in the vocabulary. In translations of the Achaemenid inscriptions Greek forms of personal and other names, known from the Greek historians (especially Herodotus), are commonly used.

Ariya-: Aryan	huv-arštika- (uv-ārštika-?): a good spear-thrower
Ariya-ciça-: of Aryan stock	huv-asabāra: a good rider
Ariyāramna-: Ariaramnes	hUvaxšātara-: Cyaxares (Median king)

## LESSON 3

### SCRIPT. SPECIAL CONVENTIONS. 2.

<u> ~ <u-va> = ū:

A short *u* or long *ū* before consonant is sometimes written <u-va> rather than just <u>, for instance:

short: <pa-ru-u-za-na->, <pa-ru-u-va-za-na->, or <pa-ru-u-va : za-na-> *paru-zana-*, *paruv-zana-*;

long: <u-ja> *Ūja-* or <u-va-ja> *Ūvja-*, <pa-ru-u-na-a-ma> *parūnām* or <pa-ru-u-va-na-a-ma> *parūvnām*;

short or long: <u-va-na-ra-> *hūvnara-* “talent, capability,” cf. OInd. *sūnara-* with long *ū*, but Pers. *hunar*, with short *u*.

<i> ~ <i-ya>:

There seem to be no instances of long *ī* written <i-ya> before consonants. Wherever we have doublets such as *niyašādayam* <na-i-ya-ša°> (Darius) “I placed” beside *nīšādayam* <na-i-ša°> (Xerxes) we are probably dealing with the historical development of *-iya-* > *-ī-*. Note also that older *\*mariyaka-* has already become *marīka-* “young man” in the inscriptions of Darius. Similarly <pa-ra-i-ya-na> is probably for *parīyana-* < *\*pariy-ayana-* “behavior.”<sup>5</sup>

In a late inscription (Artaxerxes I) we have <sa-i-ya-ma-ma> “silver,” probably for *sēmam* < Greek *ásēmos*.

### NOUNS AND ADJECTIVES. WORD FORMATION.

Nouns and adjectives can be

Underived nouns and adjectives:

1. “underived” (from a historical perspective these are also sometimes derived, but there is no word in Old Iranian or Indo-Iranian from which they can be said to be derived), e.g.,

*kāra-* “people, army,” *puça-* “son.”

Derived nouns and adjectives:

2. “derived” by means of an ending (the form from which they are derived may not actually be attested in Old Persian; words not attested are indicated by an asterisk \*), e.g.,

ending

-a- *drauga-* “lie, the Lie” < √draug-/drauj.<sup>6</sup> “to lie”;

-ana- *draujana-* “full of lies, lying” < √draug-/drauj “to lie”;

-aina- *kāsakaina-* “made of glass” < *kāsaka-* “glass,” *aθa<sup>n</sup>gaina-* “made of stone” < *aθa<sup>n</sup>ga-* “stone” (cf. Mod. Pers. *sang*);

-iya- *Aθuriya-* “Assyrian” < *Aθurā-* “Assyria,” *Haxāmanišiya-* “Achaemenid” < *Haxāmaniša-* “Achaemenes,” *θanuvaniya-* “connected with/using a bow, archer” < *\*θanuvan-* “bow,” *xšāyaθiya-* “king” < *\*xšayaθa-* “the wielding of power” < √xšay “to be in power,” *māniya-* “\*household” < *\*māna-* “house” (YAv. *nmāna-*); note that nouns in *-ka-* change the *k* > *c*:

*Maciya-* < *Maka-* “Makran,” *Ākaufaciya-* “mountain-dwellers” < *\*Ākaufaka-*.

-ka- *vazarka-* < *\*vazar* “greatness,” cf. *vašnā* “by the greatness (of Ahuramazdā)”; *arštika-* (or *ārštika-*) < *\*aršti-* “spear” (YAv. *aršti-*); *marīka-* “young man” < *\*mariya-* (YAv. *mairiia-*);

-man- *tauman-* “strength” < √tau “to be able, powerful.”

<sup>5</sup> Suggested by Sims-Williams, 1981.

<sup>6</sup> The √ sign refers to the “root” of a verb, that is, the basic consonant and vowel combination of the word. Roots are only found in grammars.

## LESSON 3

A special class of “derived” nouns are those that are identical with the word they are derived from, e.g., *Pārsa-* “Persian” < *Pārsa-* “Persia.”

### Compounds:

3. compounds, e.g.,

adjective + noun: *tigra-xauda-* “with pointed hat” < *tigrā- xaudā-* “pointed hat”; *ariya-ciça-* “of Aryan stock” < *ariya- ciça-* “Aryan stock”;  
 noun + verbal element: *asa-bāra-* “on horseback” < *asa-* “horse” + *-bāra-* “carried”; *hamarana-kara-* “battle-fighting” < *hamarana-* “battle” + *-kara-* “doing”;  
 prefix + noun: *huv-asa-* “having good horses” < \**hu-* “good” + *asa-*; *huv-asabāra-* “good horseman” < \**hu-* + *asabāra-*; *pati-kara-* < \**pati-kar-* “imitate(?)” > “image”;  
 verb + noun: *Dāraya-vahu-* < *dāraya-* “to hold” + *vahu-* “sth. good.”

Nouns can be derived from adjectives and adjectives from nouns. Compounds as well as their individual elements can be all kinds of words (nouns, adjectives, adverbs, and other compounds). Compounds are also declined as single words, e.g., *ariyam ciçam*, but *ariya-ciçam*. More in lesson 8.

Adjectives can also be used as nouns, e.g., *paruv naibam* “much (that is) good,” where *paruv* is the neut. sing. of *paru-* “much.”

### NOUNS. NOMINATIVE PLURAL.

The nominative plural of *a-* and *ā-*stems ends in *-ā*. Some masculine nouns and pronouns of the *a-* declension have the ending *-āha<sup>7</sup>* in the nominative plural.

<i>a-</i> declension		<i>ā-</i> declension	<i>dahayu-</i>
masc.	neut.	fem.	
<i>-ā, -āha<sup>h</sup></i>	<i>-ā</i>	<i>-ā<sup>h</sup></i>	<i>dahayāva<sup>h</sup></i>

Examples: masc. *Haxāmanišiyā* “Achaemenids,” neut. *āyadanā* “temples,” *stūnā<sup>h</sup>* “columns.”

The ending *-āha* is found only in the following expression:

*aniyāha bagāha tayaiy hatiy* “the other gods who are” (DB 4.61 and 63)<sup>8</sup>

### PRONOUNS. PERSONAL PRONOUNS. FIRST PERSON.

The 1st-person pronouns are nom. *adam* “I” and *vayam* “we.” In Old Persian these pronouns are rarely omitted.

*adam Dārayavauš xšāyaθiya vazarka* “I (am) Darius, the great king.” (DB 1.1)

*vayam Haxāmanišiyā ... vayam xšāyaθiyā amahay* “We Achaemenids ... We are kings” (DB 1.7, 10-11 = DBa 10-12, 17-18)

### PRONOUNS. SPECIAL FORMS.

Pronouns are mostly declined like adjectives except for a few typical “pronominal” forms. Thus the neut. nom.-acc. sing. has no final *-m* and the masc. nom. plur. normally ends in *-aiy*.

<sup>7</sup> = Avestan *-āghō*, Sanskrit *-āsaḥ*.

<sup>8</sup> Akkad. DINGIR.MEŠ gabbi “all the gods.”

**PRONOUNS. DEMONSTRATIVE PRONOUNS. NEAR-DEIXIS.**

The nom. forms of the near-deictic<sup>9</sup> demonstrative pronoun *ima-* “this” are:

	masc.	fem.	neut.
Sing.	<i>iyam</i>	<i>iyam</i>	<i>ima</i>
Plur.	<i>imaiy</i>	<i>imā</i>	<i>imā</i>

***iyam*** *asa naiba* “This horse (is) good.”

***imaiy*** *martiyā šiyātā* “These men (are) happy.”

***iyam*** *arštiš tigrā* “This spear (is) pointed.”

***imā*** *xaudā tigrā* “These hats (are) pointed.”

***ima*** *dātam rāstam* “This law (is) right.”

***imā*** *xšačā uvaspā* “These empires have good horses.”

Note that in sentences such as *iyam Sakā tigraxaudā* “This (is) the Sakas with pointed hats.” (DN XV) and *iyam Maciyā* “This (is) the Makranians” (DN XXIX), *iyam* probably agrees with an unexpressed *patikara* (masc.) “picture.”

**ADJECTIVES. PRONOMINAL ADJECTIVES.**

Pronominal adjectives are a few adjectives which take some “pronominal” forms, e.g., *visa-* “all” and *aniya-* “other.” The nom. forms of *aniya-* “other” are:

	masc.	fem.	neut.
Sing.	<i>aniya</i>	<i>aniyā</i>	<i>aniya, aniyaš-ca</i>
Plur.	<i>aniyaiy</i>	<i>aniyā</i>	

*baga* ***aniya*** *naiy astiy* “There is no other god.”

*paruv* ***aniya*** *astiy kartaṃ* “There is much other (that has been) done.”

*paruv* ***aniyašcā*** *astiy kartaṃ* “There is much other, too, (that has been) done.”

*bagā* ***aniyaiy*** *hatiy* “There are other gods.”

**VERBS. “TO BE.”**

The verb “to be” has two main uses: 1. to denote existence (English “there is”); and 2. to connect a predicate to a subject (to say that somebody or something *is* somebody or something). No. 1 is sometimes referred to as the “existential verb” (Latin *verbum existentiae*) and no. 2 as the “copula” (connector). The 3rd sing. *astiy* is only used as existential verb (“there is”), but is rare. Note the following forms of Old Persian “to be” (√ah):

<sup>9</sup> “deictic” means that it points to sth. near or far.

## LESSON 3

- 5 The Sakas wearing pointed hats have been distinguished Aryans from old.

## LESSON 4

### SCRIPT. SPECIAL CONVENTIONS. 3.

#### Consonant + v or y:

The groups “consonant + v or y” are always written *uv* <Cu-u-va> or <Ca-u-va> and *iy* <Ci-i-ya> or <Ca-i-ya>, with the exception of after *h*, as explained in lesson 2. Examples:

<pa-ru-u-vi-i-ya-ta>	<i>paruviyata</i>	<ja-di-i-ya-a-mi-ya>	<i>jadiyāmiy</i>
<i-sa-u-va-a>	<i>isuvā</i>	<ma-ra-ta-i-ya>	<i>martiya</i>

At the end of a word *u* and *i* are always written *uv* and *iy* (except after *h*) Examples:

<pa-ru-u-va>	<i>paruv</i>	<da-a-ra-ya-a-mi-i-ya>	<i>dārayāmiy</i>
<ha-u-va>	<i>hauv</i>	<da-a-ra-ya-ta-i-ya>	<i>dārayatiy</i>

Note that, when final *-uv* or *-auv* or *-iy* or *-aiy* are followed by an enclitic pronoun or particle, the final letter is not written. Thus <na-i-ya> *naiy* “not” becomes <na-i-> *nai-* in *nai-patiy* “nor,” and *hauv* becomes *hau-* before the pronoun *-maiy* “me, my”: <ha-u-ma-i-ya> *hau-maiy*. Often this rule is not observed, so we also find *hauvmaiy*, etc.

The spelling of final *-auv* and *-aiy* also influenced internal *-av-* and *-ay-*, which are sometimes spelled *-auv-* and *-aiy-*, e.g.: *dāraya-* ~ *dārayi-*, *bava-* ~ *bauva-*.

### VERB. THE VERBAL SYSTEM.

The verb in Old Persian, as in other languages, is a multidimensional system.

It has three “tenses”: present, past, and perfect. The past tense is mostly expressed by the imperfect (English *he was, he did, he went*). The perfect is formed by the perfect participle in *-ta* plus the verb “to be” (similar to German *Ich bin gewesen* and French *je suis allé*).

There are several “moods”: indicative (English *he sleeps*), subjunctive (English (*lest*) *he sleep*), imperative (English *sleep!*), optative (English *he would sleep, wishes to sleep*), and injunctive.

There are two “voices”: active and middle (cf. Latin *amo* “I love” but *sequor* “I follow”).

There is a passive formation in *-iya-*.

Note that the word “active” is used in two different ways: “active” *form* or “active” *meaning*. “Active” form means that the verb takes “active” endings, rather than “middle” endings. A verb can have “middle” forms but still have “active” meaning, that is, take a direct object (transitive), for instance (see lesson 5).

Like the nouns, the verb stems are classed in vocalic and consonantic and thematic and athematic, conjugations. Thematic verbs (= stems ending in *-a*) are “regular,” while the athematic verbs are “irregular.” Most endings are the same in the two classes, but in the athematic conjugations changes frequently take place as a result of the various historical developments of the combinations of the final consonants of the stem with the initial consonants of the endings.

### VERBS. THE PRESENT INDICATIVE ACTIVE.

The present indicative active has the following endings in the 1st and 3rd persons (the 2nd person is not attested).

In the examples below note the treatment of the following consonant groups.

$h + m > hm$
$h + t > st$ (in <i>astiy</i> )
$n + t > nt$

LESSON 4

Pres. stems: *ah-/h-* “to be,” *jan-* “to strike (down), crush,” *kunau-* “to make,” *dāraya-* “to hold,” *jadiya-* “to implore, ask for,” *θaha-* “to announce, say,” *θahaya-* “to be announced (as), be called,” *bara-* “to carry”:

Endings:		
	athem.	them.
Sing.		
1	- <i>miy</i>	- <i>āmiy</i>
2	- <i>hay</i>	
3	- <i>tiy</i>	- <i>atiy</i>
Plur.		
1	- <i>mahay</i>	- <i>āmahay</i>
3	- <i>a<sup>n</sup>tiy</i>	- <i>a<sup>n</sup>tiy</i>

Examples:	
athem.	them.
<i>a<sup>h</sup>miy</i>	<i>dārayāmiy, jadiyāmiy</i>
<i>ahay</i>	
<i>astiy, ja<sup>n</sup>tiy,</i> <i>kunautiy</i>	<i>θātiy (&lt; *θahatiy), dārayatiy</i>
<i>a<sup>h</sup>mahay</i>	<i>θahayāmahay</i>
<i>ha<sup>n</sup>tiy</i>	<i>bara<sup>n</sup>tiy</i>

**VERBS. THE IMPERFECT.**

The imperfect is by far the most common tense in the Old Persian inscriptions. Some frequent forms are: *āha* “he was, they were,” *abava* “he became, they became,” *adurujiya* “he lied, they lied,” *aθaha* “he said, they said,” *akunavam* “I made,” *akunauš* “he made,” *frābara* “he gave, they gave.” More in lesson 6.

**NOUNS. THE ACCUSATIVE.**

The accusative singular ending is *-m* in all masculine and feminine nouns. The accusative of neuter nouns is identical with the nominative in both the singular and the plural.

The *-m* is added directly to the final vowel of the stem in the *a-*, *ā-*, *i-*, and *u-*declensions; consonant stems take the ending *-am* (see lesson 8).

The accusative singular of *dahayu-* is *dahayāum* or *dahayāvam*.

Few forms of the accusative plural are known. The *a-* and *ā-*declensions both have *-ā*, which reflects three different original endings: masc. probably *-ā*,<sup>10</sup> fem. *-ā<sup>h</sup>*, neut. *-ā*. The endings are:

	<i>a</i> -stems		<i>ā</i> -stems	<i>i</i> -stems	<i>u</i> -stems	<i>dahayu-</i>
	masc.	neut.				
Sing.	- <i>am</i>	- <i>am</i>	- <i>ām</i>	- <i>im</i>	- <i>um</i>	<i>dahayāum, dahayāvam</i>
Plur.	- <i>ā</i>	- <i>ā</i>	- <i>ā<sup>h</sup></i>	- <i>īš(?)</i>		<i>dahayāva</i>

Examples:

*a-* and *ā-*stems:

	masc.		fem.	neut.
Sing.				
nom.	<i>vazarka</i>		<i>umartiyā</i>	<i>vazarkam</i>
acc.	<i>vazarkam</i>	<i>Ahuramazdā</i>	<i>tigrām</i>	=

<sup>10</sup> According to Oswald Szemerényi (*Scripta Minora*. Vol. IV. Innsbruck: Innsbrucker Beiträge zur Sprachwissenschaft, 1991: 1956-60), the ending may have had a final, unwritten, *-n*, which became *-m* before a labial in *abiy sakām pasāva* (DB 5.21-22); since *sakām* is the last word of a sentence and *pasāva* begins, not only a new sentence, but a new section of the inscription, this hypothesis remains weak, however.

LESSON 4

Plur.				
nom.	<i>āmātā, aniyāha<sup>h</sup></i>	-	<i>hamiçiyā<sup>h</sup></i>	<i>θakatā</i>
acc.	<i>martiyā</i>	-	=	=

acc.	<i>šiyātim</i>	<i>dārayava<sup>h</sup>um</i>	=
Plur.	(no examples)		

Note: there are no plural forms of *paru-*. Use *vasiy* to translate “many.”

**NOUNS. THE *Ū*-STEM *TANŪ-*.**

The *ū*-stem *tanū-* fem. “body, self” has the nom. *tanūš*, acc. *tanūm*. Note that the Old Persian orthography does not allow us to verify whether the *ū* was in fact long or whether it had been shortened, so that the forms coincided with those of the *u*-stems.

**PRONOUNS. THE ACCUSATIVE.**

The accusative of *adam* “I” is *mām* “me,” enclitic *-mā* (*-mām*).

Note: *enclitic* means that a word is unstressed and can not stand alone, but must be attached to the preceding word. An enclitic word can therefore never stand at the beginning of a clause. Two enclitics are also possible (*mā-taya-mām* “not-that-me” = “that ... not me”).

The accusative forms of the demonstrative pronoun *ima-* “this” are:

	masc.	fem.	neut.
Sing.			
acc.	<i>imam</i>	<i>imām</i>	<i>ima</i>
Plur.			
acc.	<i>imaiy</i>	<i>imā</i>	<i>imā</i>

**PRONOUNS. DEMONSTRATIVE PRONOUNS. FAR-DEIXIS.**

The nom. and acc. forms of the demonstrative *hauv/ava-* “that” are:

	masc.	fem.	neut.
Sing.			
nom.	<i>hauv</i>	<i>hauv</i>	
acc.	<i>avam</i>	<i>avām</i>	<i>ava, avašciy</i>
Plur.			
nom.-acc.	<i>avaiy</i>	* <i>avā</i>	<i>avā</i>

**PRONOUNS. RELATIVE PRONOUNS.**

The nom. and acc. forms of the relative pronoun *haya-/taya-* are:

	masc.	fem.	neut.
<b>Sing.</b>			
nom.	<i>haya</i>	<i>hayā</i>	<i>taya</i>
acc.	<i>tayam</i>	<i>tayām</i>	<i>taya</i>
<b>Plur.</b>			
nom.-acc.	<i>tayaiy</i>	<i>tayā (tayaiy)</i>	<i>tayā</i>

**SYNTAX. RELATIVE CLAUSES.**

Old Persian relative clauses will be discussed in detail in lesson 12. Many Old Persian relative clauses are of the regular English type, but some are also of an unfamiliar type. For the moment note the relative clause *hayā amāxam taumā* “the family which is ours,” where, according to English usage, we would expect \**taumā hayā amāxam*. We see that what we call the antecedent (the word the relative pronoun refers to, that is, the word the relative clause modifies) instead of coming before the relative clause, has been “pulled” into the clause itself: “which family is ours.”

**SYNTAX. ACCUSATIVE. 1.**

The accusative is used in the following functions in Old Persian:

1. direct object of a transitive verb:

*imām dahayāum* (or *dahayāvam*) *vaināmiy* “I see this land.”

*Sakā tayaiy xaudām tigrām baratiy* “the Scythians who wear a pointed hat” (DB 5.22)

*Aspacanā vaçabara isuvām dārayatiy* “Aspathines the mace-bearer(?) holds the battle-axe(?)” (DNd)

*aniya aniyam jatiy* “They strike one another.” (lit.: “(one) strikes the other”)

*āyadanā vikatiy* “He destroys the temples.”

*θātiy Xšayaqršā xšāyaθiya vašnā Auramazdāhā Dārayavauš imam duvarθim visadahayum akunauš*  
 “King Xerxes announces: ‘By the greatness of Ahuramazdā Darius made this gate of all nations.’”  
 (cf. XPa 11-13)

*θātiy Dārayavauš Xš ima xšaçam taya adam dārayāmiy* “King Darius announces: ‘This (is) the empire which I hold.’” (DPH 4-5 = DH 3-4)

2. two accusative objects are found with verbs signifying “to create sb. as sth., to make sb. sth., to ask sb. for sth., to deprive sb. of sth. or to take sth. from sb., to do sth. to sb.”:

*Auramazdā mām Dārayavaum xšāyaθiyam akunauš hau-mā draujanam naiy akunauš* “Ahuramazdā made me, Darius, king. He did not make me a liar.”

*aita adam yānam jadiyāmiy Auramazdām* “This I ask Ahuramazdā (as) a favor” (DPd 20-21)

*adam avam Gaumātam xšaçam adīnam* “I took the power from that Gaumāta.”

*aniya aniyam miθa akunauš* “They did wrong to one another.”

## LESSON 4

Note the so-called *figura etymologica* (see lesson 13):

**avam ubartam abaram** “I treated him well,” literally, “I carried him well-carried.”

3. to express the goal of motion (not with persons):

*avam frāišayam Arminam* “him I sent to Armenia,”

but:

**abiy Vištāspam ašiyava** “he went (over) to Hystaspes.”

4. to indicate measure: “how much, how many?”

*XL arašnīš baršnā ... XX arašnīš baršnā* “forty cubits in depth, twenty cubits in depth” (DSf 26-27)

5. as the direct object of agent nouns and in impersonal verbal and nominal constructions, see lesson 6;

6. several pre- and/or postpositions govern the accusative: *antar* “in(side),” *abiy* “to,” *upā* “under (the reign of),” *upariy* “on(to),” *tara<sup>h</sup>* “through, via,” *paišiyā* “before, in the presence of,” *patiš* “against,” *para<sup>h</sup>* “beyond,” *pariy* “about, concerning,” *pasā* “after.” Examples:

**atar imā dahayāva** “among these lands”

**abiy Vištāspam ašiyava** “he went (over) to Hystaspes.”

**upā Artaxšačām** “under Artaxerxes”

*Auramazdā ... xraθum utā aruvastam upariy Dārayavaum xšāyaθiyam niyasaya* “Ahuramazdā ... bestowed reason and physical ability upon King Darius.” (DNb1-5)

**paišiyā mām** “before me, in my presence”

*martiya taya patiy martiyam θātiy* “that which a man says against a(nother) man.”

**patiy duvitīyam** “for the second (time).”

*hauv ašiyava patiš Dādaršim* “He went against Dādarši.”

**pariy Gaumātam tayam magum** “about Gaumāta the magian.”

*Dārayavauš ... pasā tanūm mām maθištam akunauš* “Darius ... made me greatest after (him)self.” (XPf 30-32)

7. the apposition to a noun in the accusative is also in the accusative, as in *mām Dārayavaum* “me, Darius” in no. 2 above.

### SYNTAX. PRESENT TENSE. 1.

The present tense is used as in English.

**θātiy Dārayavauš Xš ima xšačam taya adam dārayāmiy** “King Darius announces: ‘This (is) the empire which I hold.’” (DPh 4-5 = DH 3-4)

*aita adam yānam jadiyāmiy Auramazdām* “This I ask Ahuramazdā (as) a favor” (DPd 20-21)

*ima patimaiy aruvastam tayamaiy tanūš tāvayatiy* “And this, too, is my ability of which my body is capable.” (DNb 32-34)

## LESSON 5

### SCRIPT. SPECIAL CONVENTIONS. 4.

#### Final $-ā \sim -a$ :

Instead of final  $-ā$  we find only  $-a$  (no vowel sign) in a few words, notably in the  $a$ -stem gen.-dat. sing. ending:  $-ahaya \sim -ahayā$ , always in the dating formula ( $\text{Ā}çiyādiyahaya māhayā$  “in the month of  $\text{Ā}$ .”), occasionally in the “son of” formula ( $\text{Nabunaitahaya puça}$  “the son of Nabonides”), and occasionally elsewhere.

The word  $kā$  “who(ever)” is written  $\text{𐎧𐎠𐎡}$  <ka-a> in DB but  $\text{𐎧𐎠}$  <ka-ǎ> in XPh, where the second sign is “a semi-a,” i.e., an <a> with only the top horizontal and the middle vertical wedge. This spelling may indicate that the word was  $ka$  with short  $a$ , which by the rules of Old Persian should be written only  $\text{𐎧}$  <ka>, which, however, was probably felt to be too small a word.

#### $-ā$ + enclitics:

Before enclitics, original short  $-a$  may reappear:  $manā + cā > manacā$ ;  $avahayā + rādiy > avahayarādiy$  (see also lesson 12).

#### <a-i> = ai:

An “extra” <a> is twice written in the gen.-dat. (see below) sing ending  $-aiš$  <Ca-a-i-ša>, apparently to distinguish it from the nom. ending  $-iš$  <Ca-i-ša>: <ca-i-ša-pa || a-i-ša> (at line break)  $\text{Cišpa-aiš}$ ; <ca-i-ca-xa-ra-a-i-ša> =  $\text{Cicaxraiš}$ .

### SCRIPT. LOGOGRAMS.

When a word is expressed by a logogram but also has an oblique<sup>11</sup> case ending, the case ending is attached to the logogram, as in  $\text{𐎧𐎠𐎡𐎠𐎠𐎠𐎠} Xšhayā = xšāyaθiyahayā$ ,  $\text{𐎧𐎠𐎡𐎠𐎠𐎠𐎠𐎠} Xšyānām = xšāyaθiyānām$ ,  $\text{𐎧𐎠𐎡𐎠𐎠𐎠𐎠} DH_1nām = dahayūnām$ .

Note: The Old Persian logograms were not used for DB.

### SCRIPT. FINAL CONSONANTS.

Only three consonants (other than  $y$  and  $v$ ) are allowed at the end of words in Old Persian writing, namely,  $m$ ,  $r$ ,  $š$ . There are no examples of two consonants in final position (e.g.,  $-fš$ ,  $-xš$ ). Other consonants that were there in older Iranian are not written, and we cannot be sure whether they were pronounced at all.

Final consonants have left a trace in Old Persian, however, as they are reflected in the spelling of final  $-a$  or  $-ā$  in the following manner:

- older final  $-a$  and  $-ā$  (not followed by a consonant) are  $-ā$  in Old Persian;
- older final  $-aC$  (short  $a$  before a consonant other than  $m$ ) is short  $-a$  in Old Persian;
- older final  $-āC$  (long  $ā$  before a consonant other than  $m$ ) is  $-ā$  in Old Persian.

Old Persian  $-a$  therefore represents older  $-ah$ ,  $-at$ , or  $-an$ , while Old Persian  $-ā$  represents older  $-a$  or  $-ā$  or  $-āC$  ( $C \neq m$ ).

### SCRIPT. DOUBLE CONSONANTS.

Double consonants are usually simplified in Old Persian, e.g.,  $ucāram-maiy$  “easy for me” is written <u-ca-a-ra-ma-i-ya>, probably  $ucāramaiy$ ; but we also find  $hakaram-maiy$  “(if) once for me,” etc.

<sup>11</sup> A case other than the nominative.

**NOUNS. CONSONANT STEMS.**

The nom. sing. of *n*-stems, *r*-stems, and *t*-stems ends in *-ā*: *xšaçaṣpāvā* < *xšaçaṣpāvan-* “satrap”; *pitā* < *pitar-* “father,” *framātā* < *framātar-* “commander”; *napā* < *napat-* “grandson.” Acc. sing. forms include *framātāram*.

**NOUNS. THE GENITIVE-DATIVE.**

The endings of the OPers. genitive-dative (gen.-dat.) are the Old Iranian genitive forms. No old dative forms have survived. The endings of the declensions we have discussed so far are:

	<i>a</i> -stems masc.-neut.	<i>ā</i> -stems masc. fem.	<i>i</i> -stems	<i>u</i> -stems	<i>dahayu-</i>	
Sing.	<i>-ahayā</i>	<i>-āha<sup>h</sup>, -āhā, -ahā</i>	<i>-āyā<sup>h</sup></i>	<i>-aiš</i>	<i>-auš</i>	<i>dahayauš</i>
Plur.	<i>-ānām</i>		<i>-ānām</i>	-	<i>-ūnām</i>	<i>dahayūnām</i>

Examples:

	<i>a</i> -stems	<i>ā</i> -stems masc. fem.	<i>i</i> -stems	<i>u</i> -stems	
Sing.	<i>xšāyaθiyahayā</i>	<i>Ahuramazdāha<sup>h</sup></i> <i>[Xšayaar]šāha<sup>h</sup> (XH)</i>	<i>taumāyā<sup>h</sup></i>	<i>Cišpaiš</i>	<i>Dārayavahauš</i>
Plur.	<i>xšāyaθiyānām</i>		<i>vispazanānām</i>		<i>parūnām,</i> <i>dahayūnām</i>

The gen.-dat. of consonant stems ends in *-a<sup>h</sup>*, e.g., *θardah* < *θard-* “year.”

In some cons. stems case forms other than the nom. and acc. are formed from a modified stem, for instance *piçah* (< *\*piθrah* < *\*pitr-as*) < *pitar-*, where the *a* of the element *-tar-* has been lost. The “opposite” process is seen in acc. *framātāram*, where the *a* of *-tar-* has been lengthened. More about this phenomenon, called “Ablaut,” in lesson 10.

**NOUNS. DECLENSION OF A<sup>H</sup>URAMAZDĀ-**

The masc. *ā*-stem *A<sup>h</sup>uramazdā-* was originally a consonant stem ending in (Indo-Iranian) *\*h* (a laryngeal, different from Old Persian *h*, which is from Indo-Iranian *\*s*). The old *\*h*, which we will write *\*H*, was lost in both Indic and Iranian, but when followed by a consonant or at the end of the word it lengthened the preceding vowel. It was lost between two vowels, which were then contracted. The forms are:

nom.	<i>*A<sup>h</sup>urah mazdā<sup>h</sup>H</i>		> <i>A<sup>h</sup>ura-mazdā</i>
acc.	<i>*A<sup>h</sup>uram mazda<sup>h</sup>Ham</i>	> <i>*A<sup>h</sup>uram mazda<sup>h</sup>am</i>	> <i>A<sup>h</sup>ura-mazdām</i>
gen.	<i>*A<sup>h</sup>urahya mazda<sup>h</sup>Hah</i>	> <i>*A<sup>h</sup>urahya mazda<sup>h</sup>ah</i>	> <i>*A<sup>h</sup>ura-mazdā<sup>h</sup></i> > <i>A<sup>h</sup>ura-mazdāha<sup>h</sup></i> or <i>A<sup>h</sup>ura-mazdāhā</i>

Because the gen.-dat. became identical with the nominative, the original ending was repeated (> *A<sup>h</sup>ura-mazdāh-ā<sup>h</sup>*) or the gen.-dat. ending *-a<sup>h</sup>* of the consonant stems was attached to the original form (> *A<sup>h</sup>ura-mazdāh-a<sup>h</sup>*). The form *Auramazdahā* is also found.

**PRONOUNS. GENITIVE-DATIVE.**

The gen.-dat. forms of the 1st and 3rd person personal pronouns are:

	<i>adam</i> “I”	<i>vayam</i> “we”	“he, she”	“they”
gen.-dat.	<i>manā, -mai</i>	<i>amāxam</i>	<i>-šaiy</i>	<i>-šām</i>

The enclitic gen.-dat. can be attached to conjunctions, adverbs, or nouns, e.g., *dahayāuš-mai* “my country.”

The forms of the demonstrative and relative pronouns, as well as the pronominal adjectives (not many forms are attested) are:

	<i>iyam, ima-</i>	<i>iyam, imā-</i>	<i>hauv, ava-</i>	<i>haya, taya-</i>	<i>hama-</i>
	masc.-neut.	fem.	masc.-neut.	masc.-neut.	fem.
Sing.	-	<i>ahayāyā<sup>h</sup></i>	<i>avahayā</i>	-	<i>hamahayāyā<sup>h</sup></i>
Plur.	<i>imaišām</i>	-	<i>avaišām</i>	<i>tayaišām</i>	-

Note the following typically “pronominal” endings:

The fem. gen.-dat. *-ahayāyā<sup>h</sup>*.

The gen.-dat. plur. masc.-neut. *-aišām*.

**SYNTAX. GENITIVE-DATIVE.**

The functions of the OPers. gen.-dat. incorporate the functions of the OIran. gen. and dat.

**Genitive functions.**

1. The first main function of the genitive is “adnominal,” that is, to modify or add information about a noun. The main adnominal function is

- a. possessive genitive and variants thereof (“the man’s house, the man’s son”); note especially the use of the gen.-dat. + “to be” which corresponds to Eng. “to have”: “mine is a son” = “I have a son”:

*mayuxa kāsakaina Dārayavahauš XŠhayā viθiyā karta* “(This is) a glass doorknob made in the house of king Darius.” (DPi)

*adam Dārayavauš xšāyathiya vazarka ... Vištāspahayā puça Aršāmahayā napā Haxāmanišiya θātiy Dārayavauš xšāyathiya manā pitā Vištāspa Vištāspahayā pitā Aršāma Aršāmahayā pitā Ariyāramna Ariyāramnahayā pitā Cišpiš Cišpaiš pitā Haxāmaniša* “I am Darius, great king, ... son of Hystaspes, grandson of Arsames, an Achaemenid. King Darius announces: ‘My father was Hystaspes. Hystaspes’ father was Arsames. Arsames’ father was Ariaramnes. Ariaramnes’ father was Teispes. Teispes’ father was Achaemenes.’”(DBa 1-8)

*Dārayavahauš puçā aniyaiçiy āhatā* (= *āha*) lit. “for Darius there were other sons, too,” that is, “Darius had other sons, too.” (XPf 28-29)

- b. subjective genitive:

There seem to be no examples in OPers. of the subjective genitive, as in English *man’s love of nature* < *man loves nature*.

c. objective genitive (“a commander of many” < “he commands many [dir. obj.]”).

*adam Dārayavauš xšāyaθiya vazarka xšāyaθiya xšāyaθiyānām xšāyaθiya dahayūnām vispazanānām* “I am the great King Darius, king of kings, king of lands of all kinds.” (DNa 8-11)

*adam Dārayavauš xšāyaθiya vazarka xšāyaθiya xšāyaθiyānām xšāyaθiya dahayūnām paruzanānām* “I am the great King Darius, king of kings, king of lands of many kinds.” (DE 11-16)

*adam Ahuramazdā Dārayavaum xšāyaθiyam akunavam aivam parūnām xšāyaθiyam aivam parūnām framātāram* “I Ahuramazdā made Darius king: one king over many, one commander of many.” (cf. DE 1-11)

2. The second main function of the genitive is “partitive,” which survives in OPers. in

a. expressions such as “king of kings,” “greatest of gods,” “one among many”:

*adam Dārayavauš xšāyaθiya vazarka xšāyaθiya xšāyaθiyānām* “I am Darius, great king, king of kings”

*θātiy Dārayavauš xšāyaθiya VIII manā taumāyā tayaiy paruvam xšāyaθiyā āha adam navama* “King Darius announces: ‘Eight of my family were kings before. I am the ninth.’” (DB 1.8-10)

*haruvahayāyā [BUyā] martiyam ...* “(Ahuramazdā chose me as his) man [among all men] of = in the whole earth” (DSf 16-17)

b. expressions of “time within which” (how long did it take?).

*ima taya adam akunavam vašnā Auramazdāha hamahayāyā θarda* “This which I did—by the greatness of Ahuramazdā—in one and the same year ...” (DB 4.3-5)

3. The gen.(-dat.) is governed by several pre- and postpositions (*anuv* “according to,” *nipadiy* “in pursuit of,” *pasā* (also with acc.) “after,” *rādiy* “from, on account of” (with passive, see lesson 11). Note especially *avahaya-rādiy* “for this (= the following) reason.”

*anuv \*hakartahayā* “according to (his) achievement.” (XPI 18)

*pasāva Vivāna ... \*nipadišaiy*<sup>12</sup> *ašiyava* “Then Vivāna went in pursuit of him.” (DB 3.73-74)

*kāra Pārsa pasā manā ašiyava Mādam* “The Persian army went after me to Media.” (DB 3.32-33)

4. The gen.-dat. is governed by certain verbs, among them verbs meaning “to rule, have power over”:

*θātiy Dārayavauš xšāyaθiya vašnā Auramazdāhā imā dahayāva tayā adam aqarḅāyam ... adamšām patiyaxšayaiy* “King Darius announces: ‘By the greatness of Ahuramazdā—these countries which I seized ...—I ruled over them’” (DNa 15-19)

<sup>12</sup> The word is covered by the scaffolding in the CII photo:  na-i-pa-di-[••••]i-ya: In a photo taken by Korean Television, I can make out  na-i-pa-di-ša-[i-ya••]i-ya:

**Dative functions.**

4. The main function of the dative is to express the “indirect object.” Indirect objects are found with transitive verbs, most often accompanying a direct object:

*iyam dahayāuš Pārša tayām manā Auramazdā frābara hayā naibā uvašpā umartiyā* “This (is) the land Persia, which Ahuramazdā gave me, which (is) good, has good horses, and has good men.” (DPd 6-9)

*haumaiy ima xšačam frābara taya vazarkam taya uvašam umartiyam* “He (=Ahuramazdā) gave me this empire, which (is) large, which has good horses, (and) which has good men.” (DSf 10-12)

5. The dative is used to express the person or thing for whose benefit or to whose disadvantage something happened (*dativus commodi* or *incommodi*). This dative is typically found with intransitive verbs.

*imā dahayāva tayā manā \*patiyāiša* “These (are) the lands which came to me.” (DB 1.13)

6. Appositions to words in the gen.-dat. are in the gen.-dat.

*mayuxa kāsakaina Dārayavahauš XŠhayā viθiyā karta* “(This is) a glass doorknob made in the house of Darius, the king.” (DPi)

*vašnā Auramazdāhā manacā Dārayavahauš xšāyaθiyahayā* “by the greatness of Auramazdā and me, King Darius” (DPd 9-11)

**VERBS. THE MIDDLE VOICE.**

Old Persian has preserved the middle voice. The endings of thematic verbs in the present singular are:

Sing.		
1	-aiy	maniyaiy
3	-ataiy	yadataiy

**SYNTAX. THE MIDDLE VOICE.**

Verbs can have active and/or middle forms. Some verbs have only active forms, some only middle forms, and some both active and middle forms. Only in the third group does the middle have a special function.

The functions of the middle are inherited from Indo-Iranian (and Indo-European). There are two:

1. it expresses the passive or
2. it describes the action as being performed in the interest of the subject (do something for oneself).

Intransitive verbs usually have only active or only middle forms, while transitive verbs can take both active and middle forms. If they do, then most often the distinction between the two forms is “active ~ passive,” more rarely the middle denotes that the action as being performed in the interest of the subject.

Examples:

1. Middle verbs without an active counterpart:

*θātiy Dārayavauš xšāyaθiya Auramazdāha ragam [v]arđiyaiy yaθā ima hašiyam naiy duruxtam adam akuna[vam hama]hayāyā θarda* “King Darius announces: ‘I \*swear by Ahuramazdā that this is true, not something said as a lie, (that) I did (it) in one and the same year.’” (DB 4.43-45)

*adakaiy fratara maniyaiy afuvāyā<sup>a</sup> yadiy vaināmiy hamičiyam yaθā yadiy naiy vaināmiy* “When I see something rebellious, then I feel myself farther beyond fear than when I do not see (it).” (DNb 38-40)

a. *afuvāyā* instr.-abl., see lesson 9. — Darius is saying that he likes a challenge.

## LESSON 6

### PHONOLOGY. VOWEL PHONEMES.

By the method of comparative Indo-Iranian linguistics we may posit two successive phonological stages for Old Persian:

Early stage			Late stage		
	a	ā		a	ā
i	ai	āi	i	ē	āi
ī			ī		
u	au	āu	u	ō	āu
ū			ū		
ɪ					

The phonemic opposition of /-a/ ~ /-ā/ in final position, leads one to expect a parallel opposition of /-i/ ~ /-ī/ and /-u/ ~ /-ū/. There is no concrete evidence for such an opposition however, as it is not expressed in the Old Persian writing system. As a matter of fact, final /-i/, /-ī/, /-iya/ and /-u/, /-ū/, /-uva/ are all written <-i-ya>, <-u-va>!

It is also not impossible that final short -a became a reduced vowel or was lost, that is <Ca> = /Cə/ or /C/, and that final -ā was written for a final vowel of irrelevant length, that is, <Ca-a> = /Cā/.

In interior position there is every reason to assume that the inherited quantitative oppositions /i/ ~ /ī/ and /u/ ~ /ū/ were maintained, as they were still phonemic in Middle Persian.<sup>14</sup> The spelling <u-va> for ū is never found with historically short u and may have been devised to distinguish between long and short u and ū.

The phoneme /ɪ/ may have merged with /ir/, /ur/ already in the the course of the history of Old Persian.

### NOUNS. NEUTER N-STEMS.

The nom.-acc. sing. of the neuter n-stem *cašman-* “eye” (Av. *cašman-*) is found in the phrase *utāšaiy I cašma avajam* “and I gouged out one eye of his.”

The n-stem *tauman-* “strength, power” appears to have nom.-acc. *taumā* in *anuv taumā (avanā)-šaiy* (XPI 28) “according to his powers/power,”<sup>15</sup> with the nom.-acc. plur. *taumani*<sup>o</sup> in expression *anuv taumani-šaiy* (DNb 25-26).

The n-stem *nāman-* is found only in the “naming phrase,” where *nāma/nāmā* “name” agrees with the noun named (see below).

### NOUNS. THE LOCATIVE.

The locative singular of a-stems ends in *-aiy*, e.g., *Pārsaiy* “in Persia,” that of consonant stems in *-iyā* (*viθiyā* “in the house”). More on this case in the next lesson.

### PRONOUNS. PERSONAL PRONOUNS. SECOND PERSON.

Only singular forms of the second-person personal pronoun “you” are attested:

	2nd person
nom.	<i>tuvam (tuva)</i>
acc.	<i>θuvām</i>
gen.-dat.	<i>-taiy</i>

The form *tuva* is uncertain. As it is followed by *kā* “whoever”: *tuva kā* “you who(ever),” it is possible that we should read *tuvā<sup>9</sup> kā* < \**tuvam kā* with simple assimilation of the final -m to the following k-. Note also that it matches the *apara* for *aparam* which follows it in the text, so it may be a simple misspelling. It

<sup>14</sup> Cf. MP. *bid* “again” vs. *bīm* “fear,” but “idol” vs. *būd* “was.”

<sup>15</sup> Mayrhofer and Schmitt prefer dual.

LESSON 6

is quite unlikely that it should be read *tūv* = Av. *tū*, which is the Old Avestan *enclitic* form of *tuuəm* = OPers. *tuvam*.

**VERBS. THE IMPERFECT.**

The imperfect is characterized by the “augment,” an *a-* that is prefixed to the stem. If the verb has a preverb, the augment comes between the preverb and the stem. The augment contracts with a preceding or following *a* or *ā*. Examples:

<i>a + C- &gt; aC-</i>	<i>a-bara-</i>	<i>&gt; abara-</i>
<i>a + a- &gt; ā-</i>	<i>a-ah-</i>	<i>&gt; āha-</i>
<i>a + ā-/ā-a- &gt; ā-</i>	<i>a-ā-i-/ā-a-i- (?)</i>	<i>&gt; āy-</i>
<i>-a + a + C- &gt; -āC-</i>	<i>ava-a-jan-</i>	<i>&gt; avājan-</i>
<i>-ā + a + C &gt; -āC</i>	<i>parā-a-bar-</i>	<i>&gt; parābar-</i>
<i>-i + a + Ca- &gt; -iyaC-</i>	<i>vi-a-taraya-</i>	<i>&gt; viyataraya-</i>
<i>-i + a + a- &gt; -iyā-</i>	<b><i>a-pari-a-ay-</i></b>	<i>&gt; apariyāy-</i>
<i>-i + a + ā- &gt; -iyā-</i>	<i>pati-a-ābar-</i>	<i>&gt; patiyābar-</i>

Irregularities include *a-pariyāy-* with an additional augment before the prefix; *hamātaxša-* (in DB 4.92 *hamā[t]axšatā*) beside *hamataxša-*.

The present stem *hašta-*, *hišta-* “stand” has imperfect stem *aišta-*, with loss of the *h*.

As we see, initial *ā-* in the imperfect can be from both *a + a-* and *a + ā-*. In cases such as *āiš* and *āya<sup>n</sup>tā* “he/they came” it is therefore impossible to determine on the basis of the form whether they are from *ay-* or *āy-* (< *ā-ay-*).

Note also that *ānaya* “he led (to)” can be *a-naya* or < *a-ānaya*, cf. Middle Persian *nay-* “to lead (away)” but *ānay-* “to lead (to),” and *ābariya* can be *a-bariya* or < *a-ābariya*, cf. *patiy-ābara* < *patiy-ā-bar-* and Middle Persian *bar-* “to bring/take (away)” but *āwar-* “to bring/take (to).”

The sequence *-iya-* was contracted to *-ī-* in later Old Persian, *abiyajāvayam* “I added” > *abījāvayam*.

The imperfect is formed with so-called secondary endings, which mainly differ from the primary endings of the present tense in not having a final *-iy*. The endings are (no 2nd-person forms are attested):

athematic		thematic	athematic		thematic
Active					
Sing.					
1	-am	-am	<i>āham, avājanam, akunavam</i>		<i>ašiyavam</i>

3	-a <sup>n</sup> tā	-a <sup>n</sup> tā	<i>āhan<sup>tā</sup>, āyan<sup>tā</sup>, akunava<sup>n</sup>tā</i>		<i>agauba<sup>n</sup>tā</i>

When the stem ended in a consonant, as in *kan-*, *jan-*, the entire final consonant cluster was lost: *\*ajant* > *aja<sup>n</sup>*, *\*vīyakant* > *vīyaka<sup>n</sup>*.

The 3rd plural is written *-an* once (*abaran* XPh 17).

Note the irregular changes in the imperfect of √kar: *akunau-*, *akunava-*, *aku<sup>n</sup>-*.

The imperfect *āha* “he was” is for the original *\*ā(s)* < *\*a-as-t*, on the pattern of the thematic verbs; note the morphological (grammatical) “proportion”:

$abara^n : abara^t = \bar{a}ha^n : X \Rightarrow X = \bar{a}ha^t$

The middle form  $\bar{a}ha^{nt\bar{a}}$  “they were” does not seem to differ in meaning from  $\bar{a}ha^n$ .

The endings of 2nd and 3rd person singular active were originally  $-h/-\check{s}$  and  $-t$ . Both  $-h$  and  $-t$  were lost in Old Persian, leaving only the 2nd singular  $-\check{s}$  as a distinct ending. As the 2nd and 3rd person singular were identical in both the thematic and several of the athematic declensions the ending  $-\check{s}$  was also introduced into the 3rd singular and finally also into the 3rd plural *akunavaša* (DSf), from which it spread further to *adurujiyaša*. A similar form is *abaraha^n* (DNa 19-20), which seems to have been formed by analogy to *akunavaša^n*. The “proportions” here are (see Kuryłowicz, *Inflectional Categories*, p. 157; Allegrì-Panaino, 1995):

2nd *abara* : 3rd *abara* = 2nd \**akunauš* : 3rd *X*  $\Rightarrow$  *X* = *akunauš*  
 sing. *abara* : plur. *abara* = sing. *akunauš* : *X*  $\Rightarrow$  *X* = \**akunauš*, for which *akunavaš(a^n)*;  
 sing. *akunauš* : plur. *akunavaš(a^n)* = sing. *abara* : *X*  $\Rightarrow$  *X* = *abarah(a^n)*.

Note that we do not know how these 3rd plur. forms were actually pronounced, and the above explanations are hypothetical.

Note also that these proportions make sense only on the assumption that the “unwritten” final consonants were *not* pronounced!

## SYNTAX. NOMINATIVE. 2.

### The nominative naming phrase.

This lesson contains examples of the so-called parenthetical naming construction. Names of persons and places in narrative passages are introduced by a parenthetical phrase in the nominative. The phrase agrees in gender (as if an open compound) with the noun it qualifies:

name + *nāma* (masc.) or *nāmā* (fem.) + “man, town, land”:

The syntactical function of the naming phrase is usually made clear by a *resumptive* pronoun or adverb:

***Dādaršiš nāma Arminiya manā badaka avam adam frāišayam Arminam*** “An Armenian (his) name Dādarši, my loyal subject—him I sent to Armenia,” (DB 2.29-30) = “I sent an Armenian called Dādarši ...”

***Kāpišakāniš nāmā didā avadā hamaranam akunava*** “A fortress (its) name Kāpišakāni—there they fought the battle.” (DB 3.60-61) = They fought the battle at a fortress called Kāpišakāni.”

Without resumptive:

*pasāva adam frāišayam Dādaršiš nāma Pārsa manā badaka Bāxtrīyā xšaçaṣpāvā abiy avam* “Then I sent a Persian called Dādarši, my loyal subject (and) satrap of/in Bactria, against him.” (DB 3.12-14)

The entire naming phrase (in the nominative!) may be governed by a preposition:

*hacā Pirāva nāma rauta* “from the river Nile” (DZc9)

### The nominative with verbs of “consideration.”

When we say “I consider myself great, I call myself great” in Old Persian the predicate noun/adjective is in the nominative:

*fratara maniyaiy* “I consider myself superior” (DNb 38)

*Naditabaira haya Nabukudracara agaubatā* “Nidintu-Bēl, who called himself Nebuchadrezzar” (after

DB 1.84)

**SYNTAX. ACCUSATIVE. 2.**

Note the following uses of the accusative:

1. with  $\sqrt{\text{draug}}$  “to lie (to sb.)” (also with gen.-dat.):

*kāram* *avaθā adurujiya* “he lied to (deceived) the people thus,” (DB 1.78)—beside *kārahayā* *avaθā adurujiya* (DB 1.38-39), cf. *kārahayā* *avaθā aθaha* “he spoke to the people.” (DB 1.75)

2. with the impersonal verb *varnava-* in the meaning “to believe”:<sup>16</sup>

*mām/θuvām* *naiy varnavataiy* “I/you do not believe”

3. with an agent noun in *-tar-* where we would expect a genitive:

*Auramazdā θuvām dauštā* “Ahuramazdā likes/favors you” (lit. “a liker unto you”)

4. with *kāma ah-* “to wish”:

*mām kāma āha* “I wished” (lit. “the wish was unto me”)

**SYNTAX. IMPERFECT.**

The function of the Old Persian imperfect corresponds to that of the Indo-Iranian imperfect and aorist (indicative), that is, it is a narrative tense indicating actions and events in the past taking place along a one-dimensional time axis. Thus it is used to state successive actions and events, but also actions and events anterior to other actions and events in the past. It corresponds to the English imperfect and (narrative) pluperfect.

*adam Dārayavauš xšāyaθiya vazarka xšāyaθiya xšāyaθiyānām xšāyaθiya dahayūnām Vištāspahayā puça Haxāmanišiya haya imam tacaram akunauš* “I (am) Darius, the great king, king of kings, king of lands, son of Hystaspes, an Achaemenid, who made this palace.” (DPa)

*iyam Gaumāta haya maguš adurujiya avaθā aθaha adam Bardiya amiy haya Kurauš puça adam xšāyaθiya amiy* “This (picture represents) Gaumāta the magian. He lied (and) said thus: ‘I am Smerdis, who is the son of Cyrus. I am king.’” (DBb)

*iyam Āçina adurujiya avaθā aθaha adam xšāyaθiya amiy* “This (picture is) Āçina. He lied (and) said thus: ‘I am king.’” (DBc)

*imaiy kāram adurujiyaša* “These lied to the army.” (DB 4.34-35)

*yaθā Kabūjiya Mudrāyam ašiyava pasāva kāra arika abava* “When Cambyses had gone to Egypt, then the people/army became disloyal.” (DB 1.33)

*θātiy Dārayavauš xšāyaθiya ... yaθā paruvamciy avaθā adam akunavam āyadanā tayā Gaumāta haya maguš viyaka* “King Darius announces: ‘Just as (they were) before, thus I made the temples that Gaumāta the magian had ruined.’” (DB 1.61-64)

*kāra haya Naditabairahayā Tigrām adāraya avadā aištata* “The army that belonged to Nidintu-Bēl held the Tigris. There it (they) stood.” (DB 1.85)

## LESSON 6

kings of the direct line of Cyrus, and there is no historical evidence for two, contemporary, lines of rulers in Persia. Our sources are very fragmentary, however, so this problem may one day find a solution.

To understand the purpose of the genealogy given by Darius we must keep in mind that Darius was not a direct descendant of Cyrus and needed to justify his legitimacy to the throne. It was therefore absolutely necessary for him to document that Cyrus and he had common royal ancestors, which would entitle him to the throne. It is quite likely, therefore, that either Cyrus or Darius, or both, were, if not lying, at least stretching the truth to suit their own purposes.

The genealogy of the Achaemenids may be reconstructed as follows (\* indicates conjectural dates):

## LESSON 7

### PHONOLOGY. DIPHTHONGS.

The OIran. diphthongs *ai* and *au* (both before consonants and vowels) were still intact in Avestan, but were monophthongized to *ē* and *ō* in Old Persian sometime during the Achaemenid period. Internal evidence for the assumption that *ai* and *au* were still diphthongs when the syllabary was made is the fact that special signs for *e* and *o* were not needed.

The Akkadian and Elamite transcriptions, as well as the Greek ones, show little if any trace of diphthongs, compare:

Old Persian	Elamite	Akkadian	Greek
<da-a-ra-ya-va-u-ša> = <i>Dārayavaḥuš</i>	da-ri-ja-ma-u-iš	da-a-ri-ja-muš	Dareîos
<xa-ša-ya-a-ra-ša-na> = <i>Xšaya-aršan-</i>	ik-še-ir-ša	hi-ši- <sup>3</sup> -ar-šá, etc.	Xerxēs
<ha-u-ma-va-ra-ga> = <i>haumavarga-</i>	u-mu-mar-ka	ú-mu-ur-ga- <sup>3</sup>	Amúrgioi
<va-ha-ya-za-da-a-ta> = <i>Vahyazdāta-</i>	mi-iš-da-a-ad-da	ú-miz-da-a-tú	

### PHONOLOGY. SVARABHAKTI VOWELS.

Consonant groups before or after *u* were sometimes “eased” through insertion of another *u*. Such inserted vowels are called *svarabhakti* in Sanskrit, a word meaning “sound-divider.” In Avestan grammar they are called epenthetic “inserted” vowels.

The following instances are found in Old Persian: *dru-* > *duru-* in *duruva-* “healthy, whole,” Av. *druua-*, Skt *dhruvā*; *duruxta-*, Av. °*druxta-*, Skt. *drugdha*; *Suguda-*, beside *Sugda-*, Av. *Suγḁa-* and *Suxḁa-*.

### PHONOLOGY. CONTRACTION.

Contraction is seen in a few instances: *a(h)a* > *ā* in <a-ha-ya> = *āhaya* < \**ahahi*; *iya* > *ī* in <ni-i-ša-a-da-ya-ma> = *nīšādayam* (XPh), beside <na-i-ya-ša-a-da-ya-ma> (Darius) = *niyašādayam*; also OIran. -*ja-* > OPers. *iya* > *ī*, e.g., Skt *maryakā-*, OPers. \**mariyaka-* > *marīka-*, Av. *mairīia-*, OInd. *marya-*.

### NOUNS. Ī- AND Ū-DECLENSIONS.

Feminine nouns such as *Harauvatī-* and *tanū-* are historically long *ī-* and *ū-* stems (cf. Skt. *Sarasvatī-* and *tanū-*), which were originally declined differently from short *i-* and *u-* stems. In Old Persian, however, it appears that the differences between the short and long *ī-* and *ū-* declensions were disappearing and a redistribution of forms was taking place. Thus the nom. sing. of the *ī-* stems ends in both *-īy* and *-īš*,<sup>18</sup> and feminine *i-* and *ī-* stems both have the ending of the *ī-* stems in the gen.-dat. and other oblique cases in the singular. Originally there were two different *ī-* declensions. In one, the gen. sing. ended in *-yāh*, which would give OPers. *-iyāh*, in the other in *-iyah*. It is possible, however, that the forms had been remade in analogy with the *ā-* declension, where the gen. sing. was *-āyāh*, with long vowel before *-yāh*:

nom. -*ā* : -*īy* = gen. -*āyāh* : *X* ⇒ *X* = -*īyāh*.

It cannot be determined from the spelling whether the endings had short or long *ī*. If *māhaya* “of the month” is a fem. *ī-* stem, as is probable, the fact that the vowel was not written after the *h* may provide an indication that it was short (but there are no other words with *hī*).

The attested forms are:

<sup>18</sup> Recently, R. Schmitt proposed that the forms in *-īy* should be read as *-iya* and be the nom. sing. of the adjective: *uvārazmiya* “the Choresmian.”

Note that *parūnām* is fem. in DPe 4 *dahayūnām tayaišām parūnām*.

Examples:

*Ariyāramnahayā pitā Cišpiš Cišpaiš pitā Haxāmaniša* “Ariaramnes’ father was Teispes. Teispes’ father was Achaemenes.” (DBa 7-8)

*Uvārazmīy Bāxtrīš* (DB 1.16) = *Bāxtrīš* ... *Uvārazmīš* “Chorasmia, Bactria” (DNa 23-24)

*Kabūjiya nāma Kurauš puça* “(Somebody) called Cambyses, son of Cyrus.” (DB 1.28)

*ima patimaiy aruvastam tayamaiy tanūš tāvayatiy* “And this, too, is my ability of which my body is capable.” (DNb 32-34)

*Dārayavauš haya manā pitā pasā tanūm mām maθištam akunauš* “Darius, who (was) my father, made me greatest after (him)self.” (XPf 30-32)

In Indo-Iranian the feminine of a few *a*-stem adjectives was declined according to the *ī*-declension. In Old Persian the only example is *aθa<sup>n</sup>gaina-* “(made) of stone,” fem. *aθa<sup>n</sup>gainī-*, of which the only form attested is the nom. plur. *aθa<sup>n</sup>gainiya*.

*imā stūnā aθagainiya* “These columns are of stone.”

The acc. plur. is found twice:

*ābica<sup>rīš</sup> gaiθāmcā* “the \*pasture lands and the livestock” (DB 1.64-65) < *ābica<sup>rī</sup>*- otherwise unknown;

*XL arašnīš baršnā* ... *XX arašnīš baršnā* “forty cubits in depth, twenty cubits in depth” (DSf 26-27) < *arašni-*, cf. Skt. *aratnī-* (masc.).

#### NOUNS. MONOSYLLABIC DIPHTHONG STEMS.

There are no examples of monosyllabic diphthong stems in Old Persian, but the adjective *nāviya-*, which seems to mean “(so) deep (that it must be crossed by ships),” is probably derived from *\*nau-* “ship,” whose nom.-acc. plur. *\*nāva* is restored—rightly or wrongly—in DZc.

#### NOUNS. THE LOCATIVE.

The OPers. locative is descended from the Indo-Iranian locative and shows the same forms as Avestan.

The original locative ending of the *a-*, *ā-*, and consonant-stems was *\*-i* in the sing., OPers. *-iy*, and *\*-hu* or *\*-šu* in the plur., to both of which a final *-ā* was frequently added.

The locative singular of the *u*-stems has full grade of the suffix, to which a final *-ā* could be added. The resulting ending *-au-ā* was written *-auvā* or *-avā*.

LESSON 7

The forms are:

	<i>a</i> -stems	<i>ā</i> -stems	<i>u</i> -stems	<i>ī</i> -stems
Sing.	<i>Mādaiy, dastayā</i>	<i>Aθurāyā</i>	<i>Bābirauv;</i> <i>gāθavā, dahayauvā</i>	<i>Bāxtrīyā</i>
Plur.	<i>Mādaišuvā</i>	<i>maškāuvā</i>	<i>dahayušuvā</i>	

**PRONOUNS. THE LOCATIVE.**

The only locative forms found are the fem. sing. *ahayāyā* and the fem. plur. *aniyāuvā*.

**SYNTAX. THE LOCATIVE.**

The locative is used:

1. to express place where or where(in)to, to be translated as “in(to),” “on(to),” etc., with inanimate objects, and “among” with people;

*iyam Fravartiš adurujiya avaθā aθaha adam Xšaθrita amiy Uvaxšatarahayā taumāyā adam xšāyaθiya amiy Mādaiy* “This (picture is) Phraortes. He lied thus (and) said: ‘I am Xšaθrita of the family of Cyaxares. I am king in Media.’” (DBe)

<sup>19</sup> Cf. Khotanese *dīšta yan-* “to put into the hands (of).”

## LESSON 7

When Darius assumed power, rebellions started in several provinces, but these were all quelled, and the empire was stabilized, as told in the Bisotun (Behistun) inscription. After this, Darius was ready to start adding to the empire himself. His first campaign was probably to the east, where he added India, that is, parts of modern Punjab and Sind, to the existing provinces in modern Afghanistan and Pakistan. He then turned to the west, where, after having crossed the Bosphorus by a bridge of ships, he campaigned up through northern Thrace and even across the Danube and into the steppes beyond.

Shortly after the turn of the century, some of the conquered Ionian Greeks in western Asia Minor began objecting to heavy taxation and military service and revolted (the Ionian Revolt, 499-494 B.C.). The revolt was ruthlessly put down, and in 494/3 Darius appointed Mardonius, son of Gobryas, general. Mardonius marched to the Hellespont and crossed the sea on Ionian ships. The net result of the campaign was the extension of Persian power as far south as Mt. Olympus. Persian expansion was finally halted, however, at least for a while, in 490, when the Persians were defeated at the battle of Marathon.

Persian control over Thrace remained, even after the defeat, and the Persians did not give up their plans to conquer the rest of Greece. Darius died soon after (486 B.C.).

### PHONOLOGY. THE /r/ PHONEME.

The “syllabic” (or “sonantic”) *r*, different from the combination *a + r*, is expected from a historical point of view, both from comparison with Avestan and Old Indic and because of the different developments of *r* and *ar* in Middle Persian (see lesson 2). The two are rendered differently also in the Elamite transcriptions, while no distinction is made in the Akkadian transcriptions, compare:

OPers. / ar / <a-ra-i-ya-a-ra-ma-na-> = <i>Ariyāramna-</i> <fa-ra-va-ra-ta-i-> = <i>Fravarti-</i> <vi-i-da-fa-ra-na-ha-> = <i>Vindafarnah-</i>	Elamite <i>ar</i> <b>har</b> -ri-ja-ra-um-na pir-ru- <b>mar</b> -ti-iš mi-in-da- <b>par</b> -na	Akkadian <i>ar</i> <b>ar</b> -ja-ra-am-na- <sup>2</sup> <b>pa-ar</b> -ú-mar-ti-iš ú-mi-in-ta- <b>pa-ar</b> -na- <sup>2</sup>

In order to determine whether we should read *ar*, *ar̥*, or *ra*, we must consult the related languages. The correspondences are as follows:

<i>martiya</i>	<i>mašīia</i>	<i>martiya</i>	<i>mard</i>
<i>kṛta</i>	<i>kərəta</i>	<i>karta</i>	<i>kird</i>
<i>dīrgha</i>	<i>darəya</i>	<i>darga</i>	* <i>darg</i> > <i>dagr</i> (> <i>dēr</i> )
<i>hiranya</i>	<i>zarainīia-</i>	<i>daraniya</i>	<i>zarr</i>

In a few cases the evidence is inconclusive, for instance, *vi-marda-* (cf. Pers. *māl-* < \**mard-*) is related to OInd. *mṛj-*, Av. *mərəz-*.

### WORD FORMATION. COMPOUNDS.

Adjectival compounds (= compounds that are adjectives) consisting of adjective + noun indicating possession are frequent in Old Persian, for instance *tigra-xauda-* “he who has a pointed hat” and *Ariya-ciça-* “whose stock is Aryan.” Such compounds are called *bahuvrīhis*, a Sanskrit word literally meaning “he who has much (*bahu*) rice (*vrīhi*).” Adjectives with the prefix *hu-* + noun, e.g., *huv-asa-* and *hu-martiya-* “he who has good horses, men” can also be *bahuvrīhis*.

The compounds *hamarana-kara-* and *asa-bāra-* are of a different kind. Here a kind of case relationship must be assumed between the two elements, such as, “he who does battle (accusative)” and “he who is carried or rides on a horse (instrumental).” Such compounds are called *tatpuruṣas*, literally “(the one who is) his (genitive) man.”

Note that the prefix *hu-* takes on different forms according to the following sound: before a consonant it

LESSON 8

is written *u-*, before a vowel *uv-*. A following *h-*, which is from Indo-Iranian *\*s-*, becomes *š-* by the “ruki” rule (see lesson 2 on the nom. sing.), but the *h-* is restored by analogy with the simple noun, and *-šh-* is written: *\*hu-* + *hamaranakara-* > *\*hu-šamaranakara-* > *huš-hamaranakara-*. This new prefix *huš-* rhymes with its opposite, *duš-* “bad,” found in *duškarta-* “evil deed” and *dušiyāra-* “bad year, famine.”

**NOUNS. CONSONANT STEMS.**

The most common consonant stems are the *r-*, *n-*, and *h-* stems. The *r-* stems include the family terms (*pitar-*) and agent nouns (*framātar-*). The *n-* and *h-* stems include some important neuter nouns (*nāman-*, *cašman-*, *manah-*). Few forms—only singular—are attested in Old Persian:

	<i>r</i> -stem	<i>n</i> -stems		<i>h</i> -stems	
		masc.	neut.	masc.	neut.
nom.	<i>pitā, brātā</i>			<i>Aspacanā<sup>h</sup>, tauvīyā<sup>h</sup></i>	<i>draya<sup>h</sup>, manaš-cā</i>
acc.	<i>framātāram</i>	<i>asmānam</i>	<i>cašma</i>	<i>nāham</i>	
gen.-dat.	<i>piça<sup>h</sup></i>				
loc.			<i>barzmani<sup>y</sup></i>		<i>drayahayā</i>

Notes:

On the sandhi form *manaš-cā* < *\*manas-ča* see lesson 12).

The gen.-dat. *piça<sup>h</sup>* is from *\*piθrah* with *ç* < *\*θr* (see lesson 13).

The gender of *barzmani<sup>y</sup>* is not known for certain.

The old *h*-stem *māh-* “moon, month” appears to have been transferred to the *ī*-declension: gen.-dat. sing. *māhayā<sup>h</sup>* (see above).

Other consonant stems (only sing. forms attested):

nom.	<i>napā<sup>t</sup></i> ( <i>t</i> -stem), <i>tunuvā</i> ( <i>nt</i> -stem), <i>xšaçaṣpāvā</i> ( <i>n</i> -stem or <i>nt</i> -stem)
acc.	<i>θardam</i> ( <i>d</i> -stem), <i>tunuva<sup>ntam</sup></i>
gen.-dat.	<i>θardā<sup>h</sup>, xšapa<sup>h</sup></i> ( <i>p</i> -stem), ( <i>tunuva<sup>ntahayā</sup></i> : thematized)
loc.	<i>viθiyā</i> ( <i>θ</i> -stem), <i>apiyā</i> ( <i>p</i> -stem)

Examples:

*n*-stems:

*baga vazarka Auramazdā haya avam asmānam adadā* “a great god is Ahuramazdā, who put in its place yonder sky” (after DSe)

*Auramazdām yadataiy ąrtācā barzmani<sup>y</sup>* “he worships Ahuramazdā according to the Order in the height” (XPh 53-54)

*nt*-stems:

*tunuvā skauθim miθa naiy kunautiy* “the strong does not harm the weak” [POS]

*naiy škauθim naiy tunuvatam zūra akunavam* “I did wrong to neither the weak nor the strong” (DB 4.65)

*n-* or *nt*-stems:

*Dādąršiš nāma Pārsa manā badaka Bāxtriyā xšaçaṣpāvā* “a Persian, my subject, by name Dādąrši, satrap in/of Bactria” (DB 3.13-14)

*h*-stems:

*pasāvašaiy adam nāham frājanam* “Then I cut off his nose.” (after DB 2.73-74)

*aitamaiy aruvastam upariy manašcā ušicā* “This is my ability in both thought and understanding.” (DNb 31-32)

*yadiy abiy draya avārasam* “when I came down to the sea” (DB 5.23-24)

*taya<sup>y</sup> drayahayā* “those (peoples) that (are) in the sea” (DB 1.15)

*r*-stems:

*Kabūjyahayā brāt[ā Bardi]ya nāma āha hamātā hamapitā Kabūjyahayā* “Cambyses’s brother was called Smerdis. He had the same mother and father as Cambyses.” (DB 1.26-32)

*avam framātāram hamīçiyam avāja* “He killed that rebellious commander.” (after DB)

*manā piça puçā aniyaiy āha* “My father had other sons.” (after XPf 28-29)

*viθ*- “house”:

*mām Auramazdā pātuv utāmai viθam* “May Ahuramazdā protect me and my house!” (DH 7-8)

*mayuxa kāsakaina Dārayavahauš XŠhayā viθiyā karta* “(This is) a glass doorknob made in the house of king Darius.” (DPI)

*ap*- “water”

The word for “water,” *āp-/ap-*, has the regular forms loc. sing. *apiyā* and inst.-abl. plur. *abiš* (< *ap-biš*, see lesson 9), but the nom. sing. appears to have been transferred to the *ī*-declension (*āpišim* < *āpiš-šim* or *āpiš-šim*), for good reason, as the original nominative would probably have become *\*ā* (< *āf-š*) in Old Persian.

*aniya api[y]ā [ā]hā[ya]tā āpišim parābara* “Another (group) was thrown into the water. The water carried it (i.e., the other group) away.” (DB 1.95-96)

#### NOUNS. THE VOCATIVE.

Only vocative forms of *a*-stems are found. The ending is *-ā*, e.g., *martiyā*.

#### VERBS. THE IMPERATIVE.

The imperative in Indo-Iranian (and Indo-European) had a special set of endings. The simplest form was that of the 2nd sing., which in thematic conjugations was identical with the stem. The endings are:

	athematic	thematic	athematic	thematic
Active Sing.				
2	<i>-diy</i>	<i>-ā</i>	<i>jadiy, paraidiy, pādiy</i>	<i>paribarā, paṛsā</i>
3	<i>-tuv</i>	<i>-atuv</i>	<i>*astuv, pātuv, dadātuv, kunautuv</i>	<i>baratuv</i>
Plur.				
2	<i>-tā</i>	-	<i>paraitā, jatā</i>	-
3	<i>-<sup>n</sup>tuv</i>	-	<i>pā<sup>n</sup>tuv</i>	-
Middle Sing.				
2	<i>-šuvā</i>	<i>-a<sup>h</sup>uvā</i>	<i>ku<sup>n</sup>šuvā</i>	<i>patipayahuvā</i>
3	-	<i>-atām</i>	-	<i>vaṛnavatām</i>

The verb *šiyava-* has no imperative “go!” in the inscriptions. Instead *paraidiy* and *paraitā* are used.

The form *\*astuv* is attested only in an Elamite inscription as *aš-du*.

#### SYNTAX. VOCATIVE AND IMPERATIVE.

In Old Persian, the vocative is used when addressing somebody directly. The verb of the sentence is then often an imperative or a form of similar function. This restriction of the usage is due to the nature of the text. Another common context of the vocative is in questions.

The imperative is used principally in positive commands. Negative commands or wishes are expressed with the injunctive and the optative (see later).

The 3rd person imperative may be translated as “may he do!,” “let him do!”

*martiyā dargam jīvā* “O man, live long!”

## LESSON 9

### PHONOLOGY. CONSONANT PHONEMES.

The Old Persian consonant phonemes are the following:

p	t	k	c [tš]	r	v (u)	s	š	ç	h
b	d	g	j [dž]	l	y (i)	z	(ž?)		
f	θ	x							
m	n								

The phonemes /u/ and /i/ are here written /v/ and /y/ for convenience. In the Old Persian writing system we always have <uv> and <iy> after consonants and sometimes after the vowel *a*: <Cuv> and <Ciy> = /Cv/ and /Cy/, and <av>, <auv> and <ay>, <aiy> = /av/ and /ay/. In view of these spellings there may have been no phonemic oppositions /av/ ~ /auv/ or /ay/ ~ /aiy/ before vowel.

The only new phoneme in Old Persian from an Old Iranian point of view is /ç/. The exact nature of the phoneme /ç/ as well as its phonetic realization is uncertain, and it is unclear how it fits into the phonological system. Historically it is derived from earlier *θr* or, rarely, *sr*, and in Middle Persian it coincided with regular *s*, e.g., *puça-*, Av. *puθra-*, MPers. *pus*. The sound is transcribed as *š* in Elamite and *t-s* or *s-s* in Akkadian in the name of Artaxerxes: *Artaxšaça-*, Elam. *ir-tak-ša-aš-ša*, Akk. *ar-tak-šat-su/-as-su*,<sup>20</sup> cf. Aram. ʾrthššš, Gk. *Artakséssēs*. Its phonemic and phonetic values may also have changed during the Achaemenid period, as the name is spelled *Ardaxcašca* in a late inscription from the reign of Artaxerxes III (?).

The assumption of a phoneme /ž/ is based mainly on historical considerations. There is no separate sign for [ž] in the OPers. syllabary. The only example of the phoneme is *nijāyam*, presumably /nižāyam/ < \*niž-āyam < \*niš-āyam. It may be simpler to assign [ž] to the phoneme /j/ and assume that it was pronounced [dž] as written. Alternatively, OPers. <j> was actually pronounced [ž], and there may have been no phoneme /j/.

Note also that in Avestan the prefix *duš-* becomes *duž-* before vowel, e.g., *dužiāra-*, so it is possible that OPers. *dušiyāra-* contains an unmarked [ž].

The phonetic realization of /č/ also appears to have changed throughout the Achaemenid period. Under Artaxerxes II we find the spellings *haša*, [*usta*]canā-, and *Xšayārca-* beside *hacā*, *ustašanā-*, and *Xšayārša-*, which seem to point to a merger of [č] and [š]. Alternately, the *š* is written for *ž* (see the remark on *dušiyāra-* above).

There is finally some vacillation between *t* and *d*: *dacara-* (DSd) beside *tacara-* and *Ardaxcašca* (just quoted).

### NOUNS. THE INSTRUMENTAL-ABLATIVE.

The endings of the OPers. instrumental-ablative are inherited from Old Iranian instrumental and ablative forms. The forms are:

	<i>a</i> -stems	<i>ā</i> -stems	<i>u</i> -stems	<i>ū</i> -stems
Sing.	<i>draugā</i>	<i>haināyā</i>	<i>Bābirauš</i> , <i>Bābirauv</i>	<i>Ufrātuvā</i>
Plur.	<i>bagaibiš</i>	-	-	-

	<i>n</i> -stems	<i>h</i> -stems	<i>θ</i> -stems	<i>p</i> -stems
Sing.	<i>baršnā</i> , <i>vašnā</i>	<i>manahā</i>	<i>viθā°</i>	-
Plur.	-	<i>rauca<sup>h</sup>biš</i>	<i>viθbiš</i>	<i>abiš</i>

<sup>20</sup> See Stolper, 1999.

LESSON 9

In Old Persian, the Indo-Iranian endings of the instr. and abl. sing. of *a*-stems became identical: *-ā* and *-āt* both > *-ā*. The plural ending *-(ai)biš* was originally instrumental. The two endings of the *u*-stems are both originally abl.: *-auš* is the old genitive-ablative ending, while *-auv* is probably the same as Av. *-aot*, in which the *-š* of the old genitive-ablative ending has been replaced with the *-t* of the *a*-stems (Av. *-at*).

Note that *baršnā* and *vašnā* are probably inst.-abl. of stems in *-zan-*, zero grade *-šn-*: *barzan-/baršn-* and *vazan-/vašn-*. The nom.-acc. of *\*vazan-* may have been *\*vazār*, from which *vazarka-* was derived. This kind of declension is called the heteroclitic *r/n*-declension. Examples from other languages include Latin *femur* “thigh,” gen. *feminis*, English *water* as opposed to Norwegian-Swedish *vatt*, and Greek *húdōr* “water,” gen. *húdatos* < *\*hudn-t-os*.

**PRONOUNS. THE INSTRUMENTAL-ABLATIVE.**

The pronominal masc.-neut. inst.-abl. ending is *-anā*, as in *anā* (< *ima-*), *avanā*, *tayanā*, *aniyanā*.

The instr.-abl. enclitic pronouns are 1st sing. *-ma* and 3rd sing. *-šim*.

The complete attested singular and plural (dual see lesson 10) paradigm of the far-deictic demonstrative pronoun is:

	masc.	fem.	neut.
Sing.			
nom.	<i>hauv</i>	<i>hauv</i>	<i>ava, avaš-ciy</i>
acc.	<i>avam</i>	<i>avām</i>	=
instr.-abl.	<i>avanā</i>	-	<i>avanā</i>
gen.-dat.	<i>avahayā</i>	-	<i>avahaya<sup>o</sup></i>
Plur.			
nom.-acc.	<i>avaiy</i>	<i>*avā</i>	<i>avā</i>
gen.-dat.	<i>avaišām</i>	-	-

**PRONOUNS. PERSONAL PRONOUNS. THE ENCLITIC 3RD SING.**

The enclitic pronominal stem *di-* is specifically Iranian (Av. and OPers.). It probably developed through wrong division of combinations such as *\*ād-im* “then ... him,” etc. > *\*ā-dim*.

The enclitic pronouns in *š-* are originally sandhi forms of the pronominal stem *ha-/hi-*, which by “ruki” became *ša-/ši-*. In Avestan the original distribution is still found, but in Old Persian the stem *ša-/ši-* has been generalized to all positions.

Enclitic pronouns were originally (e.g., in Old Iranian) attached to the first word of the sentence, but in Old Persian there is some relaxation of this rule.

The complete attested paradigm is:

	masc.	fem.	neut.
Sing.			
acc.	<i>-šim, -dim</i>	<i>-šim, -dim</i>	<i>-šim</i>
instr.-abl.	<i>-šim</i>		
gen.-dat.	<i>-šaiy</i>		<i>-šaiy</i>
Plur.			
acc.	<i>-šiš, -diš</i>	<i>-šiš, -diš</i>	
gen.-dat.	<i>-šām</i>	<i>-šām</i>	

Examples:

*Auramazdāmaiy upastām abara* “Ahuramazdā bore me aid.” (DB 1.25)

*pasāvašim Arbairāyā uzmayāpatiy akunavam* “Then I impaled him at Arbela.” (DB 2.90-91)

*martiya haya hataxšataiy anudim [ha]kartaḥayā avaθādim paribarāmiy haya [v]ināθayatiy anudim*

*vinastah[ya] ava]θā parsāmiy* “The man who makes an effort, him I reward according to (his) achievement. The one who commits an offense, him I punish according to (his) offense.” (DNb 16-18)

*martiya taya kunautiy yadivā ābaratiy anuv taumanišaiy xšnuta amiy* “What a man does or endeavors (to do) according to his powers I am pleased (with).” (DNb 25-26)

*vašnā Auramazdāha utāmai*y “by the greatness of Ahuramazdā and me” (DB 4.45-47) (cf. *vašnā Auramazdāhā manacā Dārayavahauš xšāyaθiyahayā* (DPd 9-11)

In the following example *-diš* “them” refers to the collective singular *kāra-* “army, people”:

*adam niyačārayam kārahayā abicarīš ... tayādiš Gaumāta haya maguš adīnā* “I restored to the people the pastures ... that Gaumāta the magian had taken from them.” (DB 1.64-66)

Note that for emphasis the non-enclitic pronoun may be placed at the beginning of the sentence, before the subject:

*mām Auramazdā pātuv* “May Ahuramazdā protect me!” (XPc 12)

*avataiy Auramazdā ucāram kunautuv* “May Ahuramazdā make that easy for you!” (DB 4.76)

*manā Auramazdā upastām baratuv* “May Ahuramazdā bear me aid!” (DPd 13-14)

#### SYNTAX. INSTRUMENTAL-ABLATIVE.

The functions of the OPers. inst.-abl. incorporate the functions of the OIran. instrumental and ablative.

#### Instrumental functions.

1. means and instrument and expressions signifying “according to” (sometimes + *hacā*), “with respect to” and “because of”:

*vašnā Auramazdāha* “by the greatness of Ahuramazdā.”

*manahā uvaipašiyahayā dārša[m] xšayamna a[m]jiy* “By/through my mind I am strongly in control of myself.” (DNb 14-15)

*imā dahayāva tayanā manā dātā apariyāya* “These lands behaved according to my law.” (DB 1.23)

*artācā < artā<sup>h</sup>acā* (Av. *ašāt haca*) “according to the (cosmic and ritual) Order”

*XL arāšnīš barsnā ... XX arāšnīš barsnā* “forty cubits in depth, twenty cubits in depth” (DSf 26-27)

*kāra haya Naditabairahayā Tigrām adāraya avadā aištātā utā abiš nāviyā āha* “The army which belonged to Nidintu-Bēl held the Tigris: there it stood. And it (= the Tigris) was \*deep with waters.” (DB 1.85-86) (or: “had to be crossed by ship because of the waters”; cf. the Akk. version: *Diglat* (ÍD.IDIGNA) *mali* “the Tigris was full”).

2. association; this is expressed by the preposition *hadā* + inst.-abl. in Old Persian.

*θātiy Dārayavauš xšāyaθiya manā Auramazdā upastām baratuv hadā visaibīš bagaibīš* “King Darius announces: ‘May Ahuramazdā bear me aid together with all the gods!’” (DPd 12-15)

*θātiy Dārayavauš xšāyaθiya pasāva Naditabaira hadā kamnaibīš asabāraibīš amuθa Bābirum ašiyava* “King Darius announces: ‘Then Nidintu-Bēl fled with a few horsemen (and) went to Babylon.’” (DB

2.1-3)

*pasāva hauv Vidarna hadā kārā ašiyava yaθā Mādam parārasa Māruš nāma vardanam Mādaiy avadā hamaranam akunauš hadā Mādaibiš* “Then that Vidarna went (off = left) with the army. When he arrived in Media, he fought a battle with the Medians at a town called Māru.” (DB 2.21-23)

**Ablative functions.**

3. The main function of the ablative is to express movement away from. In Old Persian this function has to be expressed by the preposition *hacā* + inst.-abl.

*pasāva adam nijāyam hacā Bābirauš ašiyavam Mādam* “Then I left Babylon (and) went to Media.” (DB 2.64-65)

*hacā Bāxtriyā ... hacā Uvārazmiyā* “from Bactria, from Chorasmia” (DSf 36, 39-40)

This function of *hacā* is also seen in the passive construction *hacāma aθahaya* “it was announced from me” (probably < “the royal command went out from me”) > “it was said by me” (see lesson 11)

4. The ablative was used to express comparison, English “than,” but only one example is found:

*adakaiy fratara maniyaiy afuvāyā* “Then I consider myself superior to (higher than) fear.” (DNb 38)

5. The inst.-abl. is found with pre-/postpositions: *anuv* “along(side),” *hacā* “from,” *hadā* “together with,” *patiy* “in, throughout” (in *viθāpatiy*), and (*hacā ...*) *yātā* and *yātā ā* “(from ... all the way) up to,”

*Zāzāna nāma vardanam anuv Ufrātuvā avadā [hauv N]aditabaira haya Nabukudracara agaubatā āiš hadā kārā patiš [mām]* “At a town called Zāzāna on the shore of the Euphrates, there that Nidintu-Bēl who called himself Nebuchadrezzar came with the army against me.” (DB 1.90-96)

*θātiy Dārayavauš Xš ima xšačam taya adam dārayāmiy hacā Sakaibiš tayaiy para Sugdam amata yātā ā Kūšā hacā Hidauv amata yātā ā Spardā* “King Darius announces: ‘This empire which I hold (is = stretches) from the Sakas who are beyond Sogdiana: from there all the way to Kush (and) from Sindh: from there all the way to Sardis.’” (DPH 6-8 = DH 5-6)

Note especially the use of *hacā* + inst.-abl. with the verbs *pā-* “to protect (from),” *tařsa-* “to fear, be afraid of,” and *hamiçiya- bava-* “to conspire to leave, to rebel against” (also with gen.-dat.).

*θātiy Dārayavauš xšāyaθiya ... imām dahqyāum Auramazdā pātuv hacā haināyā hacā dušiyārā hacā draugā* “King Darius announces: ‘May Ahuramazdā protect this land from the enemy army, from famine, (and) from the Lie!’” (DPd 12-18)

*θātiy Dārayavauš xšāyaθiya iyam dahqyāuš Pārsa ... hacā aniyanā naiy tařsatiy* “King Darius announces: ‘This land Persia fears no other.’” (DPd 5-12)

*kārašim hacā dařšam atarša* “The army feared him strongly.” (DB 1.50-51)

*pasāva kāra haruva hamiçiya abava hacā Kabūjjiyā abiy avam [a]šiyava utā Pārsa utā Māda utā aniyā dahqyāva* “Then the whole army/people rebelled against Cambyses (and) went to *him* (= the false Smerdis), both Persia and Media and the other lands.” (DB 1.40-41)

*θātiy Dārayavauš xšāyaθiya yātā adam Bābirauv āham imā dahqyāva tayā hacāma hamiçiyā abava Pārsa Ūvja Māda Aθurā Mudrāya Parθava Marguš Ōataguš Saka* “King Darius announces: ‘These are the lands that rebelled against me while I was in Babylon: Persia, Elam, Media, Assyria, Egypt, Parthia, Margiana, Sattagydia, (and) Scythia.’” (DB 2.5-8)

but:

*I martiya Ciçataxma nāma Asagartiya hauvmaiy hamiçiya abava* “(There was) a Sagartian man named Ciçantaxma; he rebelled against me.” (DB 2.79-80)

5. Appositions to words in the inst.-abl. are in the inst.-abl. (no examples?).

**Instrumental-ablative as subject and direct object.**

This unusual use of the inst.-abl. is seen in Old Persian in the dating formula and one other possible instance.

1. The dating formula:

Dates are expressed as follows:

The first: the name of month in gen.-dat. + *māhaya* I **rauca** *θakatam āha* — literally: “of the month of A, 1 day had passed.”

Other days: the name of month in gen.-dat. + *māhaya* + number **raucabiš** *θakatā āha* — literally: “of the month of A, by X days (the days) had passed.”

Comparison between these two formulas, shows that the instr.-abl. plur. *raucabiš* functions as subject.

Examples:

*Viyaxanaḥayā māhaya XIV raucabiš θakatā āha yadiy udapatatā* “It was on the 14th of Viyaxana that he rose up in rebellion.” (DB 1.37-38)

*Garmapadaḥayā māhaya IX raucabiš θakatā āha avaθā xšaçaṃ aqarbayatā* “It was on the 9th of Garmapada. Thus he took the power for himself.” (DB 1.42-43)

The other unexpected instr.-abl. is seen in the following passage:

*adam niyaçārayam kārahayā abicarīš gaiθāmcā māniyamcā viθbišcā tayādiš Gaumāta haya maguš adīnā* “I restored to the people the pastures, the cattle, the household (slaves), and the houses that Gaumāta the magian had taken from them.” (DB 1.64-66)

Here *viθbiš* clearly functions as acc. plur. parallel with the other three accusatives. If “together with the houses” were intended, we would not expect another *-cā*. It is possible, however, that the whole formula was borrowed from a text such as the Avesta, where enumerations of social units is common, and that the form *viθbiš* was taken over uncritically.

**TEXTS. THE EXTENT OF DARIUS'S EMPIRE.**

DPh=DH

*Dārayavauš XŠ vazarka XŠ XŠyānām XŠ dahayūvnām Vištāspahayā puça Haxāmanišiya  
 θātiy Dārayavauš XŠ ima xšačam taya adam dārayāmiy hacā Sakaibiš tayaiy para Sugdam amata yātā ā  
 Kūšā hacā Hidauv amata yātā ā Spardā tayamaiy Auramazdā frābara haya maθišta bagānām mām  
 Auramazdā pātuv utāmai viθam*

In the heyday of his power, Darius was able to describe his empire as reaching to the four quarters of the world: from the northeasternmost Scythians to the southwesternmost Ethiopians, and from easternmost India to westernmost Sardis.

## LESSON 10

### PHONOLOGY. ABLAUT.

In Indo-Iranian (and Indo-European) a vowel belonging either to the stem of a word (noun, verb) or the ending can appear in various “grades”: zero, full (Skt. *guṇa*), and long (Skt. *vṛddhi*) grade. This phenomenon is also referred to as *ablaut* (surviving in English *bite* - *bit*, *shine* - *shone*; not to be confused with the different process of *umlaut*, surviving in English *man* - *men*, *mouse* - *mice*). Examples encountered so far include the stem vowels of *i*- and *u*-stems and the vowel of the element *-tar-* in *r*- stems. (See also lesson 13.)

The original ablaut patterns were the following:

zero grade	full grade	lengthened grade	examples:
-C	aC	āC:	<b>h</b> -atīy ~ <b>a<sup>h</sup></b> -miy, <b>as</b> -tiy ~ -
i	ai	āi/āy:	Cišp- <b>iš</b> ~ Cišp- <b>aīš</b> ~ -
			para- <b>itā</b> ~ <b>ai</b> tiy ~ -
u	au	āu/āv:	°dahay- <b>um</b> ~ dahay- <b>auš</b> ~ dahay- <b>āuš</b> , dahay <b>āva</b> ;
			dur <b>ux</b> ta- ~ dra <b>au</b> ga- ~ -
a (< ṇ)	an	ān:	ja-diy ~ a- <b>jan</b> -am ~ -
m, a (< ṁ)	am	ām:	ha <sup>n</sup> -g <b>m</b> -ata ~ ā- <b>jam</b> -iyā
r, ar	ar	ār:	<b>kar</b> -ta, ca-xr-iyā ~ a- <b>kar</b> -iya, ca <b>r</b> -tanaiy ~ u-c <b>ār</b> -am;
			- ~ Marguš ~ <b>Mārg</b> ava
ar (< ṛH)	ar, rā	ār, rā	<b>darga</b> (cf. Av. <b>drāj</b> ah-, Pers. <b>derāz</b> )

Note especially the suffix *-tar-*:

-ç- < -θr-	-tar-	-tār-	<i>piç</i> a < * <i>piθrah</i> ~ - ~ <i>pitā</i> , <i>framātāram</i>
------------	-------	-------	--

As we see, ablaut plays an important role in Old Persian grammar. It also plays an important role in derivation; *vṛiddhi* is commonly used to derive nouns and adjectives from other nouns and adjectives. Compare:

<i>Margu-</i> “Margiana”	<i>vṛiddhi</i> + suffix <i>-a-</i> : <i>Mārgava-</i> “person from Margiana”
<i>baga-</i> “god” + * <i>yāda-</i> “worshiping”	<i>vṛiddhi</i> + suffix <i>-i-</i> : <i>Bāgayādi-</i> month name
* <i>yau<sup>h</sup>man-</i> (< √ <i>yaug</i> “yoke, combine”?)	<i>yāumani-</i> ( <i>yāumaini-</i> ) “*coordinated, controlled”
* <i>xšayaθa-</i> “the wielding of power”	<i>vṛiddhi</i> + suffix <i>-iya-</i> (< <i>-i</i> + <i>a-</i> ): <i>xšayaθiya-</i> “king”

When the original first term already has a long *ā*, the *vṛiddhi* is not visible:

* <i>āç-</i> “fire” + * <i>yāda-</i>	<i>Āçiyādiya-</i> month name
--------------------------------------	------------------------------

### NOUNS AND PRONOUNS. THE DUAL.

The dual was still alive in Old Persian, but few examples are found, for understandable reasons.

Only masc. forms are attested, except *ušī-*. In Old Indic and Young Avestan there are three distinct forms: nom.-acc., instr.-abl.-dat., and gen.-loc. (in Old Avestan the gen. and loc. are distinct), but we do not know if this was the situation in Old Persian as well, since no instances of duals in dative or genitive function are found, except *ubānām* “of both,” which has the plur. gen.-dat. ending.

nom.-acc.	-ā; -īy	<i>gaušā</i> , <i>avā</i> , <i>ubā</i> ; <i>ušīy</i>
instr.-abl.(-dat.?)	-aibiyā; -ībiyā	<i>dastaibiyā</i> , <i>pādaibiyā</i> ; <i>ušībiyā</i>
(gen.-?)loc.	-āyā; -īyā	<i>gaušāyā</i> ; <i>ušīyā</i>

**VERBS. THE DUAL.**

The only attested verbal form is *ajīvataṃ* “they (= the two) lived/were alive,” with the 3rd dual active ending *-taṃ*.

**VERBS. PRESENT STEMS.**

Present stems are grouped in thematic and athematic stems. These two groups are grouped into a number of classes according to the suffix used to form the present stem. The stems attested in Old Persian are the following:

Thematic stems:

- 1) *-a-*
  - a. + full grade: *bara-*, *bava-*, *ā-naya-*, *jīva-*, etc.
  - b. + zero grade: *ava-ḥarḍa-*
  - c. + nasal infix: *pi<sup>n</sup>θa-* (or *paiθa-*), *mu<sup>n</sup>θa-*
- 2) *-aya-*:
  - a. from roots in *-ā-*: *paya-*, *pati-xšaya-*, *pati-zbaya-*, *ni-saya-*
  - b. + zero grade: *θadaya-* (< √θa<sup>nd</sup>)
  - c. + full grade: *vi-taraya-*, *apa-gaudaya-*
  - d. + long grade: *tāvaya-*, *dāraya-*, *ni-čāraya-*, *ni-šādaya-*, *vi-nāθaya-*
- 3) *-āya-*:
  - a. from roots in *-ā-*: *ava-stāya-*, *ni-štāya-*, *fra-māya-*
  - b. other: *garbāya-*
- 4) *-ya-*:
  - a. active: *jadiya-*, *maniya-*, *durujiya-*, *mariya-*
  - b. passive: *θahaya-*, etc.
  - c. denominative: *avahaya-* (in *patiy-avahaya-*, cf. Av. *auuah-*)
- 5) *-sa-* (Skt *-ccha-*, Lat. *-sc-*)
  - a. + zero grade: *paṛsa-*, *taṛsa-*, *ā-yasa-*, *ā-rasa-*, etc.
  - b. other: *xšnāsa-* (cf. Lat. *gnōscō*)
- 6) reduplicated: *ḥašta-/hišta-* (< \**si-šta-* < √stā with “ruki”)

Athematic stems

- 1) root stems: *ah-/as-*, *ai-*, *jan-*
- 2) reduplicated: *dadā-*
- 3) with suffix *-nau-/nu-*: *kunau-*, *daršnau-*, *āxšnau-*
- 4) with suffix *-nā-/n-*: *dānā-*, *dīnā-*

Athematic verbs are often transferred to the thematic conjugations: *āha* (replacing \**ā* < \**āst* < √as “to be”), *vaṛnava-* (< *vaṛnau-* “to believe”), *adīna-* (*dīnā-* “to rob”).

The present stem *rasa-* is attested only in the imperf. *arasa-* and with preverbs *parārasa-* and *nīrasa-*. The original form was \**ṛsa-* (Skt *ṛccha-*), which became *rasa-* (MPers. *ras-*)—at some indeterminable time—possibly by analogy with *jas-* (attested in Avestan).

**VERBS. THE AORIST.**

Old Persian possesses a few forms that formally belong to the Old Iranian aorist stem of the verbs. One such form is *adā* “he placed, put in (its) place,” traditionally translated as “created,” a so-called root aorist, because it is made from the root √dā, as opposed to the imperfect *adadā*, which is made from the present stem *dadā-*. Other root-aorist forms are the imperatives *pādiy* and *pātuv* “protect!” and “let him protect!” from √pā, different from the present stem *paya-* in *apayaiy* “I protected.” Another aorist form is *adāršiy*, a so-called *s*-aorist, because it is made by affixing *-s-* (or *-š-* by “ruki”) to the root √dar. In Old Persian, the aorist indicative has no discernible function of its own and is only a variant of the imperfect.

The other aorist forms apparently form suppletive paradigms with present stem forms (*paya-* ~ *pā-*, *vaina-* ~ *dī-*). There are too few forms, however, to enable us to determine the exact range and use of aorist forms in Old Persian.

All the attested forms are singular:

	Indicative		Imperative
	active	middle	active
Sing.			
1.		<i>a-darš-iy</i>	
2.			<i>dī-diy, pā-diy</i>
3.	<i>a-dā-<sup>l</sup></i>		<i>pā-tuv</i>

The forms *akutā*, *akumā*, *kušuvā* were formerly and are sometimes still considered as (root) aorists < \**akṛta*, etc. The development of \**kṛ-* to *ku-* is unexpected as the same verb forms the past participle *kar̥ta-*. As the irregular *ku-* is already found in the present stem *kunau-* < *kṛnau-*, it is simpler to regard them as present stem forms with loss of the second *u* before the ending: *aku<sup>w</sup>tā*, *aku<sup>w</sup>mā* or *aku<sup>w</sup>mā* (cf. Skt. *akṛṇma!*), and *ku<sup>w</sup>šuvā* (< \**kunušuvā*).

**SYNTAX. DUAL.**

*yāumainiš<sup>a</sup> amiy utā dastaibiyā utā pādaibiyā* “I am coordinated both with regard to (my) hands and (my) feet.” (DNb 40-41)

a. *yāunaini-* = *yāumani-*.

*martiya taya patiy martiyam θātiy ava mām naiy varnavataiy yātā ubānām hadugām āxšnauvaiy* “I do not believe what a man says against (another) man until I hear (= have heard) the testimony of both (of them).” (DNb 21-24)

**WEIGHTS.**

The Old Persian weight unit was *karša-*. On three weights belonging to Darius the weights are expressed as follows:

Wa     *II karšā*  
 Wc     *CXX karšayā*  
 Wd     *LX karšayā*

All these forms could be dual—nom.-acc. and (gen.-?)loc., respectively, but we do not know why different cases should be used.<sup>21</sup>

Other interpretations include *karšā* instr.-abl. sing.: “with respect to (its) *karša* (weight),” and *karšayā* loc. sing., with an otherwise unattested use of the locative.

<sup>21</sup> One is reminded of the Russian system: 2 to 4 + gen. sing. (< dual. nom.); 5 and higher + gen. plur.

## LESSON 10

Margiana and Sogdiana. He smashed those Margians and Sogdians mightily who did not pay him taxes. He seized those who were their leaders and led them to his fortress. He kept them bound in a town called Aršāda. Then he led them before the king. The king cut off their nose(s) and one ear and gouged out their eye(s). When it became known in Margiana and in Sogdiana that Dātuvaḥya had killed those men, then both (of them) rebelled against him, both Margiana and Sogdiana. They sent a large army against Arachosia. They smashed the army, seized the king, cut off his nose, and impaled him at his (own) gate.

Two men lived in Skudra. They were both good horse-men. They went with (their) horses to Sardis. There they seized much gold and with that gold they paid their taxes to the king. The king was satisfied and treated those two loyal subjects of his well for their achievement.

The circumstances surrounding Xerxes's accession are unclear. Xerxes himself says in this inscription that, although Darius had other sons beside Xerxes, he was the one he made "greatest after himself," that is, second in command. Herodotus elaborates on the story, saying that, as was the custom, Darius had to designate a successor before he went on the Egyptian campaign, and he chose Xerxes, who was the son of Atossa, Darius's most powerful queen, over Artobazanes, who was the son of a lesser queen. There do not seem to have been any difficulties with the succession, as Babylonian documents dated 1 December 486 of Xerxes's first reign appear shortly after Darius's death in November of that year.

## LESSON 11

### SCRIPT. UNWRITTEN SOUNDS.

Comparison with Avestan, etc., and Middle Persian, as well as the spellings in neighboring languages, permits us to conclude that in the OPers. writing system

1. preconsonantal nasals were not written
2. *h* was not written before *u*. It was also not written before *i*, or *hi* was written <ha>:

OPers.	Elamite	Akkadian	Aramaic	Greek
<ca-i-ča-ta-xa-ma>	Ciçantaxma-	zi-iš-šá-an-tak-ma	ši-it-ra-an-tah-ma	
<ka-ba-u-ji-i-ya>	Kambūjiya-	kán-bu-zi-ia	kam-bu-zi-ia	kmbwzy Kambúsēs
<ba-da-ka>	bandaka, cf. MPers. bandag.			

For *h* before *u* Elamite never indicates the presence of any *h* (but *h* is not a phoneme in Elamite), Akkadian sometimes writes *ḥ*, sometimes not,<sup>22</sup> while Greek shows initial *k* or *kh*:

OPers.	Avestan	Elamite	Akkadian	Greek
<i>Uvārazmī-</i>	<i>Xvāirizəm</i>	ma-ra-iš-mi-iš	ḥu-ma-ri-iz-ma- <sup>2</sup>	<i>Khorazmia</i>
<i>Uvaxštra</i>		ma-ak-iš-ta-ra	ú-ma-ku-iš-tar	<i>Kuaksárēs</i>
<i>Auramazdā</i>	<i>Ahura- Mazdā-</i>	u-ra-maš-da	ú-ra-ma-az-da, a-ḥu-ru-ma-az-da- <sup>2</sup>	<i>Ōromazdēs</i>
<i>uvaipašiya</i>	Av. <i>xvāēpaθiia-</i> , cf. MPers. <i>xwēbaš</i>			

Between vowels *h* was sometimes lost, compare:

*ai-* < *ahi-*: <a-i-ša-ta-> <a- + *hišta-*  
*-ā-* < *-āha-*: *āhaya* < \**ahahi*; *maniyāiy* < \**manyāhai*; *artācā* < \**artā-haca*; *θātiy* < \**θahatiy*, cf. *aθaha*

Note Elamite *tur-mar* = \**Tūrvār* for OPers. *Ōūravāhara*.

Before *m*, *h* was not usually written:

*taumā-* “family” < *tauhmā-*, cf. Av. *taoxman-*;  
*amiy* “I am” vs. *ahmiy* in XPI.

A possible explanation of the non-writing of *h* in the above instances is that the *h* devoiced the preceding and/or following vowels.

In words from Median, however, *xm* is found, as in *Taxmaspāda-*, proper name, with *taxma-* (= Av.) “brave.”

Final consonants other than *m* and *š* are not written, but that does not necessarily prove that they were not pronounced. The spread of *-š* as the ending of the 3 sing. and plur. in *akunauš* and similar forms, however, strongly indicates that the corresponding forms of *a*-stems in fact had no consonantal ending, see lesson 6.

Final *-a* < *-an* may, of course, also have been nasalized [ã]. The final *-n* is written in *abaran* XPh 17, unless *𐬀* is a mistake for *𐬀* (*abaraha* in DNa 19-20) as suggested by Kent.

### ADJECTIVES AND ADVERBS. COMPARATIVE AND SUPERLATIVE.

The comparative and superlative of adjectives and adverbs are formed with the suffixes *-tara-* (*-θara-*) or *-īyah-* and *-tama-* or *-išta-*:

The comparative and superlative of adjectives are usually formed from a different stem than the base form. Thus *tunuva<sup>nt</sup>-* “strong, mighty” (< √*tav*) has the comparative *tauvīyah-* “stronger, mightier,”

<sup>22</sup> Note also that Akkadian appears to use Median forms more often than Persian forms. See Zadok, 1976\$\$.

LESSON 11

*vazarka-* “great” the superlative *maθišta-* “greatest,” and *dūra-* “far, long-lasting” the superlative *duvaišta-*. The comparative *\*vahayah-* “better” (cf. Av. *vaxiih-*, *vañhah-* < *\*vahjah-* < *vahu-* “good”) is only found in the proper name *Vahayaz-dāta-*.

Comparative and superlative forms of adverbs include *apataram* < *apa-* “further away” and *fratarā-* (*fraθarā-*) and *fratama-* < *fra-* “superior, supreme.” The attested forms are:

Comparative	
-tara- (-θara-)	<i>apataram, fratarā- (fraθarā-)</i>
-iyah-	<i>tauvīyah-, Vahayaz-dāta-</i>
Superlative	
-tama-	<i>fratama-</i>
-išta-	<i>maθišta-, duvaišta-</i>

**ADJECTIVES. PRONOMINAL ADJECTIVES.**

As we have seen in earlier lessons, a number of adjectives are partly inflected like pronouns. This feature is Indo-Iranian (and Indo-European). The forms attested are (from *aniya-* “other,” *haruva-* “all, every,” and *hama-* “one and the same”):

	masc.	neut.	fem.
Sing.			
nom.	<i>aniya, haruva</i>	<i>aniyaš-čiy</i>	<i>aniyā</i>
acc.	<i>aniyam</i>	<i>aniya, haruva<sup>o</sup></i>	<i>aniyām</i>
instr.-abl.	<i>aniyanā</i>		
gen.-dat.	<i>aniyahyā</i>		<i>hamahayāyā</i>
loc.			<i>haruvahayāyā</i>
Plur.			
nom.-acc.	<i>aniyaiy, aniyāha</i>		<i>aniyā</i>
loc.			<i>aniyāuvā</i>

The adjective *vispa-*, *visa-* “all” has neut. nom.-acc. *visam* and no attested pronominal endings.

*ima taya adam akunavam vašnā Auramazdāha hamahayāyā θarda* “This which I did, by the greatness of Ahuramazdā, I did it in one and the same year.” (DB 4.3-5)

*adam Dārayavauš xšāyaθiya vazarka xšāyaθiya xšāyaθiyānām xšāyaθiya dahayūnām xšāyaθiya haruvahayāyā būmiyā Vištāspahayā puça Haxāmanišiya* (DSb) “I am Darius, the great king, king of kings, king of lands, king of the whole earth, son of Vištāspa, an Achaemenid.”

Note the use of *aniya-* *aniya-* to express “one another” or “one ... the other ...”:

*ava adam akunavam [vašnā] Auramazdāhā yaθā aniya aniyam naiy jatiy* “That I accomplished, by the greatness of Ahuramazdā, that they no longer kill one another.” (DSe 34-36)

*kāra haya Naditabairahayā Tigrām adārāya ... nāviyā āha pasāva adam kāram maškāuvā avākanam aniyam ušabārim akunavam aniyahayā asam frānayam* “The army that belonged to Nidintu-Bel stood by the Tigris. It was deep (with water). Then I loaded the army onto inflated hides. Another (part of the army) I mounted on camels, another (still) I brought horses for.” (DB 1.85-87)

**VERBS. THE PASSIVE.**

There are two ways of expressing passive in Old Persian, either by middle forms or by the special passive stems formed from the zero grade of the root + suffix *-ya-*, e.g., *θahaya-* “be said,” *karīya-* “be done.” No verbs use both methods.

Note that *Cr + ya > Čariya-*, not †*Criya-*.

Note that the endings of the passive forms are the “active” endings, even though the meaning is “passive,” e.g., *θahayāmahay, akariya*.

**SYNTAX. COMPARATIVE AND SUPERLATIVE.**

*haya tauviyā tayam skauθim naiy jatiy naiy vimardatiy* “(that) he who is stronger does not crush the weak (one), nor wipe (him) out” (DSe 39-41)

*Auramazdā vazarka haya maθišta bagānām* “great Ahuramazdā, who (is) greatest of the gods” (DPd 1-2)

*imā dahayāva tayā adam aqarbāyam apataram hacā Pārsā* “These (are) the lands that I seized away from (in addition to ?) Persia.” (DNa 16-18)

*fratarā maniyaiy afuvāyā* “I feel myself superior to fear.” (DNb 38)

*vasiy taya fraθaram akunauš* (XPf 26-27)

*martiyā tayaišaiy fratamā anušiya āhatā* “the men who were their foremost followers” (DB 2.77)

**SYNTAX. PASSIVE.**

The passive is the form a transitive verb must take when no agent (logical subject) is expressed. The majority of passive constructions in Old Persian are of this type. If an agent is expressed, then the passive construction is an alternative to an active construction. The vast majority of constructions containing expressed agents in Old Persian are active.

There are, however, a few instances of passive constructions with expressed agent as well. In such constructions the agent has to be indicated by special means. In English, for instance, the agent is indicated by means of the preposition *by*: “the rebel was killed *by* the king.”

Three constructions are found in Old Persian to express the agent with passive verbs: 1. with the prep. *hacā* (with *aθahaya*), 2. with the postpos. *rādiy* (with *kariya-*); 3. using an enclitic pronoun (with *ayadiya*). The material is too limited (the only examples are the ones below) to decide whether one of these was the preferred or “regular” construction.

The 3rd plural can be used in the sense of “one” instead of a passive construction.

*vayam Haxāmanišiyā θahayāmahay* “We are called Achaemenids.”

*[fravata] BU akaniya pasāva θikā avaniya ... upariy avām θikām hadiš \*frāsahaya ... yakā hacā Gadārā ābariya utā hacā Karmānā ... taya ištiš ajaniya kāra haya Bābiruviya hauv akunauš ... daraniyam hacā Spardā utā hacā Bāxtriyā ābariya taya idā akariya* “Down the earth was dug. That the brick was pounded (into shape): the Babylonian contingent, it did (it). ... The gold, which was made (worked) here, was brought from Sardis and Bactria.” (DSf 23-30, 34-37)

*yadāyā paruvam daivā ayadiya avadā adam Auramazdām ayadaiy artācā barzmani* “where previously the *daivas* were worshiped, there I worshiped Ahuramazdā according to Order in the height” (XPh 39-41)

*Fravartiš agarbi[ya]* (or: *agrabi[ya]*) *ānayatā abiy mām* “Phraortes was seized and led/brought to me” (DB 1.73)

To Darius the one most important god was Ahuramazdā, although he also recognized that there were others, whom he never names by name. Ahuramazdā was responsible for organizing the cosmos. In his reliefs Darius is portrayed as standing in front of the fire altar underneath the winged disk, which no doubt symbolizes the ubiquitous presence and support of Ahuramazdā and the (cosmo-political) Order that the king is supposed to enforce on earth. As ruler of the land, he would specifically implore Ahuramazdā to keep from his land three plagues: famine, which could threaten the subsistence of the land, the enemy army, which could threaten the political independence of the land, and the lie, which threatened the ideological underpinnings of the land.

## LESSON 12

### PHONOLOGY. ENCLISIS AND SANDHI.

When pronouns or other words are attached directly to a preceding word so as to form one unit, the final of the first word takes on forms different from its form in absolute final. Most importantly, sounds lost in absolute final position are sometimes kept, others (especially vowels) retain a more archaic form. In Old Persian sandhi forms are found before the enclitic pronouns, postpositions, and *-cā* “and” and *-ciy* “just” (an emphatic particle).

Before enclitics original vowel quantities are sometimes restored, for instance:

*manā* (< *mana*) + *cā* > *manacā*; *avahayā* (< *avahya*) + *rādiy* > *avahayarādiy*.

Note also spellings such as *pati-*, *nai-*, *hau-* for *patiy*, *naiy*, *hauv* and especially *-āḥa-* for *-āḥay* (2nd sing. subj.) before enclitics.

The compound *paru-zana-* “of many kinds (of peoples)” is sometimes spelled *paruv zana-* with word divider.

When *-cā* and *-ciy* were preceded by *-h* (= Indo-Iranian *-s*) the *-s* became *-š* by assimilation probably already in Old Iranian (cf. Old Ind. *-s + c-* > *-śc-*). When preceded by original *-t* the *-t* was assimilated to the *c-* > *\*-cc-* (as in Old Ind.) which was simplified to *-c-*. Mostly, however, the sandhi form *-šc-* was generalized and also substituted for the older *-cc-*. In Avestan the original forms were reintroduced (*-sc-* and *-tc-*). Examples:

Indo-Iranian	>	Old-Iranian	>	Old Persian
<i>*manas + ca</i>		<i>*manaš-ca</i> (Av. <i>manasca</i> )		<i>manaš-cā</i>
<i>*anyas + cid</i>		<i>*anyaš-cit</i> (Av. <i>ainiiascīt</i> )		<i>*aniyaš-ciy</i>
<i>*kas + cid</i>		<i>*kaš-cit</i> (Av. <i>kascīt</i> )		<i>kaš-ciy</i>
<i>*yat + cid</i>		<i>*yac-cit</i> (Av. <i>yaṭcīt</i> )		<i>yacy</i>
<i>*āt + cid</i>		<i>*āc-cit</i> (Av. <i>aṭcīt</i> )		<i>āciy</i>
<i>*anyat- + cid</i>		<i>*anyac-cit</i>	⇒	<i>aniyaš-ciy</i>
<i>*avat- + cid</i>		<i>*avac-cit</i>	⇒	<i>avaš-ciy</i>
<i>*cit + cid</i>		<i>*cic-cit</i>	⇒	<i>ciš-ciy</i>

The generalization of *-šca-* is easily explained by a proportion (without recourse to sound changes):

*aniya* (masc.) : *aniya* (neut.) = *aniyašciy* (masc.) : X (neut.) ⇒ X = *aniyašciy*.

Other sandhi phenomena in Old Persian:

1. initial *h* after prefixes ending in *i* or *u* becomes *š*, e.g., *ni-had-* > *nišad-* in *nišādaya-* “to place”; in this verb the sandhi form is kept even in the imperfect, *niyašādayam* (later *nīšādayam*);
2. after *hu-* the initial *h-* was restored in *huš-hamaranakara-* < *\*hu-šamaranakara-*;
3. *niš-* became *niž-* before vowels in Indo-Iranian, written *nij-* in *nijāyam*;
4. the final *m* in the preverb *ham-* became *n*, which was not written, before *t*, *k*, and *g*: *hamataxšaiy* ~ *hanataxšataiy*, *hanqarta-*, *hngmata-*.

Note that that double consonants are simplified (or just not written), hence *hucāram-maiy* > *hucāramaiy*.

**PRONOUNS. RELATIVE PRONOUNS.**

The attested forms of the relative pronouns are:

	masc.	neut.	fem.
<b>Sing.</b>			
nom.	<i>haya</i>	<i>taya</i>	<i>hayā</i>
acc.	<i>tayam</i>	<i>taya</i>	<i>tayām</i>
instr.-abl.	<i>tayanā</i>		
<b>Plur.</b>			
nom.	<i>tayaiy</i>		<i>tayā, tayaiy</i>
acc.		<i>tayā</i>	<i>tayā</i>
gen.-dat.		<i>tayaišām</i>	<i>tayaišām</i>

Notes:

*tayaišām* is fem. in DPe 3-4 *dahqyūnām tayaišām parūnām* “of many lands.”

*tayaiy* is fem. in XPh 30-31 *atar aitā dahqyāva tayaiy upariy nipištā* “among these lands which are written above.”

**SYNTAX. RELATIVE CLAUSES.**

Although most Old Persian relative clauses behave like English ones, there are some that contain constructions that are likely to cause the student some difficulty. One should beware, however, of projecting into Old Persian the New Persian “ezafe-construction,” which is of a very different nature from the Old Persian constructions that at first glance might seem to contain the New Persian construction.

**Relative pronoun = subject.**

The simplest relative clauses are the ones in which the relative pronoun occupies the position of subject. These clauses are identical with the corresponding English ones. If the verb of the relative clause is the verb “to be,” it may, as elsewhere, be omitted. This happens frequently in relative clauses consisting of a relative pronoun = subject + an adjective or a noun in an oblique case form, gen.-dat. or loc., for instance.

When the relative clause precedes the verb of the main clause a “resumptive” pronoun, usually *ava-*, is commonly used:

*paraitā kāram hamiçiyam haya manā naiy gaubataiy avam jatā* “Go forth! Crush that rebellious army, which does not call itself mine!” (DB 2.83-84)

*Dārayavaum haya manā pitā avam xšāyaθiyam akunauš* “Darius, who (was) my father, him he made king.” (XPf 22-24)

The resumptive pronoun is only rarely absent:

*martiyā tayai-šaiy fratamā anušiya āhatā avāja* “He killed the men who were his foremost followers.” (DB 3.74-75) — Perhaps for: \**avā avāja?*

Such relative clauses frequently seem to function as “specifying” or “delimiting,” approximately: “that is, namely, the ... one”:<sup>23</sup>

*kāra Pārsa utā Māda haya upa mām āha hauv kamnam āha* “The Persian and Median army I had at my disposal was insufficient.” (DB 2.18-29)

and

*īmam Pārsam kāram pādīy* “Protect this Persian people!” (DPe 21-22)

vs.

<sup>23</sup> Kent (pp. 84-85) regards this use of the rel. pronoun as similar to that of a definite article, but such an analysis is better avoided.

**avam k̄aram tayam Mādam** *jatā haya manā naiy gaubataiy* “Crush that army, which (is) Median (= the Median one), which does not call itself mine!” (DB 2.18-29)

*paraitā k̄aram hamīçiyam* *haya manā naiy gaubataiy avam jatā* “Go forth! Crush that army, which (is) Median, which does not call itself mine!” (DB 2.83-84)

vs.

*kāra haya manā avam k̄aram tayam hamīçiyam aja vasiy* “My army crushed that *rebellious* army.” (DB 2.25-26)

*Vištāspa manā pitā ... hauv [Parθavaiy] āha* “My father, Hystaspes, he was in Parthia.” (DB 2.93-94)

vs.

*Dārayavaum haya manā pitā avam xšāyaθiyam akunauš* “He made Darius, who (was) my father, king.” (XPf 22-24)

### Assimilation of the relative clause.

The case of relative pronoun and the predicate noun or adjective may be assimilated to the case of the antecedent:

*kāra haya manā avam k̄aram tayam hamīçiyam aja vasiy* “My army crushed that *rebellious* army.” (DB 2.25-26)

< \***k̄aram haya hamīçiya** < [*kāra haya hamīçiya*]<sub>acc.</sub>

*xšāyaθiya dahayūnām tayaišām parūnām* “king of the many lands” (DPe 3-4)

< \* *xšāyaθiya dahayūnām tayā* \***paruviya**(?)

### Assimilation of the antecedent.

The “opposite” can also happen, namely that a noun as antecedent is assimilated to the case of the relative pronoun:

***martiya haya draujana astiy avam ufraštam parsā*** “A man who is a liar, punish him well!” (instead of \**martiyam haya draujana astiy ufraštam parsā*) (after DB 4.68-69)

as opposed to:

***Dārayavaum haya manā pitā avam xšāyaθiyam akunauš*** “Darius, who (was) my father, him he (= Ahuramazdā) made king.” (XPf 22-24)

***imā dahayāva tayā adam aqarbāyam ... adamšām patiyaxšayaiy*** “these countries which I seized—I ruled over them” (DNa 6)

In the last sentence it is also possible to analyze the antecedent as a so-called *nominativus pendens* or “dangling nominative,” that is a nominative that is unaffected by the syntax of the sentence.

### Antecedent inside the relative clause.

Sometimes the antecedent is, seemingly, “transposed” into the relative clause and assumes the case of the relative pronoun. In Old Persian this construction occurs frequently with the “specifying” relative clause. The phenomenon is known from other Indo-European languages, as well.

*hacā paruviyata hayā amāxam taumā xšāyaθiyā āha* “From old *our* family were kings.” (DB 1.8)

< \***taumā hayā amāxam** *xšāyaθiyā āha* (instead of simply \**amāxam taumā*)

*imā dahayāva tayanā manā dātā apariyāya* “These lands behaved according to *my* law.” (DB 1.20)

< \**imā dahayāva dātā taya* (or: ***tayanā manā*** *apariyāya*)

## LESSON 12

Young man, *this* is my desire. That which Darius, king of many kings, says, mark that well! Speak that which is true! Act (= behave) according to my law! Protect the weak one! May Ahuramazdā, who is the greatest of the gods, not strike you down!”

Skunxa, who was the greatest of Sakas, was seized and led before me.

### TEXTS. THE OLD PERSIAN CALENDAR.

Not all the Old Persian month names are known from the inscriptions, but the missing ones are supplied by the Elamite transcriptions (the original OPers. forms of which are not all certain). The order of the months has been established on the basis of the Akkadian equivalents. In the following list the Old Persian names have been juxtaposed with the month names of the Cappadocian calendar, which is the earliest attested “Zoroastrian” calendar in the west:

Old Persian	Elamite	Cappadocian	Av./Middle/New Persian
1 Ādukanaiša: m. of sowing?	Hadukannaš	<Hrao>artana	Frawardīn, Farvardīn
2 Ōūravāhara: strong spring?	Turmar	Artēue<s>tē	Aša vahišta, Ardwhišt, Ordībehešt
3 Ōāigrači: m. of garlic?	Sākurriziš	Aroatata	Hauruuatāt, Hordād, Xordād

## LESSON 13

### PHONOLOGY. CONSONANT ALTERNATIONS I.

There are three principal kinds of consonant alternations in Old Persian: I. those due to historical development; II. those due to analogy; and III. those due to the existence of Median beside Old Persian forms. Here types I and II will be discussed. Type III is discussed in the next chapter.

#### Historical developments.

I. The consonant alternations due to historical development are of varying age: 1. some were already present in Indo-Iranian, 2. some developed in Proto-Iranian, and 3. some in Old Persian only.

#### Proto-Indo-Iranian alternations:

I.1. To type 1 belong the following alternations:

*k ~ c*: The alternation seen in forms of √kar “to do”: ppp. *karta-*, but infinitive *cartanaiy*, was caused by a difference in the vowels following the *k* in early Indo-Iranian. Thus, *c < k* before *e, i,* and *y*, while *k* remained before other vowels: *karta-* < \**kṛta-*, but *cartanaiy* < \**kertenai*. The alternation in the interrogative pronouns *ka- ~ ci-* has the same origin, cf. Latin *quod ~ quid*.

*θ* or *s ~ š* as in *ni-paiθ-* “to write,” ppp. *ni-pišta-*, and *parša-* “to ask, punish,” passive *fraθiya-*, and ppp. *u-frašta-*. Here OPers. *θ* is from IE. \**k̑*, which became *š* before *t* in Indo-Iranian. In *parša-* the *s* is from \**s̑k-* with the present stem suffix *-s̑k-* (as in Latin *poscō < p̑ȓ[k̑]-s̑k-ō*), while the ppp. is from \**prek̑-to-*.

#### Proto-Iranian alternations:

I.2. To type 2 belong the following alternations:

*d ~ s*, as in *pād-* “foot” ~ *pasti-* “foot soldier”; *bandaka-* “bondsmen” ~ *basta-* “bound” [similarly, in proto-Iranian, *t > st*, but there are no OPers. examples];

*p ~ f, t ~ θ, k ~ x*. According to a Proto-Iranian rule the stops *p, t, k* became the spirants *f, θ, x* before *r, i, u,* or laryngeal (*H*), cf.

stop	spirant
<i>parša-</i>	<i>u-frašta-</i>
-	<i>paθi- &lt; *patH-</i>
<i>tuvam &lt; *tu-<u>u</u>am</i>	<i>θuvām &lt; *tu<u>u</u>ām</i>
<i>xratum</i>	* <i>xraθuva<sup>h</sup></i> gen.dat. (cf. below)
<i>karta-</i>	<i>ca-xr-iyā</i> (see lesson 16)

*h* or *s ~ š* is the result of a type 1 alternation (*s ~ š*, the “ruki” rule) plus a type 2 alternation (*h ~ s*). According to the “ruki” rule Indo-Iranian *s* becomes *š* after *r, u, k,* or *i*, cf. *ava-stāya-* “to place,” but *ni-šāya-* “to lay down, order.” As Indo-Iranian *s* becomes *h* in Iranian except before *p, t, k* the “ruki” rule has the common form *h ~ š* in Iranian, cf. *hadiš* “seat, palace,” but *ni-šādaya* “to set down”; loc. plur. *maškā<sup>h</sup>uvā* “on inflated hides,” but *Mādaišuvā* “among the Medes” and *dahayušuvā* “among the lands.”

#### Old Persian alternations:

I.3. To type 3 belong the following alternations:

Old Persian *θi > ši*, cf. OInd. *satya-*, Av. *haiθiia-*, OPers. *hašiya-*.

*d ~ (x)š* with regular OPers. *d* from IE. \**ǵ* alternates with *(x)š* before *n*, cf. *Bardiya-*, literally “the tall one”(?), vs. *baršnā* “in depth”; *dānā-* “to know (sth.)” (Germ. *wissen*, French *savoir*) vs. *xšnāsa-* “to know (sb.)” (Germ. *kennen*, French *connaître*).

The corresponding “Median” alternation is *z ~ š*, with “Median” *z* from IE. \**ǵ*, cf. *vazarka-* ~ *vašnā*.

The alternation *tar ~ ç* in the *tar-* stems has *ç < \*θr*, which is from \**tr* according to type II. The only example is *piça < \*piθrah*, cf. *pitā* and *framātāram*.

**Analogy.**

II. Alternations due to analogy.

The alternation *t* ~ *θ* seen in some *u*-stems and elsewhere is due to analogical leveling within paradigms and patterns of word formation. Examples are *u*-stem forms *gāθum*, *gāθavā* and *xraθum* vs. *xratu[m]* (XPI) and *fratarā* (Darius) vs. *fraθarā* (Darius and XPI).

The origin of the forms with *θ* in the *u*-stems is clear. The two forms were originally in complementary distribution: *tu* before consonant and *θv* before vowels, cf. Av. *ratusš* “master” ~ (gen.) *raθβō* and *xratuš* ~ (inst.) *xraθβa*.

The suffix *-θara* may be compared with the Old Indic superlative suffix *-thama*, which would correspond to Iranian *\*-θama* (not attested), which in turn might influence *-tara* > *-θara*.

In Middle Persian both forms with *t* and *θ* are reflected: *xrad* < *xratu-*, *gāh* < *gāθu-*, *fradar* < *fratarā-*, *pahlom* < *\*paraθama-* or *\*uparaθama-*.

**PRONOUNS. DEMONSTRATIVE PRONOUNS.**

Old Persian has a two-way deixis in the demonstrative pronouns, that is, it opposes *iyam/ima-* (*aita-*) “this” and *hauv/ava-* “that,” something close to the speaker and something far from the speaker. The paradigms are suppletive, that is, they incorporate forms from a variety of stems. The far-deictic demonstrative is also used as third-person personal pronoun.

**The near-deictic pronouns *ima-* and *aita-*.**

Of the pronoun *aita-* “this” only the nom.-acc. neut. sing. *aita* and the nom.-acc. fem. plur. *aitā* are found. The forms of *ima-* are:

	masc.	fem.	neut.
Sing.			
nom.	<i>iyam</i>	<i>iyam</i>	<i>ima</i>
acc.	<i>imam</i>	<i>imām</i>	<i>ima</i>
instr.-abl.	<i>anā</i>		
gen.-dat.		<i>ahayāyā<sup>h</sup></i>	
loc.		<i>ahayāyā</i>	
Plur.			
nom.-acc.	<i>imaiy</i>	<i>imā</i>	
instr.-abl.			<i>imaibiš</i>
gen.-dat.	<i>imaišām</i>		

**PRONOUNS. INTERROGATIVE AND INDEFINITE PRONOUNS.**

Interrogative and indefinite pronouns are barely represented in Old Persian. The only forms attested are *kašciy* and *cišciy* found in the following passage:

*naiy āha martiya naiy Pārsa naiy Māda naiy amāxam taumāyā kašciy haya ... kašciy naiy adaršnauš cišciy θastanaiy* “There was no man, either Persian or Median, or anybody of our family, who ... Nobody dared say anything.” (DB 1.48-49, 53)

**VERBS. NON-FINITE FORMS.**

The non-finite forms of the Indo-Iranian verb comprise the infinitives, the participles, the gerunds (absolutives), and the gerundives. Of these only infinitives and participles are found in Old Persian.

**Infinitives.**

The infinitive is formed with the ending *-tanaiy* attached to the full grade of the root. The original (Indo-Iranian) vowel of the root was *e*, as can be seen from *cartanaiy* <  $\sqrt{\text{kar}}$ , in which the palatalization of the initial *k-* was caused by the following *e*. Five infinitives are attested, *ka<sup>n</sup>tanaiy*, *cartanaiy*, *bartanaiy*,

*nipaištanaiy, θa<sup>n</sup>stanaiy.*

**Present participles.**

Present participles are active or middle. The active present participles are *nt*-stems. The middle present participles end in *-amna-*. The forms attested are:

Active	Middle
<i>tunuva<sup>n</sup>t-</i>	<i>xšāyamna-, jiyamna</i>

The gen.-dat. of *tunuva<sup>n</sup>t-* is thematic *tunuva<sup>n</sup>tahayā*.

**Past participles.**

The endings of the past participle are *-ta-*, rarely *-ata-*, most often but not always attached to the stem in its reduced form. Not many forms are attested, and each form has to be learned separately:

Stem	Present stem	Past participle
<i>kar/car</i>	<i>kunau-</i>	<i>kār-ta-</i>
<i>paiθ</i>	<i>ni-paiθa- (ni-pi<sup>n</sup>θa-)</i>	<i>ni-piš-ta-</i>

The meaning of this participle is active with intransitive verbs but passive with transitive verbs (as in English). Examples:

Intransitive	Passive
<i>parai-ta-, mār-ta-</i>	<i>kār-ta-, pā-ta-, etc.</i>
<i>ha<sup>n</sup>gm-ata-, θak-ata-</i>	

Note that the verb *šiyava-* has no past participle in the inscriptions. Instead *paraita-* is used.

**SYNTAX. THE NEAR-DEICTIC PRONOUN *IMA-*.**

The near-deictic pronoun *ima-* refers to what is near to the speaker in time and space, contrasting with *hauv*. Specifically it refers to what is on earth, as opposed to in heaven.

Examples:

*baga vazarka Auramazdā haya imām būmim adā haya avam asmānam adā* “Ahuramazdā (is) the great god, who put in its place this earth, who put in its place that heaven.” (DE 1-4)

*Dārayavaum haya manā pitā avam xšāyaθiyam akunauš ahayāyā būmiyā* “Darius, who (was) my father, him he (= Ahuramazdā) made king of this earth.” (XPf 23-25)

*baga vazarka Auramazdā haya adadā ima frašam taya vainataiy* “Ahuramazdā (is) the great god, who put in its place this wonderful (work) that is seen.” (DNb 1-2)

*mām Auramazdā pātuv hacā gastā utāmai viθam utā imām dahayāum* “May Ahuramazdā protect me from evil, as well as my house and this land.” (DNa 51-53)

*tayām imaišām martiyānām taumām [ubar]tām paribarā* “Treat well the family of these men!” (DB 4.87-88)

*ava ahayāyā dipiyā naiy nipištam* “That is not written in this inscription.” (DB 4.47-52)

**SYNTAX. THE NEAR-DEICTIC PRONOUN *AITA-*.**

This pronoun refers to the matter at hand and often to what has just been said.

**aita** xšačam taya Gaumāta haya maguš adīnā Kabūjijam **aita** xšačam hacā paruviyata amāxam taumāyā āha “This empire which Gaumāta the magian had robbed Cambyses of (as just told), this empire belonged to our family from old.” (DB 1.43-48)

**aitamaiy** aruvastam upariy manašcā ušicā “This (just described) is my ability in both mind and intelligence.” (DNb 31-32)

θātiy Dārayavauš xšāyaθiya manā Auramazdā upastām baratuv ... utā imām dahayāum Auramazdā pātuv ... **aita** adam yānam jadiyāmiy Auramazdām ... **aitamaiy** yānam Auramazdā dadātuv “King Darius announces: ‘Let Ahuramazdā bring me help! ... And let Ahuramazdā protect this land! ... This (is) the favor I ask Ahuramazdā for. Let Ahuramazdā grant me this favor!’” (DPd 12-16, 20-24)

utā atar **aitā** dahayāva āha yadātaya paruvam daivā ayadiya “And among these lands (just enumerated), there was (one) where formerly bad gods had been worshipped.” (XPh 35-36)

### SYNTAX. INFINITIVE.

The infinitive is used after words meaning “be able, dare, order.”

adam ni[ya]štāyam imām [yauviyā]m **katanaiy** “I gave order to dig this canal.” (DZc 8-9)

[i]mā uvnarā tayā Auramazdā [upa]r[iy mā]m niyasaya utādiš atāvayam **barta[nai]y** “These (are) talents that Ahuramazdā bestowed upon me. And I was able to bear them.” (DNb 45-47)

kašciy naiy adaršnauš cišciy **θastanaiy** pariy Gaumātam tayam magum “Nobody dared say anything about Gaumāta the magian.” (DB 1.53-54)

iyam patikara aθa<sup>n</sup>gaina tayam Dārayavauš xšāyaθiya niyaštāya **cartanaiy** Mudrāyaiy “This stone image that King Darius gave order to make in Egypt.” (DSab 1-2)

utā ima stānam hauv niyaštāya **katanaiy** ... pasāva adam niyaštāyam imām dipim **nipaištanaiy** “And he gave order to dig this \*niche... Then I gave order to write this inscription.” (XV 20-25)

Note that in English one might also translate these sentences using a passive infinitive: “gave order for a canal to be dug, for an inscription to be written.”

### SYNTAX. PARTICIPLES.

Participles are the adjectival forms of the verb and can be used in the same way as adjectives and nouns.

#### Present participles.

The active present participle *tunuva<sup>n</sup>t-* is used as an adjective meaning “mighty, powerful”:

na[i-mā] kāma taya skauθiš **tunuva<sup>n</sup>tahyā** rādiy miθa qarīyaiš nai-mā ava kāma taya **t[u]nuvā** skauθaiš rādiy miθa qarīyaiš “It is not my desire that a weak (man) should be wronged by a mighty (one), nor is it my desire that a mighty (man) should be wronged by a weak (one).” (DNb 8-11)

The middle participle *xšayamna-* is found once in a periphrastic construction with *ah-* meaning “be in command (of), in control (of)”:

manahā uvaipašiyahayā darša[m] **xšayamna** a[m]iy “By (my) mind I am strongly in control of myself.” (DNb 14-15)

The middle participle *jiyamna-* is used in the neuter in a date expression signifying “the last day of”:

Θūravāharahayā māhāyā **jiyamnam** patiy “on the last day of the month Thuravahara” (DB 2.62)

**TEXTS. DARIUS'S HELPERS.**

DB 4.80-86

*θātiy Dārayavauš xšāyaθiya imaiy martiyā tayaiy adakaiy avadā [ā]hatā yātā adam Gaumātam tayam  
magum avājanam haya Bardiya agaubatā  
adakaiy imaiy martiyā hamataxšatā anušiya manā  
Vidafarnā nāma Vahāyasp[ara]hāyā puça Pārsa  
[U]tā[na n]āma Θuxrahāyā puça Pārsa  
[Gaubar]uva nāma Marduniyahāyā [puça P]ārsa  
[Vi]darna nāma Bag[ā]bignahāyā puça Pārsa  
Ba[ga]buxša nāma Dāt[u]vahāyahāyā puça Pārsa  
Ar[duma]n[iš nāma] Vahau[kahā]y[ā p]uça Pārsa*

According to Darius, nobody else of the family but himself was able to challenge Gaumāta, and those who had known the real Bardiya dared say nothing for fear that they might be killed for revealing the truth. Darius decided to take matters into his own hands, and with the help of six friends killed Gaumāta in September of 522. His helpers are listed both in DB and by Herodotus:

Vindafarnah “finder of good fortune”	Intaphernes
Utāna	Otanes
Gaubaruva “*beef-eater”	Gobryas
Vidarna “*the ripper”	Hydarnes
Bagabuxša “God save!”	Megabyxus
Ardumaniš	Aspathines(!)

As we see, Darius and Herodotus agree on all but the last name. Much has been written about the discrepancy, but no good explanation has been given of Herodotus’s last name.

## LESSON 14

### PHONOLOGY. CONSONANT ALTERNATIONS 2: MEDISMS.

By the time Old Persian became the official Iranian language under the Achaemenids numerous Median words had found their way into it. The Median words are not restricted to technical terminology such as administration, but are from all parts of the lexicon. Sometimes both Median and Old Persian forms are found.

The main differences between the two languages as reflected in Old Persian are the following:

—The Indo-European palatal velars *\*k̑*, *\*g̑*, and *\*g̑h* had become palatal affricates in Indo-Iranian *\*č* [tʃ], *\*č̣* [dʒ],<sup>25</sup> and *\*jh* [dʒh] (> OInd. *ś, j, h*), which in Iranian probably lost the palatalization becoming *\*ts* and *\*dz*. In Old Persian these finally became *θ* and *d* [δ?], but *s* and *z* in the other Iranian languages.

—An exception were the groups *\*k̑u*, *\*g̑u*, and *\*g̑uh*, Indo-Iranian *\*č̣u*, *\*j̣u*, and *\*jḥu* (> OInd. *śv, jv, hv*), which in Old Persian were simplified to *s* and *z*, but elsewhere became *\*sp* and *\*zb*.

—In Old Persian Proto-Iranian *\*θy* > *šy* and *\*θr* > *ç*, but remained elsewhere.

—Indo-European *\*k̑t* became Median *št*, but OPers. *st*.

Note therefore the following correspondences:

Indo-Eur.	Indo-Ir.	Proto-Ir.	OPers.	Med., Av.	Examples
<i>*k̑</i>	<i>*tš</i>	<i>*ts</i>	<i>θ</i>	<i>s</i>	<i>aθaga</i> ~ <i>asā</i>
<i>*g̑(h)</i>	<i>*dž(h)</i>	<i>*dz</i>	<i>d</i>	<i>z</i>	<i>adānā</i> ~ <i>vazarka-</i>
<i>*k̑u</i>	<i>*tšu</i>	<i>*tsu</i>	<i>s</i>	<i>sp</i>	<i>uvasa</i> ~ <i>uvaspa</i>
<i>*g̑u(h)</i>	<i>*dž(h)u</i>	<i>*dzu</i>	<i>z</i>	<i>zb</i>	<i>hazānam</i> ~ <i>patiyazbayam</i>
<i>*ty</i>	<i>*ty</i>	<i>*θy</i>	<i>šiy</i>	<i>θy</i>	<i>hašiya</i> ~ <i>xšāyaθiya</i>
<i>*tr</i>	<i>*tr</i>	<i>*θr</i>	<i>ç</i>	<i>θr</i>	<i>xšaça</i> ~ <i>Xšaθrita</i>
<i>*k̑t</i>	<i>*tšt</i>	?	<i>st</i>	<i>št</i>	<i>ufraštam</i> ~ <i>ufrastam</i>

Note: The phonological features characterizing these “Median” words in Old Persian were probably common in most non-Old Persian languages of the Median-Achaemenid periods, most notably Avestan. The assumption that these words are in fact Median, is therefore based on a political/historic-linguistic argument.

### ADJECTIVES AND ADVERBS. CORRELATIVE PRONOMINAL ADJECTIVES AND ADVERBS.

A number of adjectives and adverbs are formed from the pronominal stems *a-* and *ava-* and *ya-* that sometimes, but not usually, occur in pairs. These are often referred to as “correlative.” Other pronominal stems may also correspond:

Demonstrative	Relative	Interrogative/indefinite	Other
<i>avākaram</i> “of such a sort”		<i>ciyākaram</i> “of what sort”	
<i>avaθā</i> “in that manner, thus”	<i>yaθā</i> “as, like”		<i>aniyaθā</i> “else, differently”
<i>ada°</i> , <i>adakaiy</i> “then”	<i>yadiy</i> “when, if”		
<i>idā</i> “here,” <i>avadā</i> “there”	<i>yadā</i> , <i>yadāyā</i> “where(ver)”		<i>vispadā</i> “everywhere”
<i>avadaš</i> ( <i>hacā</i> ~) “from there”			<i>dūradaš</i> ( <i>hacā</i> ~) “from afar”
<i>āciy</i> “then”	<i>yaciy</i> “whatever”		
<i>avā</i> “so much”	<i>yāvā</i> “as long as”		
	<i>yātā</i> “until, as long as, while”	<i>citā</i> “however long”	
	<i>yaniy</i> “where, in which”		

<sup>25</sup> Note that in Iranian the voiced aspirate series merged with the voiced series: *\*d* and *\*dh* > *d*, etc., e.g., OInd. *dā-* and *dhā-* both = Iran. *dā-*.

The ending *-daš* is, according to K. Hoffmann, to be explained by the proportion

*Bābirauv : hacā Bābirauš = avadā : X ⇒ X = avadaš*

Examples:

*yadāyā paruvam daivā ayadiya avadā adam Auramazdām ayadaiy artācā barzmaniy* “where previously the *daivas* were worshiped, there I worshiped Ahuramazdā according to Order in the height” (XPh 39-41)

*pasāva dādāršiš citā mām amānaya arminiya yātā adam arasam mādam* “Then Dādārši waited for me in Armenia for as long as it took for me to arrive in Media.” (DB 2.47-49)

*adakaiy fratara maniyaiy afuvāyā yadiy vaināmiy hamičiyam yaθā yadiy naiy vaināmiy* “When I see something rebellious, then I feel myself farther beyond fear than when I do not see (it).” (DNb 38-40)

*yaθā paruvamciy avaθā adam akunavam āyadanā tayā Gaumāta haya maguš viyaka* “As (they were) before, thus I made the temples that Gaumāta the magian had ruined.” (DB 1.63-64)

#### VERBS. THE PERIPHRASTIC PERFECT.

The Old Iranian perfect tense appears to have been lost in Old Persian. The old perfect was formed through reduplication, that is, the initial consonant of the stem + a vowel, mostly *a*, was repeated before the stem, e.g.,  $\sqrt{\text{kar}} > \text{cakār-}$ . Only one such form is found in Old Persian: *caxriyā*, which is a 3rd sing. optative perfect. It is only attested in a potentialis construction with the optative expressing irrealis (see lesson 16).

In Old Persian a new perfect was formed, however: a periphrastic formation consisting of a past participle in *-ta-* (ppp.) + forms of “to be” (often omitted).

There are forms of both transitive and intransitive verbs. As the ppp. of transitive verbs has passive meaning (“done, killed”) the perfect construction in these instances is formally passive. There is no *active* perfect construction corresponding to the *passive* one, however, and the ppp. in the perfect corresponds to both active and passive presents and imperfects.

When the ppp. is from a transitive verb but the agent is not expressed, the perfect participle corresponds to a passive imperfect (*taya kartam ~ taya akariya*) and should be translated as a passive perfect (“what has been done”).

#### SYNTAX. PERFECT.

The function of the perfect is as a true “present perfect,” that is, it expresses the result seen in the present of a past action or event. It is often used to “sum up” past events told in the imperfect. Often, but not exclusively, the perfect is found in relative clauses.

*ava ahayāyā dipiyā naiy nipištam* “That has not been written (is not written) in this inscription.” (DB 4.47)

*kāsaka haya kapautaka utā sikabruš haya idā karta hauv hacā Sugudā abariya* “The blue glass (= lapis lazuli) and the carnelian, which has been made here, that was brought from Sogdiana.” (DSf 37-39)

*ārajanam tayanā didā pištā ava hacā Yaunā abariya* “The decoration with which the fortress has been painted, that was brought from Ionia.” (DSf 41-43)

*stūnā aθagainiya tayā idā kartā Abirāduš nāma āvahanam Ūjaiy hacā avadaš abariya* “The stone

columns that have been made here were brought from Abirādu, a town in Elam.” (DSf 45-47)

*θātiy Dārayavauš xšāyaθiya vašnā Auramazdāha utāmaiḡ aniyašciy vasiy **astiy kartaḡ*** “King Darius announces: ‘By the greatness of Ahuramazdā and myself much else too has been done.’” (DB 4.45-47)

*θātiy Dārayavauš Xš Čūšāyā paruv frašam **framātam** paruv frašam **kartaḡ*** “King Darius announces: ‘In Susa much beautiful (work) had been ordered, much has been made.’” (DSf 55-57)

If an agent is expressed it is in the gen.-dat., but note that the only examples are with *karta-* “done.” Most often the agent is a pronoun, but there are also examples of nouns as agents. When an agent is expressed in a perfect construction it corresponds to an active imperfect and should be translated as active, unless a translation as passive would be better English style. In any case it is wrong to translate it *consistently* as passive, as there is no *active* perfect construction corresponding to the *passive* one.

In fact, formally *manā kartaḡ astiy* “I have done” could also be understood as a possessive construction of the type *manā puça astiy* “I have a son” and is thus parallel with English *I have a son* and *I have done*.

*θātiy Dārayavauš xšāyaθiya ima taya **manā kartaḡ** Pārsaiy* “King Darius announces: ‘This (is) what I have done in Persia.’” (DB 3.52-53)

*θātiy Dārayavauš xšāyaθiya tayaiy paruvā xšāyaθiyā yātā āha **avaišām** avā naiy **astiy kartaḡ** yaθā **manā** vašnā Auramazdāha hamahayāyā θarda **kartaḡ*** “King Darius announces: ‘The previous kings while they were (kings/alive) have not done as much as I by the greatness of Ahuramazā have done in one year by the greatness of Ahuramazā.’” (DB 4.50-52)

*[i]mā uvnarā tayā Auramazdā [upa]r[iy mā]m niyasaya utādiš atāvayam barta[nai]y vašnā Auramazdāha tayamaiy **kartaḡ** imaibiš ūvnaraibiš akunavam tayā mām Auramazdā upariy niyasaya* “These talents which Ahuramazdā bestowed upon me, I was able to support them. By the greatness of Ahuramazdā, that which I have done, that I did with these talents that Ahuramazdā (had) bestowed upon me.” (DNb 45-49)

*mām Auramazdā pātuv hadā bagaibiš utā tayamaiy **kartaḡ** utā tayamaiy **piça** Dārayavahauš Xšhāyā **kartaḡ** avašciy Auramazdā pātuv hadā bagaibiš* “May Ahuramazdā together with the (other) gods protect me and that which I have done! And that which my father King Darius has done, may Ahuramazdā together with the (other) gods protect that as well!” (XPc 12-15)

In DSf, *karta-* and *aqariya* are used in the same contexts. The difference between the two is one of perspective: the imperfect focuses on the past activities, whereas the perfect looks at what has been done and is now in place.

In the following passage, which recurs several times only with change of actors and scenery, the use of the perfect instead of the imperfect is difficult to explain. If it is not an example of incipient confusion of the two tenses, we may perhaps regard the forms as conjunct past participles rather than as finite verbs:

*θātiy Dārayavauš xšāyaθiya patiy duvitīyam hamičiyā **hagmatā paraitā** patiš Dādaršim hamaranam cartanaiy Tigra nāmā didā Arminiyaḡ avadā hamaranam akunava* “King Darius announces: ‘For a second (time) the rebels, having come together and gone off against Dadarši to fight a battle, fought the battle at a fortress in Armenia named Tigra.’” (DB 2.37-39)

Corresponding to the present perfect there is a past perfect or pluperfect using the imperfect of “to be.”

*xšaçam taya hacā amāxam taumāyā **parābartam āha** ava adam patipadam akunavam ... adam taya **parābartam** patiyābaram* “The empire that had been taken away from our family, that I put back in its place (back to where it belonged). ... I brought back that which had been taken away.’” (DB 1.61-63, 67-68)

LESSON 14

## LESSON 15

### PHONOLOGY. PERSIAN AND MEDIAN 2.

As a rule the Elamite transcriptions of Old Persian names show the Persian form, while the Akkadian ones show the older, Median, form, e.g.:

OPers.	Elamite	Akkadian
<i>Āçina-</i>	ha-iš-ši-na	at-ri-na = *Āθrina
<i>Ciça<sup>n</sup>taxma-</i>	ti-iš-š-ša-an-tam-ma	ši-it-ra-an-tah-ma = *Ciθrantaxma
<i>Bāxtrī-, Av. Bāxδī-</i>	ba-ik-tur-ri-iš = *Bāxtriš, ba-ak-ši-iš = *Bāxçiš	ba-ah-tar = *Bāxtar?
<i>Ārta-vardiya-</i>	ir-du-var-ti-ia	ar-ta-mar-zi-ia = *Artavarziya
<i>Bardiya-</i>	Bir-ti-ja	bar-zi-ja = *Barziya

In some instances, the Elamite and Akkadian transcriptions reflect Persian forms not used in the inscriptions (see also lesson 11):

OPers. *Ciça<sup>n</sup>taxma-*, but Elamite *ti-iš-š-ša-an-tam-ma* = \**Tiça<sup>n</sup>ta<sup>h</sup>ma*, with 1) a dialectal change (dissimilation) of \*č - ç > \*t- ç, for which we may compare Greek *Tissaphernēs* from OPers. \**Ciça-farnah-*; and 2) \**xm* > Pers. *hm* as in *tau<sup>h</sup>mā-* < \**tau<sup>h</sup>xmā-*.

OPers. *vispa-zana-*, but Elamite *mišadana* = \**visa-dana*, has Pers. *visa* for *vispa* and *dana* for *zana*.

### ADVERBS.

Adverbs in Old Persian are formed in various ways. One large group of adverbs consist of the so-called correlative adverbs (lesson 14). Other adverbs include the following types:

1. adverbs without identifiable derivation: *apiy*, °*patiy*; *nūram*;
2. adverbs derived from adjectives,
  - a. using the nom.-acc. sing. ending *-am*: *apataram*, *dargam*, *duvitīyam* and *çitīyam*, *paruvam*;
  - b. using the loc. sing. ending *-(a)iy*: *vasiy*, *ašnaiy*, *dūrai(y)apiy*;
3. adverbs derived from adjectives or other words using other endings:
  - a. ending *-ta<sup>h</sup>*: *paruviyata<sup>h</sup>*, *a<sup>h</sup>mata<sup>h</sup>*, *fravata<sup>h</sup>*.
4. compounds: *pati-padam*, *duvitā-paranam*, *hayāparam* (*patiy hayāparam*) “once again,” *fra-haravam*, *ni-padiy*, *pasāva* (< *pasā-ava*), *para-draya<sup>h</sup>*.

Note that adverbs can be used as predicate of “to be”:

*kāra Pārsa utā Māda haya upā mām āha hauv kamnam āha* “The Persian and Median army I had at my disposal was insufficient.” (DB 2.18-19)

### VERBS. THE INJUNCTIVE.

The injunctive is formally an imperfect without the augment, e.g., *tarsam*, vs. imperf. *atarsam*.

### VERBS. THE SUBJUNCTIVE.

The subjunctive marker was originally the addition of an “extra” thematic vowel, that is, athematic verbs had subjunctive stems in *-a-*, while thematic verbs had subjunctive stems in *-ā-*. Early on, however, the marker of the thematic verbs (*-ā-*) began spreading to the athematic verbs, as well, as in *kunavāniy*, etc.

In the 1st sing. the ending has an *-n-* rather than an *-m-*.

Only singular forms of the subjunctive are attested:

2	- <i>ahay</i>	- <i>āhay</i>
3	- <i>atīy</i>	- <i>ātīy</i>

Middle Sing.

<i>ahatiy</i>	<i>bavātiy, kunavātiy</i>

athematic	thematic
	<i>kunavānaiy</i>
	<i>maniyāhay (maniyā<sup>h</sup>aiy)</i>
	<i>yadātaiy</i>

Notes:

The form *θāhay* is subjunctive in DB 4.55 and must be contracted from \**θahāhi* (cf. lesson 11).

The form *maniyāiy* in XPh 47 may be purely orthographic for *maniyā<sup>h</sup>aiy* or a late form with contraction.

**SYNTAX. INJUNCTIVE.**

The injunctive is used in Old Persian in the first and second persons with *mā* to express exhortations (“let me not do, be!” “you should not do/be doing!”).

*hacā anīyanā mā taršam* “Let me not fear another!” (DPe 20-21)

*martiyā hayā Auramazdāhā framānā hauvtaiy gastā mā θadaya paθīm tayām rāstām mā avarda mā stabava* “Man! Let not the command of Ahuramazdā seem evil to you! Do not leave the straight path! Do not be obstinate!” (DNa 56-60)

**SYNTAX. USES OF THE SUBJUNCTIVE.**

The main functions of the subjunctive in Old Persian are:

1. to express future (< “prospective/eventual subjunctive”), mainly in main, temporal, conditional, and relative clauses (“he who, whoever”);

*θātiy Dārayavauš xšāyaθiya yadiy avaθā maniyāhay hacā anīyanā mā taršam imam Pārsam kāram pādiy* “King Darius announces: ‘If you think: Let me not fear another! then protect this Persian people!’” (DPe 18-24)

*yadiy kāra Pārsa pāta ahatiḡ hayā duvaiš[t]am šiyātiš axšatā hauvcīy aurā nirasātiy abiy imām viθam* “If the Persian people is protected (then) precisely the longest peace unbroken will come down upon this house.” (DPe 18-22)

*avākaramcamaiy ušīy u[t]ā framānā yaθāmaiḡ taya kartam vaināhay [y]adivā āxšnavāhay utā viθiyā utā spāya<sup>n</sup>tiyayā* “And my understanding and thought is in the manner you see (from) that which I have done or if you hear (about it), both at home and in the camp.” (DNb 27-31)

*θātiy Dārayavauš xšāyaθiya tuvam kā x[šāyaθiya ha]ya aparam āhay hacā draugā daršam patipayauvā mart[iya haya drau]jana ahatiḡ avam ufraštam pārsā yadiy avaθā man[iyāhay] dahayāušmaiḡ duruvā ahatiḡ* “King Darius announces: ‘You who will be king in the future, protect yourself strongly from the lie. If you think: Let my land be safe! (then) punish well any man who may be a liar!’” (DB 4.36-40)

*θātiy Dārayavauš xšāyaθiya yadiy imām haduḡām apagaudayāhay naiy θāhay kārahayā* “King Darius announces: If you hide this testimony (and) do not tell it to the people ...” (DB 4.57-58)

*θātiy Dārayavauš xšāyaθiya tuvam kā xšāyaθiya haya aparam āhay tayām imaišām martiyānām taumām*

[ubar]tām paribarā “King Darius announces: ‘You who will be king in the future, treat well the family of these men!’” (DB 4.86-88)

2. in final clauses “in order that”; only negated clauses are attested: *mātaya* “lest, in order that ... not”:

θātiy Dārayavauš xšāyaθiya vašnā Auramazdāha utāmai aniyašciy vasiy astiy kartam ava ahayāyā dipiyā naiy nipištam avahayarādiy naiy nipištam **mātaya** haya aparam imām dipim patiparsātiy avahayā paruv **θadayātiy** taya manā kartam naišim ima **varnavātaiy** duruxtam **maniyātaiy** “King Darius announces: ‘By the greatness of Ahuramazdā and my self much else has been done.<sup>26</sup> That has not been written in this inscription for the reason that whoever may read this inscription in the future should not find what I have done too much and does not believe it (but) thinks it has been made up (= is a lie).’” (DB 4.45-50)

tuvam kā haya aparam imām dipi[m] patiparsāḥay taya manā kartam varnavatām θuvām **mātaya** dra[uga]m **maniyāhay** “You whoever may see this inscription in the future believe that which I have done, so that you do not think it is a lie!” (DB 4.41-43)

3. to express the “hortative,” i.e., exhortation to 1st person: “may I be/do!” “let me be/do!”:

šiyāta **ahaniy** jīva utā marta ąrtāvā **ahaniy** “Let me be happy (while) alive and blessed (after I am) dead!” (XPh 47-48)

#### SYNTAX. INDIRECT AND DIRECT SPEECH.

In Old Persian indirect speech does not exist, instead direct speech is used. Direct speech is introduced by *taya* or without any introductory particle, in which case the content of the speech or thought follows directly upon the introductory verb (to say, think, know) and can be recognized from the choice of tense or mood in it.<sup>27</sup>

yadipatiy **maniy[āhaiy ta]ya** ciyakaram [āha a]vā dahayāva tayā Dārayavauš xšāyaθiya adāraya patikarā dīdiy tayaiy gāθum baratiy “Also, if you think: ‘How were those lands that King Darius held,’ then look at the statues that carry the throne!” (DNa 38-42)

θātiy Dārayavauš xšāyaθiya vašnā Auramazdāha taya **amaniyaiy** kunavāniy avamaiy visam ucāram āha “King Darius announces: ‘By the greatness of Ahuramazdā whatever I thought ‘let me do’ all (that) was easy for me.’” = “... whatever I thought I would do was easy for me.” (DSI)

## LESSON 16

### VERBS. OPTATIVE.

The optative is sparsely represented in our inscriptions but must still have been quite common. The forms are the regular Indo-Iranian ones. They are:

	athematic	thematic	athematic	thematic

3	-iyā <sup>t</sup>	-aiš	avājaniyā <sup>t</sup> ; biyā <sup>t</sup> , ājamiyā <sup>t</sup> ; caxriyā <sup>t</sup>	vināθayaiš, kəriyaiš, fraθiyaiš

2	-	-aišā		yadaišā

3	-	-aya <sup>n</sup> tā		akunavaya <sup>n</sup> tā

### VERBS. THE AUGMENTED (PRETERITAL) OPTATIVE.

In Old Persian and Avestan we find a few optative forms with augments, made from present indicative or aorist stems. The forms are:

Sing. 3	avājaniyā <sup>t</sup>
Plur. 3	akunavaya <sup>n</sup> tā

### VERBS. THE POTENTIALIS.

There are a few verbal constructions in Old Persian involving a past participle + forms of √bav or √kar. These constructions are now called potentialis.

	active	passive
Present optative		
3	dītam caxriyā <sup>t</sup>	
Imperfect indicative		
3	kərtam akunauš	ka <sup>n</sup> tam abava

### SYNTAX. PARTICLES.

-ca “as well”

*utā aniyašca āha taya duškərtam akəriya ava adam naibam akunavam*  
 “And there was other matter as well that had been made badly—that I made good.” ( XPh 41-46)

-ciy “just, precisely; even; too, as well”

*adamšim gāθavā avāstāyam yaθā paruvamciy* “I put it (back) in its place, just as (it had been) before.”  
 (DB 1.61-63)

*tayataiy gaušāyā θ[ahəyātiy] avāšciy āxšnudiy* “Listen to just that which is said into your ears.” (DNb 53-54)

*yadiy kāra Pārša pāta ahatiy hayā duvaiš[t]am šiyātiš axšatā hauvciy aurā nirasātiy abiy imām viθam*  
 “If the Persian people is protected (then) precisely the longest peace unbroken will descend upon this house.” (DPe 18-24)

*ima hadiš taya Čūšāyā akunavam hacāciy dūradaš ārajanamšaiy abariya* “This palace which I built at Susa, the decoration for it was brought even from far away.” (DSf 22-23)

*vašnā Auramazdāha utāmai aniyašciy vasiy astiy kartaṁ* “by the greatness of Ahuramazdā and myself much else too has been done.” (DB 4.46-47)

*vašnā[ciy] Auramazdāha ada[m] abiyajāvayam abiy ava kartaṁ utā frataram akunavam* “also by the greatness of Ahuramazdā, I added to that work and made it better.” (XPg 7-12)

See also indefinite pronouns (lesson 13).

### SYNTAX. NOMINATIVE. 3.

A variety of verbs other than “to be” take a nominative predicate, cf.:

*vayam Haxāmanišiyā Ōahayāmahay* “We are called Achaemenids.” (DB 1.7 = DBa 10-11)

*Naditabaira haya Nabukdracara agaubatā* “Nidintu-Bēl, who called himself Nebuchadrezzar” (after DB 1.84)

*avahayarādiy naiy nipištām mātaṁ haya aparam imām dipim patiparsātiy avahayā paruv Ōadayātiy taya manā kartaṁ* “It has not been written (here) lest that which I have done seem (too) much to whoever read this inscription in the future.” (DB 4.47-49)

*adakaiy fratara maniyaiy afuvāyā yadiy vaināmiy hamičiyam yaθā yadiy naiy vaināmiy* “When I see something rebellious, then I feel myself farther beyond fear than when I do not see (it).” (DNb 38-40)

Transitive verbs that take two accusatives (direct object and predicate of the direct object) take two nominatives when passive:

*Fravartiš aḡarbiya ānayātā abiy mām ... duvarayāmai bastā adāriya* “Phraortes was seized and led to me. He was kept bound at my gate.” (DB 2.73-75)

cf.

*utā Cičataxmam aḡarbāya ānaya abiy mām* “And they seized Cičantaxmam and led him to me.” (DB 2.87-88)

*utā[šām haya maθ]ištā Skuxa nāma avam aḡarbāya [bastā]m ānaya [abiy mām]*  
 “And their leader, Skunxa, him they seized and led (him) bound to me.” (DB 5.26-28)

### SYNTAX. OPTATIVE.

The optative is used to express a wish (negation *naiy*), hence also exhortation (commands, prayers) and prohibitions (negation *mā*). It is used to express potential (pres. opt.) and unreal (perf. opt.) conditions (with *yadiy*). Examples:

*Auramazdām yadaišā ąrtācā bąrzmaniy* “You should worship Ahuramazdā according to the Order in the height!” (XPh 50-51)

*Auramazdā θuvām dauštā biyā utā[ta]iy taumā vasiy biyā* “May Ahuramazdā be pleased with you, and may you have much family!” (DB 4.55-56)

*Auramazdāta*[i]y *jatā* **biyā** *utātaiy taumā* **mā biyā** “May Ahuramazdā strike you, and may you have no family!” (DB 4.56-59)

*abiy imām dahayāum* **mā ājamiyā** *mā hainā mā dušiyāram ma drauga aita adam yānam jadiyāmiy Auramazdām* “Against this land may there come neither an enemy army nor famine nor the lie! This boon I ask Ahuramazdā for.” (DPd 18-22)

**“Empty” utā:**

Occasionally *utā* introduces a main clause after a subordinate clause with the function of accommodating an enclitic pronoun:

*[i]mā uvnarā tayā Auramazdā [upa]r[iy mā]m niyasaya utādiš atāvayam barta[nai]y* “These (are) talents that Ahuramazdā bestowed upon me. And I was able to bear them.” (DNb 45-47)

cf.

(DB 2.14-15)

### SYNTAX. SUBORDINATION.

#### Subordination by parataxis.

In Old Persian the verbs meaning “to command, order to do” are occasionally construed by parataxis: “he ordered someone (who) did”. The construction recalls the Middle Persian construction with relative pronoun: *framūd kē* “he ordered (someone) who did.” The more common practice is to use an infinitive construction (lesson 13).

\**niyaštāyam hauv Arxa utā martiyā tayaišaiy fratamā anušiya āhatā Bābiraav uzmayāpatiy akariyatā*  
“I commanded (that) that Arxa and the men who were his foremost followers should be impaled in Babylon.” (DB 3.91-92)

*vašnā AM \*Anahəta utā Miθra adam nīstāy<sup>a</sup> apadānā imam akunaiy<sup>a</sup>* “By the greatness of Ahuramazdā, Anāhitā, and Miθra, I ordered (that) one/they should build this palace.” (A<sup>2</sup>Sa 4, see lesson 19)

The same construction is found with *kāma ah-*:

*Auramazdām avaθā kāma āha Dārayavaum haya manā pitā avam xšāyaθiyam akunauš ahəyāyā būmīyā*

<sup>30</sup> Thus Schmitt, 1986. The expression *utamai kartam* “and my work” is common, however, so the other interpretation (lesson 15) seems more probable.

“It was the wish of Ahuramazdā that he made my father Darius king of this earth.” (XPf 21-25)

Relative clauses modifying phrases with the existential verb (“there is, was”) can lack a relative pronoun as subject (cf. Eng. *there is nothing pleases me more*).

*yaθā taya adam xšāyaθiya abavam astiy atar aitā dahayāva tayaiy upariy nipištā ayauda*  
 “When I became king there was among these lands that are written above (one that) was in turmoil.”  
 (XPh 29-32)

### Subordinating conjunctions.

#### *taya* “that”

The conjunction (neut. relative pronoun) *taya* is used in a variety of subordinate clauses, like Eng. *that*, French *que*, etc.

#### Substantival clauses:

##### Subject-clauses.

Nor is it my desire that a man should do harm.” (DNb 8-11, 19-20)

*yaθā Kabūjiya Bardiyam avāja kārahay[ā naiy] azdā abava taya Bardiya avajata*

**TEXTS. FRAGMENTARY TEXTS.**

Many of the Old Persian inscriptions have suffered various kinds of deterioration over the millennia. As a matter of fact, some of the most interesting inscriptions and parts of inscriptions are quite lacunary.

In the case of inscriptions with known or routine contents the texts can often be reconstructed by comparing similar inscriptions, as well as the Akkadian and Elamite versions.

In other cases, when the inscriptions contain new information, not known from other inscriptions, we have only the help of the Akkadian and Elamite, occasionally also the Aramaic, versions. Where these are absent or themselves fragmentary, we can do little to reconstruct the Old Persian texts.

**TEXTS. XERXES'S INSCRIPTIONS. 1.**

The inscriptions of Xerxes contain numerous orthographic and phonetic peculiarities that are partly to be ascribed to a more developed stage of the language and partly to dialect differences. Of special interest in this respect is XPI, which is Xerxes's version of Darius's DNB.

## LESSON 18

### SYNTAX. WORDORDER. 1.

The Old Persian unmarked (neutral) word order is (Adverb +) Subject + predicate or direct object (+ predicate of the direct object) + finite verb.

#### Basic structures.

##### Adv. + Su. + Pred. + V:

*vašnā Auramazdāha adam xšāyaθiya amiy* “By the greatness of Ahuramazdā I am king.” (DB 1.11-12)

##### Adv. + Su. + DO + V:

*vašnā Auramazdāha ima xšačam dārayāmiy* “By the greatness of Ahuramazdā I hold this royal power.” (DB 1.26)

##### (Su.) + DO + OPred. + V:

*aniyam ušabārim akunavam* “Another I made camel-borne.” (DB 1.86-87)

#### Indirect object.

The indirect object can precede or follow (emphatic?) the direct object:

##### Su + IO + DO + V:

*imā dahayāva ... manā bājim abaratā* “These lands brought me tribute.” (DB 1.18-19)

*aniyahayā asam frānayam* “For another I brought forth a horse.” (DB 1.87)

##### Su + DO + IO + V:

*Auramazdā xšačam manā frābara* “Ahuramazdā gave me the royal power.” (DB 1.12)

#### Sentence modifiers.

Sentence modifiers (adverbial phrases of time, place, cause, etc.) are regularly initial, but can also be internal or final:

##### Initial:

*avahayarādiy vayam Haxāmanišiyā θahayāmahiy hacā paruviyata āmātā amahay* “For this reason we are called Achaemenids: From long ago we have been noblemen.” (DB 1.6-8)

*vašnā Auramazdāha ima xšačam dārayāmiy* “By the greatness of Ahuramazdā I hold this power.” (DB 1.26)

##### After the subject/before the verb:

\**hauv paruvam idā xšāyaθiya āha* “He had been king here before.” (DB 1.29)

*drauga dahayauvā vasiy abava* “The Deception became rampant in the lands.” (DB 1.34)

*pasāva hauv Vidarna hadā kārā ašiyava* “Then that Vindafarnah went off with the army.” (DB 2.18-30)

*pasāva Naditabaira hadā kannaibiš asabāraibiš amuθa* “Then Nidintu-Bēl fled with a few horsemen.” (DB 2.1-5)

*pasāva kāra Māda ... abiy avam Fravartim ašiyava* “Then the Median army went against that Phraortes.” (DB 2.16-17)

*pasāva Kabūjiya Mudrāyam \*ašiyava* “Then Cambyses went off to Egypt.” (DB 1.32-33)

*hauv kārahayā avaθā adurujiya* “He lied thus to the army/people.” (DB 1.38-39)

### Raising (fronting).

When a sentence part is moved from its unmarked position toward the beginning of the clause, we say it is *raised* (or *fronted*). The opposite action is *lowering* (or *backing*).

It is not always obvious whether we are dealing with raising or lowering, since, for instance, raising of the DO sometimes has the function of highlighting the Subject, which therefore can be said to have been lowered (see examples below).

### Verb:

*θātiy Dārayavauš xšāyaθiya* “King Darius announces.” (passim)

Note that in the following type we have lowering of the accusative of direction rather than raising of the verb:

*pasāva adam nijāyam hacā Bābirauš ašiyavam Mādam* “then I left Babylon (and) went to Media.” (DB 2.64-65)

### Direct object:

*xšaçam hauv aqarbayātā* “He seized the command for himself.” (DB 1.41-42)

*xšaçamšim adam adīnam* “I took the command from him.” (DB 1.59)

### Direct object + rel. clause:

*xšaçam taya hacā amāxam taumāyā parābartam āha ava adam patipadam akunavam* “I put back in place that command that had been taken away from our family.” (DB 1.61-62)

*avadā avam kāram tayam Naditabairahayā adam ajanam vasiy* “There I struck down mightily that army of Nidintu-Bēl.” (DB 1.88-89)

*mām Auramazdā pātuv hacā \*gastā utāmai viθam utā imām dahayāum* “May Ahuramazdā protect me from evil, as well as my house and this land!” (DNa 51-53)

Around 1970, a stone tablet with an Old Persian inscription was discovered at Persepolis. It soon became clear that it was an inscription by Xerxes that closely imitated Darius's second inscription at Naqsh-e Rostam (DNb), and it was long referred to as XDNb. Later it was correctly added to the sequence of inscriptions by Xerxes from Persepolis and called XPI. Interestingly, the text of XPI seems to follow a copy of DNb that differs somewhat from the known inscription. It also differs in many points of orthography.

**TEXTS. LATE INSCRIPTIONS.**

The inscriptions of Artaxerxes the II and his successors contain numerous forms that are incorrect by the standard of the inscriptions of Darius I and Xerxes I. What we are dealing with is in fact a post-Old Persian stage of the language (or pre-Middle Persian), which already has its own morphology, which is barely disguised by pseudo-Old Persian orthography.

The inscriptions from Artaxerxes II on are written in what is clearly a post-OPers. stage of the language. Those from Artaxerxes I and Darius II are less clear; they are written in a late-OPers. form, as seen from the thematic forms such as *Dārayavaušahayā* and some grammatical constructions, but they are too short and formulaic to tell us much.

Among the (orthographic-)phonetic peculiarities of the post-OPers. stage note:

## LESSON 19

### Vowels:

Cy for Ciy: *n<sup>a</sup>yāka-*, *apar<sup>a</sup>yāka-*; *ab<sup>a</sup>yapara*;  
 use of *i*, *y*, or *iy* to write long *ē*: *paradaydām* for *pardēd<sup>a</sup>(?)*, cf. MPers. *pālēz*; *saiymam* (A<sup>1</sup>) for *sēm<sup>a</sup>*  
 from Gk. *ásēmos*.<sup>32</sup>  
 contraction of *iya* > *ī* in *martīhayā* (A<sup>3</sup>?);  
 perhaps <a> for *ā*: *kayādā* for *\*kayad<sup>a</sup>*; *šāyātim* for *\*š<sup>a</sup>yātim* for *\*šiyātim* (perhaps pronounced *šāī*);  
 defective writing of *ā*: *n<sup>a</sup>yaka-* (A<sup>2</sup>Sa);  
 defective writing of *i* or *ī*: *nastāya* for *n<sup>ī</sup>stāy<sup>a</sup>*.

### Consonants:

voicing of *t* to *d* in *Ardaxcašca*;  
 merger of *c* and *š(?)*: *Xšayārcahayā*; [*usta*]canām (A<sup>2</sup>), *ustašanām* (A<sup>3</sup>); *Ardaxcašca*;  
 st for št in *nastāya*.

Loss of final consonants and probably vowels in endings, as evidenced by the indiscriminate use of short and long vowels and omission of final *m*:

acc. sing.: *imam bātugara* (A<sup>1</sup>); *imam apadāna*, *apadānā imam*; *imām hadiš utā imām \*ustacanām taya aθagainām*, *Artaxšaça* (A<sup>2</sup>); *imām būmām*, *avam asmānām*, *Artaxšaça xšāyaθiya*, *imam ustašanām aθaganām* (A<sup>3</sup>);  
 1st sing.: *n(ī)stāya*, *akunā*, *akunavām*;  
 3rd sing.: *aθavā*; *akunaš*;  
 3rd plur.: *akunaiy(a)* < *\*akunavaya<sup>n</sup>* (cf. *akunavaya<sup>n</sup>tā*).

### STYLISTIC FEATURES.

The Old Persian prose is a highly literary prose, probably influenced both by the epic-poet and the religious language, perhaps also by the style of neighboring literatures.

### Formula variations.

Schmitt, 1992, lists the following variants of the end-formula “May Ahuramazdā protect me, etc.”:

## APPENDIX 1. HISTORY OF OLD PERSIAN

### 1. FROM INDO-EUROPEAN TO PROTO-IRANIAN

Old Persian belongs to the family of Iranian languages, just as English belongs to the Germanic, French to the Romance, and Russian to the Slavic language families. The Iranian languages are in turn closely related to the Indic (or Indo-Aryan)<sup>33</sup> languages, Sanskrit, Pali, Hindi, Urdu, etc. We refer to this greater language family as the Indo-Iranian languages. The Indo-Iranian languages in turn are part of the so-called Indo-European (in German literature “Indo-Germanic”) family of languages, to which the Germanic, Romance, Slavic, Greek, and other languages also belong (but not, for instance, Finnish and Hungarian; Turkish; Akkadian, Arabic, and Hebrew, etc.).

#### Indo-European.

Relationships between languages are determined by “comparison.” The scientific method developed to perform such comparison is called the “historical comparative method.” The main principle of this method is that language relationships are not determined on the basis of *individual* similarities between single words, but on *systematic* correspondences in such similarities. On the basis of these systematic correspondences, one can *reconstruct* a common pre-form of the words, from which the words in the individual languages are derived. These reconstructed words are commonly marked by an asterisk (\*) and may be considered as convenient short-hand forms of the historical forms. Following are a few examples:

IE.	Old Persian	Median/Avestan	Old Indic	Greek/Latin	Germanic
*nepōt-	napā <sup>t</sup>	napā <sup>t</sup>	napāt	-/nepōt-	Germ. <i>neffe</i>

#### Aryan/Indo-Iranian

A few notable changes from Indo-European characterize the reconstructed proto-language of Iranian and Indo-Aryan:

##### Consonants:

- The merger of the IE. velar and labio-velars into one series of velars ( $k/k^u > k$ ).
- The affrication—not phonemic—of the IE. palatals  $\hat{k}$ ,  $\hat{g}$ ,  $\hat{gh} > \acute{c}$ ,  $\acute{j}$ ,  $\acute{jh}$
- The palatalization of the velars to alveo-palatals before the front vowels  $e$  and  $i$  (before the merger of  $e$  and  $a$ ) and the semivowel  $i$ , which produced allophones  $k \sim k^y$ , etc.
  - Subsequent phonemization of  $k^y$ , etc.  $> \check{c}$  and  $\check{j}(h)$  through the merger of IE.  $e$ ,  $a$ ,  $o >$  Iir.  $a$ , and the various subsequent analogical levelings, cf. \**gadhi*  $>$  \**jadhi* (Ind. *jahi*, Av. *jaiḍi*), etc. This process continued in the individual languages, e.g., \**čar-* (Av. *car-*)  $>$  Ind. *kar-*, \**ǵama-*  $>$  Ind. *gama-* (cf. *jamad-agni*, Av. *jima-*).
- The development from various sources of  $\check{s}$  and its allophone  $\check{z}$ , which thus achieved phonemic status:
  - by the “ruki” rule  $s$  ( $z$ ) became  $\check{s}$  ( $\check{z}$ ) after the vowels  $i$  and  $u$ , after liquids ( $r$  and  $l$  and their syllabic

<sup>33</sup> “Aryan,” as opposed to the other language families in the Indian Subcontinent: Dravidian, Muṇḍa, etc.

- variants, and after *k* and *g(h)*, probably also after labials *p* and *b(h)*.
- IE. *k̂* and *ĝ(h)* became *š* and *ž(h)* before dentals and probably after labials.
  - final *š* became voiced before voiced stop, including before vowels = voiced smooth onset, notably in final position in prefixes and before enclitic particles (*duž-*, *niž-*; *yūž-am*).
  - š* and *ž* also developed in the IE. “thorn” groups *kθ* > *kš* (> Ind. *kṣ*, Ir. *xš*), *gδ(h)* > *gž* (> Ind. *kṣ*; Ir. *gž*) and *k̂θ* > *ćš* (> Ind. *kṣ*, Ir. *š*), *ĝδ(h)* > *ǰž(h)* (Ind. *kṣ*; Ir. *z?*). (The simplification of thorn groups before consonant is possibly of IE. date in *\*ĝ(δ)hmē* > Ind. *jmā*, Av. *zəmā*, cf. Gk. *χαμᾶί*, Lat. *humus*.)
  - The development of the IE. laryngeals to a glottal stop or voiced smooth breathing (*h*) after and between vowels. After vowel before consonant they were then lost with compensatory lengthening of the vowel, while they remained or disappeared leaving a mere hiatus between vowels. After consonant *H*<sub>1</sub> was lost, while *H*<sub>2</sub> became a simple aspiration; *H*<sub>3</sub> may have become a voiced continuant, which turned *p* into *b* in *piba-* “to drink” and was then lost.
  - The general merger of *r* and *l* in the standard languages, but preservation of *l* sporadically in many dialects, both Indic and Iranian. (NOTE: Ir. *l* in early Irano-Alanic words is secondary < *ri*.)

## Vowels:

- The vocalization of *n* and *ṃ* > *a* before the merger of *ǎ*, *ě*, *ǝ* > *ǎ*
- The merger of the three vowel series *ǎ*, *ě*, *ǝ* and the corresponding diphthongs into one series: *ǎ(iu)*. The historical correspondences are muddled by developments such as that of *o* in open syllable > *ā* (Brugmann’s Law) and ensuing analogies.
- The development of long vowels from short ones plus laryngeal.

## Proto-Iranian.

The phonological system of Proto-Iranian must have been very close to that of Old Indic. The principal differences, which give Iranian a different look from Old Indic, are two:

1. the development of Indo-Ir. *s* > Iran. *h*, for example: OInd. *asura-* > OIran. *ahura-*.
2. the opening (spirantization) of unvoiced stops before other consonants, including *r*, the half-consonants *u* and *j*, and the Indo-Ir. laryngeal *H*: *pC* > *fC*, *tC* > *θC*, and *kC* > *xC*. Examples:

<i>*trǎias</i> > <i>*θrǎiah</i>	<i>*prāias</i> > <i>*frāiah</i>	<i>cakra-</i> > <i>caxra-</i>
<i>*satīa-</i> > <i>*haθīa-</i>	<i>*sapta</i> > <i>*hafta</i>	<i>*uākš</i> > <i>*uāxš</i>
<i>*ratHa-</i> > <i>*raθa-</i>	<i>*kapHa-</i> > <i>*kafa-</i>	<i>*sakHā</i> > <i>*haxā</i> (cf. OPers. <i>Haxā-maniša-</i> )

Note especially:

IE nom. sing. *\*pónteh-s*, acc. sing. *pónteh-m* > OIran. *\*pantāh*, *\*pantām*, Av. *pantā*, *pantam*, but OInd. *panthās*, *panthām*.

IE instr. sing. *\*pñth-é/ǝ*, acc. plur. *\*pñth-ís*, gen. plur. *\*pñth-óm* > Ind.-Iran = OInd. *pathá*, *pathás*, *pathám* OIran. *paθa*, *paθō*, *paθam* (cf. OPers. *paθē-*).

Consonants:

- The loss of aspiration and the merger of the series of voiced and aspirated voiced consonants.
- The spirantization of stops before consonants, including IIr. *H*; with the loss of *H*, the spirants (*f θ x*) achieved phonemic status.
- The palatalization of *č* before *i*: *\*čīāti-* > Av. *š(ii)āiti-*, OPers. *šiyāti-*.
- The change of *s* > *h* except before stops and in some unusual groups.
- The loss of dental before *s/z* (OInd. *matsya-*, Av. *masīia-*), including in the T<sub>1</sub>ST<sub>2</sub> (OInd. *utthā-*, Ir. *ustā-* < *\*ud-steH-*; OInd. *vitta-*, Ir. *vista-*; *\*ud-kē* > *\*ustšā* > OInd. *uccā*, Ir. *usca*; *\*přk-ske-* > *\*přtś-stśa-* > *\*přtśśa-* = OInd. *přccha-*, Ir. *přsa-*); *\*yad-dži* > *\*yadži* > Av. *yezi* (OPers. *yadiy* < *\*yadži* or = Av. *yeidi*). —In OPers. the reduction of these groups continued and Ir. *stš* also eventually became *s* (Av. *pascāt*, cf. OPers. *pasāva*).
- The simplification of all geminates (*s-s* > *s*, *z-z* > *z*), including those resulting from assimilation (e.g., *s-tś*

> *s*, *tś-š* > *š*, *fž* > *ž*, *d-n* > *n*, *p-b* > *b*).

—The IE.-IIr. allophone *z* of *s* before voiced stop achieved phonemic status through the development of IE., IIr. *dʒd(h)* > Ir. *zd* (Ind. *ddh*).

—IIr. final *ž* was devoiced.

Vowels:

—The loss of IIr. interconsonantal *ə* in all positions and the sporadic development of anaptyctic vowels to ease resulting initial consonant groups.

## 2. THE OLD-IRANIAN LANGUAGES

Proto-Iranian at an early period split into at least three distinct dialect groups, characterized, among other things, by the typical developments of the palatal affricates *č* and *ǰ* and the groups *čū* and *ǰū*. A fourth group may have included various Scythian dialects.

### Proto-Southwest Iranian:

In what is in historical times the southwestern dialect group *č* and *ǰ* merged with Pr.-Ir. *θ* and *d*, respectively, but *čū* and *ǰū* with *s* and *z*, respectively. This group is represented by OPers. and its more or less immediate descendants, including MPers., NPers. and the modern dialects in Fars (Av. *masišta-*, OPers. *maθišta-*; Av. *zraiiāh-*, OPers. *drayah-*; Av. *aspa-*, OPers. *asa-*; OPers. *hazānam*, OInd. *jihvā-*) (In a subgroup of Southwest Iranian *čū* apparently became *θ*, which developed variously into *t* or *h* in modern dialects of the Fars region: Av. *spiš* “louse,” MPers. *špiš*, Fars dial. *teš*, Larestani *heš*, Baskardi *šōš* < \**siš*?)

Other typical OPers. developments are the following:

Ir. internal *ǰn* > *šn* (Av. *vašnā* < \**vazan-*, *baršnā* < *barzan-*);

Ir. *θǰ* > *šǰ* (Av. *haiθiia-*, OPers. *hašiya-*);

Ir. *θn* > *šn* (Av. *araθni-*, OPers. *arašni-*);

Ir. *θr* (and OPers. *θr* < Ir. *čr*) > *ç*, a sibilant of uncertain nature that later merged with *s* (Av. *puθra-*, OPers. *puça-*; Av. *sraiiā-*, OPers. *ničāraya-*).

Ir. *sč* (*stš*) > *s* (Av. *pascāt*, OPers. *pasāva*);

Ir. *čt* (*tšt*) > *st* (Av. *našta-*, OPers. *vinasta-*).

### Proto-Central Iranian:

In the remaining dialects *č* and *ǰ* merged with Pr.-Ir. *s* and *z*, respectively, but *čū* and *ǰū* became *sp* and *zb*. This group is represented by Old Iranian Avestan and Median; Mlr. Parthian, Bactrian, Choresmian, and Sogdian; and by most modern Ir. languages, including the literary languages Kurdish, Balochi, Pashto, and Ossetic.

Median is (supposed to be, see lesson 14) attested by a large vocabulary incorporated into Old Persian, presumably as a substrate for the official language of the Persian Achaemenid kings. This Median substrate language did not share in the special OPers. developments listed above (*ǰ* > *z*: *°zana-*; *čū* > *sp*: *aspa-*; *θǰ*: *xšāyaθiya-*). Many non-OPers. forms are found only in personal or geographical names (*č* > *s*: *Asagarta-* [?]; *θr*: *Xšaθrita-*) and some are typically from the religious vocabulary and so could in principle also be influenced by Avestan (*ǰū* > *zb*: *°zbaya-*, Av. *zbaīia-* “call upon, invoke [a deity],” *zūrah-* “crooked, deceitful > evil deed,” *barzmani-*, Av. *barəziman-* “height”).

### Proto-Northeast Iranian:

Only in the extreme northeast did *čū* and *ǰū* become palatal *ś* and *ž*, respectively, represented by Mlr. Khotanese and modern Wakhi.

### [Proto-Northwest Iranian:

The development of initial *p* > *f* and internal *rǰ* > *l*.]

### Old Iranian dialects.

The different developments in the first two groups did not, apparently, produce two different phonemic

systems, as the old affricates merged with already existent phonemes. Various other developments also did not affect the phonemic system, e.g., that of *čt* > *št* or *st* according to dialect.

1. Development of the IEur. palatal velars *k̂*, *ĝ(h)* to sibilants *s* and *z* everywhere in Iranian, exc. OPers., where they became *θ* and *d* respectively. In Middle Persian, initial *θ* merged with *s* again, but intervocally OPers. *θ* became *h*:
